

Does your Watch need the Doctor?

Your watch needs a rest and a cleaning once a year. The oil dries and the bearings begin to wear and your watch doesn't have a chance to show what it can do if you don't take care of it. You ought to entrust your repairing only to a jeweler of unquestioned skill and reliability. We take special pride in making watches perform better than they ever did. Our charges are moderate. Leave your watch with us.
