

DONKEY IN LONESOME MOOD

Somewhat Peculiar Appeal Made by Small Maid, Touched by Sadness of Her "Dumb" Pet.

This summer, Mr. Oakes, an eminent lawyer, sent his wife and young daughter to a farmhouse in the White mountains for a vacation. Shortly after, he received an urgent request from the little girl to send her a pet donkey to use while there. She had read about donkeys and heard about them, but was not at all familiar with their peculiar vocalism.

The donkey arrived and the child had many rides around the vicinity. She enjoyed it all hugely except the animal's strange noises, which inspired her with the profoundest pity for his evident distress.

One day, after vainly trying to subdue his vocalism, she wrote a letter to her father, in which she said: "Dear Father: I do wish you would come up here soon; my donkey is so very lonesome."—National Monthly.

FACE ITCHED AND BURNED

383 No. Union St., Aurora, Ill.—"My allment started with a little pimple and it always itched and burned terribly. I scratched it and in a few days my face was all covered with sores. It ran up to my eyes and the day after I could not see out of my right eye. I was unable to get any rest. I couldn't go to bed, being afraid of getting the clothing all soiled, although I had my face all bandaged.

"I was given two jars of salve but it kept getting worse. It was something like a running sore because every time I used some of the salve I had to wrap bandages around my neck to keep the water and pus from running down my body. I wrote for a sample of Cuticura Soap and Ointment and in a few days I received these and washed my face with the Cuticura Soap and put on some Cuticura Ointment and the next morning my face felt cool and somewhat relieved. After using the sample I bought some Cuticura Soap and Ointment at the drug store. I followed this treatment just twenty-six days and after using one cake of Cuticura Soap and two boxes of Cuticura Ointment I was cured." (Signed) George Miller, Jan. 1, 1913.

Cuticura Soap and Ointment sold throughout the world. Sample of each free with 32-p. Skin Book. Address postcard "Cuticura, Dept. L, Boston."—Adv.

Butterfly Decoration.

Many artists have employed the butterfly in decoration, but neither brush nor crayon is as effective as nature itself. No imitation, however good, can do justice to the gorgeous colors of the tropical butterfly. One might as well try to reproduce a rainbow in oils. A most effective novelty—a butterfly tray—was shown me yesterday by a charming North side hostess. It was made on the same principle as the tapestry tray. A glittering butterfly, the spread of whose wings must have been all of ten inches, was mounted on a stalk of milkweed. The pressed butterfly was then covered with glass and hermetically sealed. To say that the tray was stunning is to speak very feebly of its attractiveness. With this object d'art as a centerpiece a clever hostess could easily arrange a "butterfly luncheon."—Chicago Inter Ocean.

Forever Parted.

George, who lives in London, happened to meet the vicar of his native parish the other day, and eagerly asked for some of his old acquaintances. "And old Mr. Jones?" he asked. "Have you seen him lately?" "The vicar shook his head. "I shall never see him again," he answered, slowly. "Mr. Jones has gone to heaven."

That Ought to Do It.

Mother—What are you doing, just sitting there singing?
Daughter—Oh, only trying to kill time.

LIVING ADVERTISEMENT

Glow of Health Speaks for Postum.

It requires no scientific training to discover whether coffee disagrees or not.

Simply stop it for a time and use Postum in place of it, then note the beneficial effects. The truth will appear.

"Six years ago I was in a very bad condition," writes a Tenn. lady. "I suffered from indigestion, nervousness and insomnia.

"I was then an inveterate coffee drinker, but it was long before I could be persuaded that it was coffee that hurt me. Finally I decided to leave it off a few days and find out the truth.

"The first morning I left off coffee I had a raging headache, so I decided I must have something to take the place of coffee." (The headache was caused by the reaction of the coffee drug—caffein.)

"Having heard of Postum through a friend who used it, I bought a package and tried it. I did not like it at first but after I learned how to make it right, according to directions on pkg., I would not change back to coffee for anything.

"When I began to use Postum I weighed only 117 lbs. Now I weigh 170 and as I have not taken any tonic in that time I can only attribute my present good health to the use of Postum in place of coffee.

"My husband says I am a living advertisement for Postum."

Name given by the Postum Co., Battle Creek, Mich.

Postum now comes in two forms:

Regular Postum—must be well boiled. 15c and 25c packages.

Instant Postum—Is a soluble powder. A teaspoonful dissolves quickly in a cup of hot water and, with cream and sugar, makes a delicious beverage instantly. 30c and 50c tins.

The cost per cup of both kinds is about the same.

"There's a Reason" for Postum. Sold by Grocers.

NEWS OF SOUTH DAKOTA

Western Newspaper Union News Service.
Potter county commissioners have appointed Dr. W. G. Schneider as coroner of the county.

The Miller chief of police, Jack Wilson, has issued an order prohibiting the sale or use of cigarettes within the city limits.

Some of the business men have inaugurated a movement to have the chief business street of Armour lighted by cluster lights.

Yankton college girls' debating team scored off Morningside, Sioux City, girls' team by a two to one decision on the Monroe doctrine.

Viborg is a lively town and makes it very pleasant for its many visitors. Banker H. E. Morik is director of the cornet band, and they play delightful music Saturday evenings.

Arrangements are being made by Platte committees for a suitable observance of Decoration day, in which the resident of the place and vicinity will generally participate.

Attorney A. B. Beck has commenced injunction proceedings against W. C. Kinsler, proprietor of the Padley hotel, of Geddes, on the ground that he has been running a disorderly house.

"Tom Thumb's Wedding" was staged in the auditorium at Mitchell by 23 children from the Congressional church and proved to be the most entertaining child's play ever put on in the city.

Adj. Gen. W. A. Morris has issued a call for a camp school of instruction for all officers of the Fourth Infantry, South Dakota National Guard, to be held at Redfield for five days, commencing May 25.

The quest for oil in Potter county has not been abandoned by the Fox Oil company, according to reliable reports, and Frank P. Fox, Jr., is expected to visit the test well that was abandoned early this year.

The South Dakota Dental society adjourned its meeting at Sioux Falls after several days of profitable discussion. Dr. J. W. Smoots, of Spearfish, was chosen president for the year and Rapid City as the place for the next meeting.

Mrs. Linstad of Pierre was severely burned on the arms and face in a small blaze caused by a gasoline explosion in the rooms occupied by herself and her son, Captain Otto B. Linstad, of the South Dakota National Guards.

Charles Singer, of Winfred, has recently perfected and patented a folding storm window. By means of this window the storm sash can be either folded or divided into halves, making it more easily handled without chances of breaking.

At a meeting of Kadoka baseball fans a baseball association was organized and arrangements made to place a team in the field. Several other towns in the county also have organized teams and some good games are looked for this season.

Equal suffrage advocates among Aberdeen women have organized an equal suffrage league with following officers: President, Mrs. Lila Robinson; vice president, Mrs. Emma Brown; secretary, Miss Sarah Fewins; treasurer, Mrs. C. H. Cummings.

A storm-freak was shown at Pierre when the grandstand at the high school athletic park was blown to pieces by a wind which, while it was considered a rather hard gust, by sleepers who were awakened by it, showed no other results of its destructive force.

Exports of Sioux Falls flour to Norway are increasing, according to a Sioux Falls dispatch, the wheat flour of this part of the northwest having gained great favor with the residents of that country. The latest shipment was a carload, which was consigned to a firm at Christiania.

The county commissioners of McPherson county have taken steps to build a good road between Leola and Eureka. The route passes through several sections of state lands, and Fred Hepperle, state land commissioner, has arranged to secure \$2,500 from the state to aid in the construction of the road.

The city council has enacted an ordinance regulating the speed at which automobiles and other vehicles can be run through the streets of Lake Preston. The speed limit is fixed at from seven to twelve miles per hour. Those who violate the provisions of the new ordinance will be subject to a fine of not exceeding \$25 for the first offense and a fine of not exceeding \$50 for a second or subsequent offense.

The Rosebud Thoroughbred Stock Racer's association has been organized with headquarters in Dallas. Many of the prominent farmers and stock raisers of the Rosebud country have already joined the association and the membership is constantly increasing. The principal object of the association is to secure co-operation of stock owners of the Rosebud country in securing and raising strictly blooded stock and improving stock already owned in the country.

The Danish Lutheran society of Viborg is erecting a \$4,000 church edifice under the supervision of Rev. Soe.

The White Rock Commercial club has arranged for a big celebration at White Rock on Wednesday, June 3. A brass band has been engaged, there will be a baseball game between White Rock and the Wahpeton Indians, and all sorts of sports, such as racing, wrestling matches, etc., for cash prizes. The merchants will offer bargains, and altogether, it will be a big day for White Rock.

The Winfred hotel, which has been overhauled, has been opened to the public. Mrs. Bralley, an experienced hotel woman of Wentworth, S. D., is the new manager.

For the past year or two there has been considerable illegal sealing in Lake Campbell, at the south edge of Brookings county, and the local authorities have succeeded in apprehending a couple of the offenders and are after others. Louis Sundet and Gehard Sterud were arrested and fined \$50 each, both pleading guilty of sealing without authority.

WILSON IN A TENT

PRESIDENT MAKES HIS SUMMER HEADQUARTERS IN THE OLD FASHIONED GARDEN.

SUBSTITUTE FOR EXERCISE

Life in Fresh Air is Expected to Do Much Toward Keeping the Chief Executive in Trim During the Hot Weather.

By GEORGE CLINTON.
Washington.—President Wilson has pitched a headquarters tent in the old-fashioned flower garden lying just south of the one-story annex, which forms the east approach to the White House. He has made up his mind that he will spend a large part of the summer in Washington and as the summers here notoriously are hot, he intends to get all the breezes and fresh air that he can while at his trying administration work.

Unlike two of his predecessors in office, Theodore Roosevelt and William Howard Taft, Woodrow Wilson has not been able to get all the exercise that he needs to keep himself in perfect physical trim. Physicians say continuous fresh air will make up to some extent for the lack of bodily exercise. It must not be understood that the president is a sick man, for he is not; he simply is somewhat tired and has determined to do that which will overcome the tired feeling as much as possible.

When Mr. Taft came into office there were many alterations made in the east wing of the White House, where the cabinet room, the president's private office and the offices of the clerical force are located. The president's office is a circular room in the south side of the office annex. It communicates by a passageway with the office of the private secretary, which is at the southwest corner of the building. The outlook from the president's room and from the cabinet room as well as from one end of the Secretary Tumulty's office to the great south grounds of the White House and on to the monument and beyond that to the Potomac river.

Tent Site Well Protected.
The change which President Taft made necessitated an encroachment on the grounds of the tennis court, where President Roosevelt and his tennis cabinet played games almost daily for the seven years in which the colonel was president. If the tennis court had not been built upon it would have made an ideal site for President Wilson's outdoor camp, for it would have been close to Secretary Tumulty's office and to the offices of the executive clerks. The old-fashioned garden, in which the president's tent is located, has a hedge of privet on two sides of it, a third side being enclosed by the east White House wing, while the fourth side is open to the great grounds of the house and beyond them to the river over what are known as the white lot, the monument grounds and the Potomac drive.

The old-fashioned garden was planned and planted by Mrs. Theodore Roosevelt, who found what she thought were too many botanical specimens in the White House grounds. In other words, too many unfamiliar flowers. So the old-fashioned garden was laid out and largely was planted by the president's wife's hands. There are lilacs, syringas, pansies, sweet-williams, bachelor's buttons, forget-me-nots, hollyhocks, peonies, fuchsias, nasturtiums and all the rest. President Wilson will have a fragrant old-fashioned environment.

Must Show Their Colors.
Prohibition and woman suffrage are today squarely before the house of representatives as questions to be voted upon. For years the friends of both causes have been attempting to secure record votes on the questions in house and senate and for years they have failed. Now it seems likely that the prohibition amendment will be voted on in the house before the adjournment of the present session. Suffrage possibly may have to wait.

For a long time suffragists and advocates of prohibition have been urging members of the house to see to it that both amendments were brought to a vote. The answers which the prohibitionists and the suffragists received were alike in virtually every instance. The proponents of the amendments were told that the judiciary committee had not acted and that nothing could be done unless that body made a report.

So it was that the members of the judiciary committee were made the targets and they resented what they said was the throwing on their shoulders by the other representatives of the blame for inaction. The committee resolved to let the house fight the matter out for itself, and it has reported both amendments, although no

recommendation was made for passage or for non-passage of the two proposals.

There is some humor in the situation in which the house finds itself today. There are plenty of members of congress who think that prohibition may be a good thing and suffrage who fear that if they vote for the amendment all the forces of the liquor interests in the United States will be used to compass their defeat. On the other hand they are afraid that if they vote against the amendment all the forces of prohibition and of the temperance cause generally will be used against them at the polls.

On the proposed suffrage amendment to confer authority on the representatives it is much like that in which they find themselves on the question of prohibition. Women vote in a good many states already, and woman has a tremendous influence in whatever state she lives. Representatives do not like the idea of having the suffrage influence against them and they do not like the idea of having their suffrage influence against them. They are in a peculiar position and it seems to some observers in Washington that they will do what all representatives ought to do, vote as they believe and let the consequences be what they may.

Recognition for Canal Work.
Congress apparently is prepared finally to take action on a bill which makes provision for the recognition of the services of the officers of the army and navy who held membership on the Isthmian canal commission and to whose hard and devoted service the completion of the waterway is due.

The proposed legislation will give the thanks of congress to the army and navy officers concerned and will give authority for their promotion. If the bill becomes a law George W. Goethals, chief engineer of the canal project, will be made a major general of the line, and Brig. Gen. William C. Gorgas, sanitary expert of the zone, will be made a major general in the medical department. Lieut. Col. William L. Sibert, the builder of the Gatun dam, locks and spillway and the creator of the Gatun lake, and Lieut. Col. H. F. Hodges, the designer of the operating machinery of the canal, will be made brigadier generals in the engineer corps. Commander H. H. Rousseau, the civil engineer of the navy, will be made a major general in the navy.

The proposed legislation will give the thanks of congress to the army and navy officers concerned and will give authority for their promotion. If the bill becomes a law George W. Goethals, chief engineer of the canal project, will be made a major general of the line, and Brig. Gen. William C. Gorgas, sanitary expert of the zone, will be made a major general in the medical department. Lieut. Col. William L. Sibert, the builder of the Gatun dam, locks and spillway and the creator of the Gatun lake, and Lieut. Col. H. F. Hodges, the designer of the operating machinery of the canal, will be made brigadier generals in the engineer corps. Commander H. H. Rousseau, the civil engineer of the navy, will be made a major general in the navy.

Thanks of Congress to All.
What doubtless will be more grateful to all these officers than promotion is the provision in the bill which gives to all of them the thanks of congress for their "distinguished service in constructing the Panama canal."

Care was taken in framing the bill to avoid interfering with the promotion of officers of the army and navy, either senior or junior in grade to the men whom it is proposed to advance. The bill provides for the promotion of Colonel Goethals and Brigadier General Gorgas to the rank of major general, the one of the line and the other in the medical department, but in order to accomplish this without interfering with the promotion of other men the existing number of major generals of the line and the number in the medical department are increased by one each. Thus it will be seen readily that this not only will not interfere with the promotions of men of junior grade, but actually will advance the junior officers of the engineer corps one grade, because of the vacancy caused by the promotion of Colonel Goethals, who is now an engineer officer.

In order that the promotion of Colonel Sibert and Hodges shall not interfere with the regular promotions of junior officers in the corps of engineers, two additional brigadier generalships are provided in the corps of engineers. The promotion of Sibert and Hodges to these ranks will thus not affect any other officer in the engineer corps, one file.

Extra Grade is Temporary.
William C. Gorgas, now the surgeon general of the army with the rank of brigadier general, has only a little more than four years to serve. When he retires the number of major generals in the corps of engineers will be increased by one. This extra grade which it is proposed to provide for him "shall cease and determine." A similar provision is made to fit the cases of the other officers of whose promotion the bill takes cognizance.

In the past when junior officers were promoted to general rank there was a good deal of criticism of the acts. Unquestionably the framers of the bill had this matter in mind when they gave consideration to promotion as a reward.

The services of Lieut. Col. David Du B. Galliard, the digger of the Culabra cut, who died as the result of his devotion to duty, were recognized by congress. Colonel Galliard was dead when congress took action, but his high services to his country were recognized in a manner as deserving to that in which the thanks of congress are given to a living man.

SEEKS TO FOSTER THRIFT

National Society Formed to Promote Economy Among All Classes of the People.

"When I was a kid there was such a tragedy in my life that every day I used to sit on the bank of a stream at noon and cry. The tragedy was that my shoes had so many holes in them I couldn't join the other boys in using shoes for boats on the stream. Theirs floated. Mine wouldn't."

Representative James Francis Burke, member of congress from Pennsylvania, who has come out with a strong endorsement of the work of the American Society for Thrift, was the speaker among all classes.

Representative Burke's success has been the result of his industry, his habits of thrift and his appreciation of the value of money. Although still a young man, he is one of the most influential members of the house, and is wealthy. Also, he has a big law practice in Pittsburgh.

FOR HANDY BOYS AND GIRLS TO MAKE AND DO

CORK TOYS FOR THE BATHTUB.

A POSTCARD COLORSCOPE.

By A. NEELY HALL.

Ducks, swans, turtles and boats of different patterns for floating in the bathtub, furnish fun by the hour, and they are toys which are easily made.

For the duck (Fig. 1) get a medium-sized tapered cork, and split it in half from end to end, using a sharp knife

with which to do the cutting (Fig. 2). Draw a head and neck upon a piece of cardboard, using Fig. 1 as a pattern to copy from, and cut a slit in the round face of one of the halves of the cork, as indicated by dotted lines in Fig. 1, for the lower edge of the cardboard neck to fit into.

The turtle (Fig. 3) is built upon a pickle-bottle cork. The head is a piece of cardboard, with eyes marked upon it in ink, and the feet are four other pieces of cardboard. Fasten the head and feet to the upper face of the cork, near the edge, with a couple

of pins or long carpet-tacks (Fig. 4). The tail is a short piece of twine fastened to the cork with a tack directly opposite the head. Make the shell out of a piece of stiff paper, folding it into the shape shown in Fig. 5, and lapping the ends to make them round. Fasten this paper shell to the edge of the cork base with pins or long carpet-tacks, as shown in Fig. 3.

The little raft (Fig. 6) is made of two halves of a soft cork, fastened side by side by means of pins. This raft is easily converted into a sailboat by tacking a piece of cardboard cut bow-shaped on one end, to the top of the corks, sticking a short stick through a hole in the cardboard for a mast, and running a small square of paper on to the stick for a sail (Fig. 7).

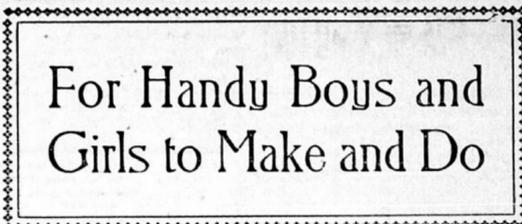

The houseboat shown in Fig. 8 is built upon a cardboard platform mounted upon four corks, one at each corner. Any medium-sized corks will do, and you may make the platform of any size that you wish. Fasten the

platform to the corks with long carpet-tacks or pins.

The little house is made of stiff writing-paper, cut to the pattern shown in Fig. 9. This pattern shows but one-half of the house, and must be marked out twice. The dimensions of the house may be whatever you wish to make them, the only important thing to look out for being to make the walls short enough so there will be space on the platform around the house for a walk. Cut along the solid lines, and fold along the dotted lines. The portion D on the end piece is a doorway, and is cut along one side and top, and folded along the third edge, for a door. The portions marked W are window openings

cut to pass through each of the three pieces of colored tissue paper. The light passing through the yellow tissue paper will produce a sunlight effect, that passing through the red will produce a sunset effect and that passing through the green an effect of moonlight.

Among other rights some men give up when they get married is the right to think for themselves.
