

Good Foundations Are Necessary For Good Products

But good foundations only will insure a good product. Just because one has the best ingredients of ice cream does not insure the best product.

Canton Creamery Co. Ice Cream

has its present reputation. Established in a vicinity with access to the purest ice cream ingredients wasn't enough to satisfy them, but these and the services of an ice cream maker who has made a scientific study of this particular line and one who understands

THE MIX

was necessary before they felt free in offering their ice cream as one of the purest and best.

An Inopportune Movement.

An expression of the peculiar state of mind into which certain ordinarily well balanced persons have allowed themselves to be worked by the current unpleasantness in Europe is

found in a movement which has been launched in New York for a general American observance of La Fayette's birthday on September 6.

Myron T. Herrick is chairman of a committee which has issued a statement urging that the American people do honor to the memory of a man through whose efforts "the sympathy of France for the cause of freedom was given effective expression" in the struggle for American independence, and the call is signed also by Charles W. Elliot, Morefield Story, Joseph H. Choate, Theodore Roosevelt, George W. Wickesham, George Haven Putnam, William D. Guthrie, Henry Waterson, Charles J. Bonaparte, Caspar S. Goodrich, W. R. Hodges, Chas. G. Johnson and Judson Harmon.

No American who has read the history of the war of the revolution and who knows of the loyalty of Lafayette to Washington and of the deep regard in which Washington held the young Frenchman questions the debt in which the United States is beholden to Lafayette. Is it not remarkable, however, that just now the American people are being awakened to their duty to give utterance to their esteem for Lafayette in a national celebration—in 1915 A. D.—when France is at war with Germany and President Wilson is using every energy to keep the United States and its people from taking sides one way or the other?

In the light of the none too friendly feeling which has been manifested by some of the signers of the call towards the imperial government of Germany, one might be pardoned for

suspecting that at least certain members of the committee are less interested in honoring Gen. Lafayette than in taking a few pokes at Emperor Wilhelm.

What better reason is there for celebrating the birthday of Lafayette at just this time than there would be for celebrating the birthday of Carl Schurz? To be sure, Lafayette rendered Washington valuable assistance in establishing the republic. By the same token, Schurz gave Lincoln valuable support in saving it. Lafayette was born in France. Schurz was born in Germany.

One can easily guess what Washington himself would think of such a movement at such a time. During the war between France and Great Britain a few years after our own revolutionary war the land was filled with huzzas for France and imprecations for Great Britain, and many citizens demanded that the United States line up with France but Washington was firm—so firm that he insisted upon the summary recall of Genet, France's bussybody ambassador for his activities in stirring up sentiment for France and against Great Britain.

If Mr. Herrick and his committee are bent on having a national celebration in honor of Lafayette, let them postpone the event until things have settled down a bit—when President Wilson and the rest of us can take part in it and make it such a celebration as might belfit the memory of a man like Lafayette.—Sioux City Journal.
