

The Romance of Elaine Sequel to The Exploits of Elaine

A Detective Novel and a Motion Picture Drama By ARTHUR B. REEVE

SYNOPSIS.

The morning after the finding of Wu Pan's body and Kennedy's disappearance, Marcus Del Mar appears from a submarine. Elaine is warned by a little old man to be careful of Del Mar, who gets the torpedo, only to have it destroyed by the little old man, Jameson.

ward, Arnold and the soldiers gathered, waiting for the telescope. Already Woodward had had a fast launch brought up, ready for use.

THIRTY-SIXTH EPISODE

THE KENNEDY WIRELESS TORPEDO.

Half carrying, half forcing Elaine down into the water, Del Mar and his two men, all four of the party clad in the outstanding submarine suits, bore the poor girl literally along the bottom of the bay until they reached a point which they knew to be directly under the entrance to the secret submarine harbor.

Del Mar's mind was working feverishly. Though he now had in his power the girl he both loved and also feared as the stumbling block in the execution of his nefarious plans against America, he realized that in getting her he had been forced to betray the precious secret of the harbor itself.

At the point where he knew that the harbor was above him, hidden safely beneath the promontory, he took from under his arm a float which he released. Upward it shot through the water.

Above in the harbor, a number of his men were either on guard or lounging about. "A signal from the chief," cried a sentry, pointing to the float as it bobbed up.

"Kick off the lead shoes," signaled Del Mar to the others, under the water. They did so and rose slowly to the surface, carrying Elaine up with them.

The men at the surface were waiting for them and helped to pull Del Mar and his companions out of the water. "Come into the office, right away," beckoned Del Mar anxiously, removing his helmet and leading the way.

In the office, the others removed their helmets, while Del Mar took the headgear off Elaine. She stared about her bewildered.

"Where am I?" she demanded. "A woman!" exclaimed the men in the harbor in surprise.

"Never mind where you are," growled Del Mar, plainly worried. Then to the men, he added, "We can't stay any longer. The harbor is discovered. Get ready to leave immediately."

Immediately there was a general scramble to make ready for the escape. In the corner of the office, Elaine, again in her skirt and shirtwaist which the diving suit had protected, sat open-eyed watching the preparations of the men for the hasty departure.

Some had been detailed to get the rifles which they handed around to those as yet unarmed. Del Mar took one as well as a cartridge belt. "Guard her," he shouted to one man indicating Elaine, "and if she gets away this time, I'll shoot you."

Then he led the others down the ledge until he came to a submarine boat. The rest followed, still making preparations for a hasty flight.

Woodward along with Professor Arnold, in his disguise as a hermit, stood for a moment surrounded by the soldiers, after the disappearance of Elaine and Del Mar in the water.

"I see it all, now," cried the hermit, "the submarine, the strange disappearances, the messages in the water. They have a secret harbor under these cliffs, with an entrance beneath the water line."

Handily he wrote a note on a piece of paper. "Send one of your men to my headquarters with that," he said, handing it to Woodward to read.

Send new submarine telescope by bearer. You will find it in case No. 17, closet No. 3, Arnold.

On a wharf along the shore Woodward, "buttermilk." I laughed, but in all seriousness he went on to enlarge on the merits of this homely fare in a manner that aroused my interest in what had been to me an unthought-of matter until then, and if by this letter I can interest your readers in anything like the same way I shall be greatly pleased, and will have my reward in the knowledge and assurance that the health and happiness of the community have been benefited thereby.

THE KENNEDY WIRELESS TORPEDO.

He unwrapped it and joined the various sections together. It was, as I have said, a submarine telescope, but after a design entirely new, differing from the ordinary submarine telescope. It had an arm bent at right angles, with prismatic mirrors so that it was not only possible to see the bottom of the sea, but by an adjustment also to see at right angles, or, as it were, around a corner.

It was while he was joining this contrivance together that I came up from the end of the secret passage down to the wharf.

"Why, here's Jameson," greeted Woodward. "I'm glad you're so much better."

"Where's Elaine?" I interrupted breathlessly. They began to tell me. "Aren't you going to follow?" I cried.

"Follow? How can we follow?" Excitedly I told of my discovery of the helmets.

"Just the thing!" exclaimed the hermit. "Send someone back to get them."

It was only a few minutes later that, in Del Mar's own car, I drove up to the wharf again and we unloaded the curious submarine helmets and suits.

Quickly Woodward posted several of his men to act as sentries on the beach, then with the rest we climbed into the launch and slipped off down the shore.

The launch which Woodward had commandeered, moving along in the general direction which they had seen Del Mar and his men take with Elaine. With the telescope over the side, we cruised about slowly in a circle, Arnold gazing through the eye-piece. All of us were by this time in the diving suits which I had brought from Del Mar, except that we had not yet strapped on the helmets.

Suddenly Arnold raised his hand and signaled to stop the launch. "Look!" he cried, indicating the eye-piece of the submarine telescope which he had let down over the side.

Woodward gazed into the eye-piece and then I did, also. There we could see the side of a submerged submarine a short distance away, through the cave-like entrance of what appeared to be a great underwater harbor.

"What shall we do?" queried Woodward. "Attack it now before they are prepared," replied the hermit decisively. "Put on the helmets."

As soon as we had finished, one after another we let ourselves over the side of the boat and sank to the bottom.

On the bottom we gathered and slowly, in the heavy unaccustomed element and cumbersome suits, we made our way in a body through the entrance of the harbor.

Upward through the archway we went, clinging to rocks, anything, but always upward.

As we emerged a shot rang out. One of our men threw up his arms and fell back into the water.

On we pressed. Elaine sat in a corner of the office, mute, while the man who was guarding her, heavily armed, paced up and down.

Suddenly an overwhelming desire came over her to attempt an escape. But no sooner had she made a motion as though to run through the door, than the man seized her and drove her back to her corner.

"Take your positions here," ordered Del Mar to several of the men. "If you see anybody come up through the hole, these hand grenades ought to settle them."

Along the ledge the men were stationed, each with a pile of the grenades before him.

"See!" cried one of them from the ledge as he caught sight of one of our helmets appear, hit, but, in turn, a large number managed to gain a foothold on the ledge.

They fired sharply at the figures that rose from the water. Many of the men fell back, hit, but, in turn, a large number managed to gain a foothold on the ledge.

Led by Arnold and Woodward, they formed quickly and stripped off the waterproof coverings of their weapons, returning the fire sharply. Things were more equal now. Several of Del Mar's men had fallen. The smoke of battle filled the narrow harbor.

In the office Elaine listened keenly to the shots. "What did it all mean? Clearly it could be nothing less than assistance coming."

The man on guard heard also and his uncontrollable curiosity took him to the door. As he gazed out Elaine saw her chance. She made a rush at him and seized him, wresting the rifle from his hands before he knew it.

She sprang back just as he drew his revolver and fired at her. The shot just narrowly missed her, but she did not lose her presence of mind. She fired the rifle in turn and the man fell.

A little shudder ran over her. She had killed a man! But the firing outside grew fiercer. She had no time to think. She stepped over the body, her face averted, and ran out. There she could see Del Mar and his men.

"We can't beat them; they are too many for us," muttered Del Mar. "We'll have to get away if we can. Into the submarine!" he ordered.

Hastily they began to pile into the open hatch. Just as Del Mar started to follow them, he caught sight of Elaine running out of the office. Almost in one leap he was at her side. Before she could raise her rifle and fire he had seized it. She managed, however,

to push him off and get away from him. She looked about for some weapon. There on the ledge lay one of the hand grenades. She picked it up and hurled it at him, but he dodged and it missed him. On it flew, landing close to the submarine. As it exploded, another of Del Mar's men toppled over into the water.

Between volleys, Woodward, Arnold and the rest pulled off their helmets. "Elaine!" cried Arnold, catching sight of her in the hands of Del Mar.

Quickly, at the head of such men as he could muster, the hermit led a charge. In the submarine the last man was waiting for Del Mar. As the hermit ran forward with several soldiers between Del Mar and the submarine, it was evident that Del Mar would be cut off.

The man at the hatch climbed down into the boat. It was useless to wait. Slowly the submarine began to sink.

Del Mar by this time had overcome Elaine and started to run toward the submarine with her. But then he stopped short.

There was a queer figure of a hermit leading some soldiers. He was cut off.

"Back into the office!" he growled, dragging Elaine. He banged shut the door just as the hermit and the soldiers made a rush at him. On the door they battered. But it was in vain. The door was locked.

In the office Del Mar hastily went to a corner after barring the door, and lifted a trap door in the floor, known only to himself.

Elaine did not move or make any attempt to escape, for Del Mar in addition to having a vicious looking automatic in his hand kept a watchful eye on her.

Outside the office, the soldiers, led by the hermit and Woodward, continued to batter at the door.

"Now—go down that stairway—ahead of me," ordered Del Mar. Elaine obeyed tensely, and he followed into his emergency exit, closing the trap.

"Beat harder, men," urged the hermit, as the soldiers battered at the door.

They redoubled their efforts and the door bent and swayed.

At last it fell in under the sheer weight of the blows.

"By George—he's gone—with Elaine," cried the hermit, looking at the empty office.

"Found the floor and walls with the butts of your guns," ordered Arnold. "There must be some place that is hollow."

Meanwhile, through the passage, along a rocky stairway, Del Mar continued to drive Elaine before him, up and ever up to the level of the land.

At last Elaine, followed by Del Mar, emerged from the rocky passage in a cleft in the cliffs, far above the promontory.

"Go on!" he ordered, forcing her to go ahead of him.

They came finally to a small hut on a cliff overlooking the real harbor. "Enter!" commanded Del Mar. Still meekly, she obeyed.

Del Mar seized her, and before she knew it he had her bound and gagged.

Down in the little office our men continued to search for the secret exit.

"Here's a place that gives an echo," shouted one of them.

As he found the secret trap and threw it open, the hermit stripped off the cumbersome diving suit and jumped in, followed by Woodward, myself and the soldiers.

Upward we climbed until at last we came to the opening. There we paused and looked about. Where was Del Mar? Where was Elaine? We could see no trace of them.

Finally, however, Arnold discovered the trail in the grass and we followed him slowly picking up the tracks.

Knowing that the submarine would cruise about and wait for him, Del Mar decided to leave Elaine in the hut while he went out and searched for a boat in which to look for the submarine.

Coming out of the hut, he gazed about and moved off cautiously. Steadily he went down to the shore and there looked up and down intently.

A short distance away from him was a pier in the process of construction.

There only a few yards away was the periscope of a submarine. As we watched, we could see that it had seen him, had turned in his direction. Would they get him?

We watched, fascinated. Some of our men fired, as accurately as they could at a figure bobbing so uncertainly on the water.

Meanwhile the submarine approached closer and rose a bit so that the hatchway cleared the waves. It opened. One of the foreign agents assisted Del Mar in.

He had escaped at last!

It was most heart-breaking to have had Del Mar so nearly in our grasp and then to have lost him. We looked from one to another, in despair.

Only Arnold, in his disguise as a hermit, seemed undiscouraged. Suddenly he turned to Woodward.

"What time is it?" he asked eagerly. "A little past noon."

"The Kennedy wireless torpedo!" he exclaimed. "It arrived today. Burnside is trying it out."

Suddenly there flashed over me the recollection of the marvelous invention that Kennedy had made for the government just before his disappearance, as well as the memory of the experiences I had had once with the intrepid Burnside.

Woodward's face showed a ray of interest and hope in the overwhelming gloom that had settled on us all.

"You and Jameson go to Fort Dale, quick," directed Arnold eagerly. "I'm not fit. Get Burnside. Have him bring the torpedo in the air boat."

We needed no further urging. It was a slender chance. But I reflected that the submarine could not run through the bay totally submerged. It must have its periscope in view. We hurried away, leaving Arnold, who slowly mounted the hill again.

How we did it, I don't know, but we managed to get to the fort in record time. There, near the aeroplane hangar, sure enough, was Burnside with some other men adjusting the first real wireless Kennedy torpedo, the last word in scientific warfare, naming an aerial torpedo boat.

We ran to the hangar calling to Burnside excitedly. It was only a moment later that he began to issue orders in his sharp staccato. His men swarmed forward and took the torpedo from the spot where they had been examining it, adjusting it now beneath the hydro-aeroplane.

"Jameson, you come with me?" he asked. "You went before."

We rose quickly from the surface and planned along out over the harbor. Far off we could see the ripple from the periscope of the submarine that was bearing Del Mar away. Would Kennedy's invention, for which Del Mar had dared so much in the first place, prove his final undoing? We sped ahead.

Down below in the submersible Del Mar was giving hasty orders to his men, to dip down as soon as all the

As we caught sight of him, Arnold sprang forward. Woodward and I, followed by the soldiers also jumped out.

Del Mar turned and ran down the hill again with us after him, full cry. While we had been waiting, some of the soldiers had deployed down the hill and now hearing our shouts, turned, and came up again.

Beside his engine, we could see an engineer chopping wood. He paused now in his chopping and was gazing out over the bay. Suddenly he had seen something out in the water that had attracted his attention and was staring at it. There it moved, nothing less than a half-submerged submarine.

As the engineer gazed off at it, Del Mar came up, unseen, behind him and stood there, also watching the submarine, fascinated.

Just then behind him Del Mar heard us pursuing. He looked about as we ran toward him and saw that we had formed a wide circle, with the men down the hill, that almost completely surrounded him. There was no chance for escape. It was hopeless.

But it was not Del Mar's nature to give up. He gave one last glance about. There was the trolley car that had been converted into a cable way. It offered just one chance in a thousand. Suddenly his face assumed an air of desperate determination.

He sprang toward the engineer and grappled with him, seeking to wrest the ax from his hand. Every second counted. Our circle was now narrowing down and closing in on him.

Del Mar managed to knock out the engineer, taken by surprise, just as our men fired a volley. In the struggle, Del Mar was unharmed. Instead he just managed to get the ax.

An instant later a leap landed him on the cable car. With a blow of the ax he cut the cable. The car began to move slowly down the hill on the grade.

Some of the men were down below in its path. But the onrushing cable car was too much for them. They could only leap aside to save themselves.

On down the incline, gathering momentum every second, the car dashed, Del Mar swaying crazily but keeping his footing. We followed as fast as we could, but it was useless.

Out on the wharf it sped at a terrific pace. At the end it literally catapulted itself into the water, crashing from the end of the pier. As it did so, Del Mar gave a flying leap out into the harbor struck the water with a clean dive and disappeared.

On down the hill he hurried. There in the water was Del Mar swimming rapidly. Almost before he knew it, we saw him raise his hand and signal, shouting.

There only a few yards away was the periscope of a submarine. As we watched, we could see that it had seen him, had turned in his direction. Would they get him?

We watched, fascinated. Some of our men fired, as accurately as they could at a figure bobbing so uncertainly on the water.

shipping and the sand bars were cleared.

I strained my eyes through the glasses reporting feverishly to Burnside what I saw so that he could steer his course.

"There it is," I urged. "Keep on—just to the left."

"I see it," returned Burnside a moment later catching with his naked eye the thin line of foam on the water left by the periscope. "Would you mind getting that torpedo ready?" he continued. "I'll tell you just what to do. They'll try to duck as soon as they see us, but it won't be any use."

As the engineer gazed off at it, Del Mar came up, unseen, behind him and stood there, also watching the submarine, fascinated.

Just then behind him Del Mar heard us pursuing. He looked about as we ran toward him and saw that we had formed a wide circle, with the men down the hill, that almost completely surrounded him. There was no chance for escape. It was hopeless.

VOICE DISTURBED THE VICAR

But the Congregation in an English Church Stopped to Hear the Extreme High Notes.

Strange behavior in the parish church of St. Mary, Walton-on-Thames, was described recently at a police court, the London Chronicle states. James Wells was summoned for behaving in a reckless and violent manner, during church services on three dates in November. He did not appear.

H. Grey, for the church wardens, said Wells bawled all the responses out of time with other worshippers. Once the vicar had to leave off reciting the creed, because the defendant shouting drowned his voice. He refused to sit at the back of the church.

Arthur Higgins, the vergier, said that during service on Sunday, November 28, Wells jumped about in the gallery, "just as if he were trying to catch a cricket ball." He sang the hymns and psalms at the top of his voice, always behind the rest of the congregation. People stopped singing to listen to him.

When the hymn, "Peace, Perfect Peace," was being sung, his voice could be heard above every other voice. Another hymn was "In Time of Trouble," which the vicar requested should be sung softly, the congregation kneeling. The defendant took no notice of this and sang as loudly as ever. The summons was adjourned.

Searched Long for Mute Bride. At a wedding celebrated at Peterborough, England, a few days ago the bride, bridegroom, best man, and bridesmaid were all deaf and dumb. The history of the courtship provides romantic reading. The bridegroom was formerly a motor bodymaker at Peterborough, and while living there was informed about a young lady living in the city who was also deaf and dumb. For a long time he kept a careful watch in the streets for people using the dumb alphabet, hoping to discover the lady. The would-be wooer was disappointed for a considerable time owing to the fact that the lady in question never used the alphabet, but lip formation of words. At length he discovered her residence, and proposing, was accepted.

Improvements in Hawaii. The territory of Hawaii now has in hand reclamation works that will cost about \$300,000, with several other projects in contemplation. At Honolulu a strip of land half a mile wide, starting near the wharves and extending for about three miles along the shore, is being put in sanitary condition. Another project well under way, known as the Waialoa reclamation project, will improve the water front of Hilo, on the Island of Hawaii.

Why Not? "Pa," said the six-year-old, "what is a prince?" "A prince," said his father, "is a king's little boy. Now, if I were a king you would be a prince."

The youngster thought it over for a moment and said, "Why don't you be one?" he asked.

Impersonal. "An optimistic man is a person who doesn't care what happens if it doesn't happen to him."—Puck.

Estelle Stead, and asked as to the duration of the war has answered with the usual ambiguity for which spirits have become somewhat noted. Miss Stead in a lecture to the Spiritualist Society of Cardiff, Wales, said she had been in touch with the spirit of her father practically since the war began and that it had been a wonderful comfort to her to be able to talk with him.

She had asked him, she said, about the duration of the war but he could not say. He did say, however, that it was difficult to gauge time
