Washington Street, HURLEY, - DAKOTA.

Turner County Herald.
Published Every Thursday.
HURLEY, DAKOTA, AUG. 30, 1888.

President Arthur seems to be in the lead for the next presidential race.

Bismarck has paid over to the capital commission the \$100,000 pledged by that city, and Burleigh county has been bonded to reimburse the parties advancing the cash.

The city of Yankton has contracted for a system of water works, which will be completed this year. The water will be supplied from the large artesian well in the western part of the town.

The Dakota City (Hutchinson county) Advocate is one of the latest additions to southern Dakota's list of newspapers. Mr. Graham exhibits his knowledge of the "biz" in the make-up and general appearance of the paper.

Mr. Charles W. Thompson, of Bismarck, has been awarded the contract for building the main part of the capitol at that place, his bid being \$97,000. Five hundred men will be at work night and day, and until electric light can be provided the work will progress with the aid of torches.

DAKOTA GRAIN COMMISSION.
It Formulates Rules for the Grading of Wheat, Corn, Oats, Rye and Barley.

At a meeting of the board of grain inspectors for Dakota, held on the second day of August, 1888, the following rules governing the inspection of grain in the territory of Dakota for the year ending August 1st, 1889, were adopted:

SPRING WHEAT.
No. 1 Hard Spring Wheat—Shall be composed mostly of the hard varieties of spring wheat, which must be sound, well cleaned, and weigh not less than 58 pounds to the measured bushel.
No. 2 Spring Wheat—Must be sound, well cleaned, weighing not less than 58 pounds to the measured bushel.
No. 3 Hard Spring Wheat—Must be sound and reasonably clean, composed mostly of the hard varieties of spring wheat, and weigh not less than 56 pounds to the measured bushel.
No. 4 Spring Wheat—Must be sound and reasonably clean, and weigh not less than 56 pounds to the measured bushel.
No. 5 Spring Wheat—Shall comprise all wheat fit for warehousing, not good enough for No. 2, weighing not less than 54 pounds to the measured bushel.
Rejected Spring Wheat—Shall comprise all wheat fit for warehousing, but too low in weight or otherwise unfit for No. 2.

WHEAT.
All wheat that is in a heating condition, or too damp to be considered safe for warehousing, or that has any considerable admixture of foreign grain or seeds, or is badly burned, or whatever grade it might otherwise be, is pronounced "condemned."

RICE.
Wheat—Will in no case be inspected higher than No. 1.
Wheat containing any mixture, however light of rice wheat (sometimes termed "goose wheat" or "California") is liable to grade as rejected, however high it might otherwise grade.

CORN.
No. 1—To be sound, plump and well cleaned white and yellow.
No. 2—To be dry, reasonably clean, but not plump enough for No. 1.
Rejected—All damp, dirty and otherwise badly damaged.

WHITE CORN.
To be white, and in all other respects same as No. 1 corn.
Yellow Corn—To be yellow, and in all other respects same as No. 1 corn.
High mixed corn shall be three-quarters yellow, and equal to No. 2 in condition and quality.

OATS.
No. 1 White Oats—Shall be white, clean and bright, and weigh not less than 32 pounds to the measured bushel.
No. 2 White Oats—Must be nearly white, reasonably clean, and weigh not less than 29 pounds to the measured bushel.
No. 3 White Oats—Shall be mainly white, and not equal to No. 2 white in other respects.
No. 4 Mixed Oats—Shall include light and dark mixed, reasonably clean, reasonably free from other grains, and weigh not less than 29 pounds to the measured bushel.
No. 5 Oats—All merchantable oats unfit for No. 2 shall be graded No. 5.
Rejected—All damp, unclean, dirty, or from any other cause, unfit for No. 5.

RYE.
No. 1—To be sound, plump and well cleaned.
No. 2—To be sound, reasonably clean and free from other grain.
Rejected—All damp, musty, dirty or otherwise unfit for No. 2.

BARLEY.
No. 1—To be plump, bright, sound, clean and free from other grain.
No. 2 Barley—Shall be sound, reasonably plump, reasonably clean, and free from other grain, good malting barley, but may be slightly stained, testing not less than 47 pounds to the measured bushel.
No. 3 Barley—Shall include shrunken, discolored, but reasonably sound barley, and fit for malting purposes, weighing not less than 43 pounds to the measured bushel.
Rejected Barley—Shall include all damp, musty, damaged, or for any cause unfit for malting purposes, or largely mixed with other grain.

"Temperance Axioms" From a Prohibition View.

In looking over a Turner County Herald the other day my eye chanced to light upon the column appropriated by C. H. Goddard's "Temperance Axioms."

He starts out with the assumption that the appetite for intoxicating drinks is a natural and inherent appetite; which were better proved than assumed. That "unslain" and "unsubdued" appetite, of which he speaks so eloquently, is simply an appetite created by alcohol, and soon dies out when no longer nursed by its parent. It is with this as with many other things, supply creates the demand. There are communities all over our land where the sale of liquors for drink purposes is unknown, and tens of thousands of homes where they are not used in any form; and the people in these communities and in these homes are not wretched on account of the gnawing of an unslain appetite for strong drink. They do not go roaming and raving about, overturning planters, in hopes of finding a whisky hole underneath. On the contrary, they go quietly and contentedly to their beds at night, and cheerfully to their labor or business in the morning, having no commerce with, nor thought of, the mocking "demon of darkness."

I would like to put Mr. G. upon the witness stand, and have him tell us whether he has been indowed by his Creator with such an appetite for strong drink that he would lie down at the mouth of a whisky cave and let his
