A letter from Iowa. Cedar Falls, Ia., July 30, 1900.

Having been attending the Waterloo Chautauqua for about two weeks, I thought it might be of some interest to some of the readers of the Herald to know just a little of what I heard and saw each day hearing instructive and interesting programs from prominent lecturers, also a very interesting program given by a missionary to Africa.

To those who have not seen it, this liquid air looks very much like water, with a vapor looking like steam constantly escaping from it, when exposed to the warm air.

Liquid air has power the same as water power or electricity. To show this he put some liquid air in a small tank with a tube attached to it, turning the end of the tube towards a wheel which was suspended in the air.

John Mitchell finished up his harvesting last week by having his team run away with the binder, slightly demoralizing the same. If you are a candidate for a county office let the people know it by publishing an announcement in the columns of the Herald.

Henry Schwalter purchased another quarter section of land (through the Turner County Land Agency) during the past week. Special services will commence in the M. E. Church next Sunday.

C. J. Bach went to Parker Wednesday to assist in taking inventory of the Clark hardware stock, the same having been purchased by F. K. Berry.

George Brazzel had the misfortune to run a cylinder tooth through his left hand while removing the concaves from J. A. Layne's thresher last Saturday.

On account of sickness, Dr. Jennings, dentist, was unable to meet his engagement this week. He sends word that he will be in Hurley, Monday, August 13.

A 2-bushel sack of oats brought in from J. A. Layne's machine Tuesday, threshed from grain raised on the farm which he occupies, weighed ninety pounds. Good oats, those.

The Hurley market now carries a nice line of cooked canned meats. They are all right, and save building a fire in the kitchen stove these hot days. Don't fail to try the veal loaf.

The sub District Twentieth Century Forward Movement Club begin their campaign next Sunday. Rev. G. T. Notson of Centerville will be present and preach at the M. E. Church.

A number from this locality are intending to take in the excursion to Duluth over the Great Northern next week Friday. The fare is only \$5 for the round trip, and the excursion is sure to be a pleasant one.

The laws of health require that the bowels move each day and one of the penalties for violating this law is piles. Keep your bowels regular by taking a dose of Chamberlain's Stomach and Liver Tablets when necessary and you will never have that severe punishment afflicted upon you. Price 25 cents. For Sale by E. Brauch's drug store.

Salem Special: There is a well developed rumor in railroad circles that the C. & N. W. R'y has about completed negotiations for the N. P. pranch between Oaks and Jamestown, N. D. When this deal goes through the northern division will extend from Jamestown to Salem and the southern division from Salem Eagle Grove, Iowa. There is every indication that this rumor is true; the people of this city most sincerely hope it is.

Last Saturday evening, Mr. Freverda, who lives on the Rayburn farm, northwest of town, made a short turn at the corner near C. M. Allen's store while his horses were traveling at a pretty rapid gate. When the wheel struck the crosswalk the vehicle, a platform wagon, was thrown into the air and came down wrong side up, throwing himself and two lady occupants violently to the ground. Fortunately no damage was done except to the wagon, which will benefit the wagon-maker and blacksmith, while the driver will be benefited by his experience.

Some of our business men say they do not believe in advertising and that the people do not read the papers. But let one of them get caught kissing the hired girl, or chasing a piece of calico up the alley after dark, or loading too heavy on a firewater, and if the printoffice is in the garret of a twenty story building, they will find the editor and beg him to keep quiet about it. Or if he prints it they soon learn that every man, woman and child in the country has read it and he goes gunning for the editor. Yes the, people all read a live paper and you had better have an ad there.—Ex.

MRS. M. A. ROBINSON.

Nixon Waterman: Life was a joy when I was a boy, in the days of long ago, when eye and ear could see and hear the things that was good to know. But the kind old earth, once glad with mirth, and pictures bright and grand seems stale and tame since I became too big to follow the band. Yet I dare say earth holds today about as much or more of joy and cheer, right now and here, than it ever held before. But by our pride we'll now deride good gifts on every hand; we've grown too proud to follow the crowd—too big to follow the band. I'd like to stray in a careless way through the broad green fields of youth; I'd wander back along life's track to helpful springs of youth. I'd like to trade my woes self-made, and the cares that come to men, for the keen delight of a boy's glad right to follow the band again.

What the people who complain of if the reporter writes of them would only consider what he does not write about them, says a bright newspaper man, they would enshrine him in the dearest corner of their hearts. The waste baskets of the newspaper in any town do more to keep its citizens in good repute than any other agency except the fear of the law and the hereafter. Not all a reporter writes is true. He is not infallible himself, and of those who are the source of his information many are less so. There are very many men who cannot tell a straight story. The man who tells the story to the reported is usually an interested party. He has a purpose to serve in metamorphosing this or suppressing that. The reporter has no desire except to get the truth accurately and completely, and to write it quickly and entertainingly.

G. W. Blekkink of Monroe was arrested by Deputy Marshal Ludlow charged with unlocking the door and entering the postoffice at Monroe and taking his mail therefrom.

This heated term is all right for the corn, but it is a little severe on fleshy people.

Before you decide what school to attend, investigate the methods of the Mankato Commercial College, Mankato, Minn. Write for information.

It is probable that S. D. White will be manager for the Farmers' Elevator Co. Sam's extensive experience in that line with J. H. Farnsworth makes him an excellent man for the place.

The Sioux Falls Press of the 13th contains a lengthy editorial headed "The Same Bryan." You bet. Same old ticket, same old boss, same old platform (minus cross); same old powder, same old gun, same old waddin' (steen-to-one); same old kickers, same old growl, same old anti-Hanna howl, same old issues—nothing new—same old lies to help them through; same old talkers, same old josh, same old brand of campaign slosh; same old voters (bless their souls) same old trouncing at the polls.—White Lake Wave.

Girls of marriageable age do not like to tell how old they are, but you can find out by following the subjoined instructions, the young lady doing the figuring; tell her to put down the number of the month in which she was born; then to multiply it by 2; then add 5; then multiply it by 50; then to add her age; then to subtract 365; then to add 115; then tell her to tell you the amount she has left. The two figures to the right will donate her age and the remainder the month of her birth. For example, the amount is 852; she is 22 years old and was born in the 8th month (August.) Try it.—Ex.

A writer in an exchange says that the Great Wall of China is as enduring as the Egyptian pyramids. Twenty-one centuries have had scarcely an effect on it. Equipped with modern artillery and manned by soldiers armed and drilled in the modern manner, it would be as impregnable as on the day when it was finished. It has been calculated that the Chinese wall contains more brick and stone than would be needed to build a wall three feet thick and eight feet high around the earth at the equator. The wonderful fortification was constructed to protect the northern and northwestern frontier against the barbarians of Mongolia and Manchuria. Several millions of men were employed for ten years in doing this work, which was completed about 200 years before the Christian era. The wall is about 1,300 miles long.

A Good Word for Mr. Taylor.

Huron Huronite: W. W. Taylor, defaulting treasurer of South Dakota, has gone to Cape Nome to retrieve his fallen fortunes. Should Walt Taylor ever attain his previous financial worth, his state, which so honored him, would be made whole. Walt Taylor was condemned as a thief, but there is no theft in his make-up. A man may get into a whirlpool and go down; he does not become a part of the whirlpool, but he suffers just the same. Taylor was caught in a panic and his downfall was sudden and terrible, but his heart was clean, even though his head and hands were soiled.
