The best mode for killing poultry, as \$75 for the season, keeping an accurate it causes instant death without pain or account of the labor. If these figures disfigurement, is to suspend the birds are correct there would be a great saving if the system of soiling was adopted. Where land is worth \$60 to \$100 per acre the saving by soiling is no small pointed and narrow-bladed knife, make item, and we do not hesitate to ex- an incision at the back of the roof, practical test under our own care and cause immediate death. observation, which alone would make the matter a certainty, that the aband-feathers all off, neat and clean while onment of the old system of fencing warm, without breaking the skin; then and pasturing, and the adoption of plunge it into a kettle of very hot soiling all stock, would be the most certain means within reach of farmers enough for the bird to "plump," then to improve the business and improve it hang it up, turkeys and chickens by the greatly. The cost of fences is a burden lightly borne; the value of land is an important item not rightly considered. We infer this is true from the fact that we quite often see a few animals put into a pasture of ten to twenty acres—soiling and trampling down the whole—when one half the number of acres would have supported

Young men who are just starting in farming, should look these things over a hen's egg, one teaspoonful of cream and make some close calculations, so of tartar, one-half teaspoonful of soda, that they may adopt at first the right two-thirds of a cup of raisins, if you course. When a man gets into a certain routine of farming, or of doing any other kind of business it is hard to get him to see that any other way is better. In order to keep stock on the soiling plan a farmer needs feeding and needs to have his crops that he feeds near at hand, and he must provide to have then come on in regular sucession. All this is a very simple and inexpensive affair.

There will be at times portions of the farm which can be pastured; then a for the purpose, could be readily put up around such portions and the animals turned in. - Detroit Free Press.

Keep the Animals Warm The first cold blast of wind from the course, good wood, stone or brick barns and stables are expensive, and there rots and let them stew awhile. are many farmers, especially in the rel some kind of a shelter for their anipetter than a shed, with sod for walls, paste. and a roof of brush or cornstalks. All where a man's purse is light; still, it is economy to keep all farm stock sheltered from cold, wind and storms in winter, even if the owner does not not seek enough of the owner does n sess enough of the humane feelings to their comfort.

eases and parasites which infest farm stock are the direct result of neglecting to furnish them with proper food or shelter during cold, stormy weather. Cattle of all kinds, when forced to remain in muddy, wet yards during cold weather, are liable to various diseases of the feet, such as hoofail and foot rot, and the best preventitive is dry some similar coarse material. Standing a long time in filth, whether in the stable or yard, is almost certain to bring on diseasee of the feet. All kinds of farm stock are lightly to the stable or yard, is almost certain to bring on diseasee of the feet. All kinds of farm stock are lightly to the stable or yard, is almost certain to bring on disease of the feet. All kinds of farm stock are lightly to the stable or yards intered in two beaten eggs, and prepared flour, with two teaspoonfuls of baking powder added; mix just stiff enough for the doubt of the stable or yards intered in two beaten eggs, and prepared flour, with two teaspoonfuls of baking powder added; mix just stiff enough for the doubt of the stable or yard, is almost certain to bring a long time in filth, whether in the two teaspoonfuls of baking powder added; mix just stiff enough for the doubt of the stable or yard, is almost certain to bring on disease of the feet. All kinds of farm stock are liable to take cold when exposed to storms, and from this comes a weakened constitution, which invites various kinds of diseases and parasitie insects. Weakened vitality or vigor in either plants or animals opens the way to hundreds of parasites which are resisted by the healthy indiable them to ward off the attacks of braids, in fancy nets.

such enemies. He has only to think of his own comforts, such as nutritious food and warm clothing, and consider how the reverse of these conditions would affect him, to understand how it is with his animals.

regard to the building of sheds, stables or other kinds of structures for sheltering stock in winter, as every man knows best what materials are at hand or within reach suitable for such purposes but the fact should be apparent to all breeders of animals that in all cold climates some kind of protection is required. Out on the plains and prairies of the west and southwest it is often asserted that sheep need no protection in winter, and it is even claimed by some that they do better without it than with it; but the frequent heavy losses by cold, starvation and diseases, plain-ly show that all this talk of mildness of climate is an error. Sheep and other farm stock may live through the winter without artificial shelter, or more food than can be obtained on the range in these favored localities, but they would certainly do better with added comforts every winter, and occasionally heavy losses might be avoided by making the necessary provision to protect and feed them when severe storms prevail.

How to Fatten Poultry for Market.

ing the object desired. Never let poultry forage or shift for themselves for at least ten days before killing, for they are apt to range in the barnyards, and pick up food, which permeates all through the bird, its flesh frequently becoming so tainted, that it

The best method for steady and common fence will cost 75 cents a rod regular profit, or for domestic use, is to on the farm where the timber is found. keep them constantly in high feed from If the rails are to be transported any beginning, with plenty of clear, cool distance the cost will not be less than a water; then they are alwaps ready for dollar a rod. On every eighty acres of the table, but with very little extra atcultivated land there are at least 600 tention, their flesh will be juicier and rods of fence, costing \$500 or \$600 and richer in flavor, than those fattened about ten per cent. annually for repairs. from a low and emaciated state, always

Household Recipes.

JERUSHA CAKE.—One cup of sugar, one-half cup of milk, butter the size of like, and nearly two cups of flour.

VERJUICE CABBAGE:-Stew quartered cabbage in a closely-covered porcelainlined kettle with water for two hours, then add verjuice enough to season, and a trifle of sugar if necessary; stew down slowly for another hour, and serve

warm. TAFFY CANDY. - One cupful molasses one cupful sugar, two-thirds cupful of water, a piece of butter, the size of a hickory-nut. If brittle when dropped cheap hurdle, or moveable fence kept into water, pour out on large plates. Stretch out to the thinnest while warm. When perfectly cold, break into squares.

TO COOK CARROTS BY GERMAN RULE. -Scrape and cut your carrots after they are well washed, put them into a north is a reminder that animals, how- pot in which a cooking spoon of suct ever tough and hardy, need shelter in or butter has been melted, then pour winter. It will take less food to keep on a cup of water, add a pinch of salt farm stock over winter in warm stables than when exposed to severe cold. Of stewed soft, brown a spoon or two of

FRENCH BLACKING.—Twenty ounces cently settled districts, who have not ivory black, sixteen ounces New Orleans rel, and ran at the pig as hard as he the means to build such structures, but molasses, five ounces linseed oil, one there is no one too poor to furnish ounce sulphuric acid, one-quarter ounce indigo, one-half ounce mucilage; mix mals. If a man cannot afford to build the black and molasses well, so as to get Then all at once he remembered he what he desires, let him do the next out all the lumps; next add the oil; best thing, and build something which then by degrees the acid, and as much will furnish shelter, even if it is nothing water as may be required to form a

ALMOND MACAROONS. - One-half pound size of a nutmeg; place on white paper one inch apart. When all are done, one inch apart. When all are done, though the sun was high. Then all at dip you finger and press them a little once he thought 't was too far to take

ner of the range until warm enough to melt one-half pound of lard in it; beat it up well; one nutmeg, one teaspoonful each of cinnamon and cloves, and two tablespoonfuls of ginger, a pinch of salt, one cup of milk stirred in two pour it from the spoon.

This world appears very beautiful when you are well. To remain well, healthy and strong, take Dr. J. H. McLean's Strengthening Cordial and Blood Purifier, the greatest tonic in the world. It strengthens the body and purifies the blood, Dr. J. H. McLean's office, 314 Chestnut, St. Louis,

FOR THE YOUNG FOLKS.

Naming the Chickens.

were two little chickens hatched out one hen, And the owner of both was our little boy Ben; So he set him to work as soon as they came, To make them a house, and give them a name. It is unnecessary to go into details in

As for building a house, Benny knew very well That he couldn't do that; but his big brother Phil Must be handy at tools, for he'd been to college Where the boys are supposed to learn all sorts of knowledge.

Phil was very good natured, and soon his small Had a nice cozy home for his chicks and their mother; And a happier boy in the country just then Could not have been found than our dear little

But a name for his pets it was harder to find, At least just as suited exactly his mind; No mother of twins was ever more haunted With trouble to find just the ones that

There were plenty of names, no doubt about that, But a name that would do for a dog or a cat Would not answer for chickens as pretty as th Or else our dear boy was uneasy to please.

These two tiny chickens looked just like each other;
To name them so young would be only a bother.
But with one in each hand, said queer little Ben,
"I want this one a rooster, and that one a hen."

Benny knew them apart by a little brown spot, On the head of the one, that the other had not: They grew up like magic, each fat feathered chick. One at length was named Peggy, and the other named Dick.

Benny watched them so closely not a feather Although the manner of fattening poultry may seem easy, yet there is nevertheless, a right and wrong way, a long and a short mode, of accomplishing a command, fly up on his shoulder, or eat from his hand.

But a funny thing happened concerning their names—
Rushing into the house one day, Benny exclaims:
"Oh! mother! Oh! Phil! such a blunder there's For Peggy's the rooster and Dick is the hen!"

The Husband Who Was to Mind the House. A STORY FROM THE NORSE.

Once on a time there was a man so surly and cross, he never thought his Dr. J. H. McLean. 314 Chestnut, St. Louis wife did anything right in the house. So, one evening, in haymaking time, he came home, scolding and showing his teeth and making a dust.

"Dear love, don't be so angry; there's a good man," said his goody; "to-mor- Bronchitis heads the list, its victims row let's change our work. I'll go out were 53,000; consumption comes next, with the mowers and mow, and you with 49,379; atrophy and debility, 30, shall mind the house."

Yes! the husband thought that would do very well. He was quite willing, he heart disease increases, and has carried said.

So early next morning, his goody took a scythe over her neck, and went than usual, 25;927; scarlet fever, 25, out into the hayfield with the mowers, 922; diar hea, 21,204, of which 18,000 and began to mow; but the man was were children under five, a mortality to mind the house, and do the work at thought to be caused by a mixture of

butter; but when he had churned a 12,848, but nervous diseases have not while, he got thirsty, and went down to increased as much as those of circula the cellar to tap a barrel of ale. So, tion. Tubercular diseases show symp just when he had knocked in the bung, toms of decline; death by alcoholism and was putting the tap into the cask, was higher than for many years. Viohe heard overhead the pig come into lent deaths, 17,920. Killed on railways, the kitchen. Then off he ran up the 1,219, against 1,316 by horse conveycellar steps with the tap in his hand, as ance. Among the queer causes of stood there, rooting and grunting sting of a wasp.

amongst the cream which was running Not H all over the floor, he got so wild with rage, that he quite forgot the ale barcould. He caught it too, just as it ran out of doors, and gave it such a kick, that piggy lay for dead on the spot. had the tap in his hand; but when he got down to the celler, every drop of

ale had run out. Then he went into the dairy and found enough cream left to fill the churn again, and so he began to churn, for butter they must have at dinner. When he had churned a bit, he remembered that their milking cow was still shut up in the byre, and hadn't had a bit growing there. Now their house lay close up against a steep down, and he thought if he laid a plank across to the

But still he couldn't leave the churn. So he took the churn on his back and went out with it; but then he thought he'd better first water the cow before he turned her out on the thatch; so he took up a bucket to draw water out of the well; but as he stooped down at the well's brink, all the cream ran out of the churn over his shoulders,

and so down into the well. Now it was near dinner-time and

it over the fire. When he had done that, he thought the cow might perhaps fall off the the hatch and break her legs or neck. So he got up on the house to tie her up. One end of the rope he made fast to the cow's neck, and the other he slipped down the chimney and tied round his own thigh; and he had to make naste, for the water now began to boil in the pot, and he

had still to grind the oatmeal. So he began to grind away; but while he was hard at it, down fell the cow off the housetop after all, and as she fell. she dragged the man up the chimney by the rope. There he stuck fast; and as for the cow she hung half way down the wall, swinging between heaven and earth, for she could neither get down nor up.

And now the goody had waited sev-

dinner but never a call they had. At Among these, Mr. Charles Barnard's articles last she thought she'd waited long on various industries of Great Britian; inenough, and went home. But when she got there and saw the cow hanging in such an ugly place, she ran up and cut Workman's Home, and Clarence Cook's artherope in two with her scythe. But as ticles on Household and Home Decorations. she did this down came her husband out of the chimney; and so when his old dame came inside the kithen, there she found him standing on his head in the porridge pot.

Baby-Life in China and Hindoostan. The bare-headed baby of China, not quite so grave as his Asiatic cousins, is still a contented little traveler, whether he rides on the back of mamma, or is tied on a mat to sleep, or exposed beside the door in a bamboo cage, or fastened to his gilded baby-chair, to teach him to sit up. " Down in the Mouth."

down into the back of the mouth, with in gin the publication in Scribner's Monthly of a series of papers of special interest to those series of papers of special interest to those and a sense of fullness about the head, be living in the country, in which will be connot decived or fancy it a simple cold. sidered the advantages offered to farmers You are afflicted with that scourge of this You are afflicted with that scourge of this climate, Catarrh, the forerunner of Consumption. In its early stages a few bottles of Dr. Sage's Catarrh Remedy will affect an entire cure. When confirmed, Dr. Pierce's Golden Medical Discovery should be used in connection with the Remedy. These standard medicines have been before the in connection with the Remedy. These standard medicines have been before the public many years, and their use has been attended with the most gratifying success. A full discussion of Catarrh and its rational treatment is contained in "The People's Common Sense Medical Adviser," a book of over nine hundred pages, illustrated with two hundred and eighty-two engraving, bound in cloth and gilt, price post-paid, bound in cloth and gilt, price post-paid the price of over nine hundred pages, illustrated with two hundred and eighty-two engraving, bound in cloth and gilt, price post-paid, \$1.50. Address Publishing Department, World's Dispensary, Buffalo, N. Y.

The propriety of giving condition medicine to horses, cattle and sheep, was discussed and admitted by many of the Agricultural Societies throughout the state last Fall, and we believe that in every case but one they decided in favor of Sheridan's Cavalry Condition Powders. Good judgment.

TRIED EVERYTHING. Mesers. J. O. Bosworth & Co., Denser, Col.: Gentledmen.—I have used Sandon's Radical Curry for Carling, and it has given perfect satisfaction. I have tried almost everything, and it is the only thing that has given me relief. I therefore take pleasure in recommending its use to all afficed with Catarrh of any kind, and offer this as my testimony to its benefits. Very truly.

DENVER, Oct. 1, 1875.

Each package contains Sanford's Improved Inhaling Tube, with-full directions for use in all cases. Price, \$1.00 per package. For sale by all Wholesale and Re-tail Druggists throughout the United States. WEEKS & POTTER, General Agents and Wholesale Druggists, Leston.

COLLINS' **VOLTAIC PLASTERS**

Afford the most grateful relief in all Affections of the Chest and Lungs.

CHRONIC PLEURISY CURED.

Mesers. Where & Potter:
Genilemen.—Having for many months past suffered
with a very lame side, called by my physician Chronic
Pleurisy, caused by a former injury and strain, and for
which I used many prescriptions and liniments, as well
as the so-called rheumatic cures, without the least
benefit, my physician recommended one of your ColLINS' VOLTAIO PLASTRUS, which, to my great surprise,
relieved the pain and soreness almost immediately,
and I have been able to attend to my household atfairs ever since with perfect ease and comfort, whereas before the application of your invaluable plaster
I was scarcely able to do anything. I consider them
inestimable, and shall with pleasure recommend them
to the afflicted. Yours respectfully,
Mrs. FRANCES HARRIMAN.
ORLAND, Me., April 21, 1876.

There is no medical or protective appliance that will prove so grateful and effective in Tickling Coughs, Irritation and Soreness of the Chest and Lungs. We believe them capable of preventing serious diseases of these organs.
