

NEWS OF THE WEEK.

MICHIGAN.

The propeller James Miller left Owen Sound November 23, for Meaford, Mich., and Providence Bay, since which no trace of her has been found, except certain portions of wreck.

A three-inch hole 75 feet deep, just completed on the starboard side, in the northwest part of the city, passed through a coal vein 19 inches thick.

Michael Engleman of Manistee recently sold \$50,000 worth of pine lands. Simon & Lilly of Spring Lake have owned 2,000,000 feet of lumber and built 1,900 feet of tramway since the burning of their lumber yards, Nov. 9.

the engine mill, owned by L. F. Watson, which with the others, was wholly destroyed. The further progress of the fire was prevented at this point, but flying embers ignited the cotton mill of Dorilus Morris, and it also was consumed.

President Arthur is reluctant to take the stand in the Gulletau case, and will probably be excused.

Several distinguished witnesses were called Saturday, Emory Stora, of Chicago among the rest. Had known Gulletau in Chicago as a young lawyer, and seen him at the Republican committee rooms in New York.

He did not say anything there but read the papers. I April last saw him in Washington, when he told witnesses he was going to have the American witness. Witness told him that was in Mr. Blaine's line, when the prisoner said he was "solid with Blaine."

Thinking that Gulletau was driving to get him to influence Blaine in his behalf, he forestalled by saying that his relations to Blaine were such that he could not possibly aid him. Witness had formed an opinion as to Gulletau's mental size but not to his sanity or insanity.

He has an ill-balanced mind, is taking in common sense, but never saw in him anything to indicate that he does not know the difference between guilt or innocence or that he would not be responsible for crime. David Davis was asked as to his knowledge of divisions in the Republican party last spring. Had no personal knowledge as he did not go into the Republican caucus, but thought there had been no caucus which seriously threatened the "disruption of the party."

Hon. W. E. Niblack of Vincennes, Ind., Judge of the Supreme Court of Indiana, an ex-member of Congress, was seriously hurt by falling through a stable loft yesterday morning.

The present Cabinet slate is: Hunt, James, James, Lincoln, Kirkwood, Frelinghuysen and Brewster.

A suit was instituted Wednesday in the superior court against the Raymond & Ely Mining Company of California to have assessment No. 16 rescinded; also for the recovery of \$837,000. The suit was instituted on the ground of mismanagement in the affairs of the company.

The Michigan delegation in Congress have decided to recommend the re-appointment of S. M. Catehon as United States District Attorney for the Eastern District of Michigan, and Samuel Post as Pension Agent at Detroit.

The total amount of \$1.2 continued bonds offered for redemption under the 10th call to date is \$13,734,280.

Crown jewels of France to the intrinsic value of 12,000,000 francs, but possessing no historical value, are likely to be sold by the advice of a committee of the legislative chambers.

The franking privilege has been unanimously accorded to Mrs. Garfield by the senate.

The government service for the next fiscal year, it is estimated, will call for \$340,462,507. Secretary Blaine wishes to retire from the Cabinet next Wednesday.

John W. Forney, the journalist, at the point of death, on Thursday sent for speaker Randall, to whom he wished to make some communication.

The Metropolitan street railway stables in Boston were burned Thursday night. The flames were caused by the building used as a stable for 150 work horses and stables for hay, etc. The horses were all removed. The building and the other contents were destroyed.

A nitro-glycerine explosion at Eagle Lake, on the Thunder by division of the Canada Pacific railway, Tuesday, killed foreman Duncan McMillan and one of his men, Wm. Conell.

Ex-Chief Justice Barbour, of the supreme court of New York, died very suddenly Thursday morning of heart disease.

By the explosion of a vat of heated varnish at No. 61 Beekman street, New York, Wednesday morning, the two upper stories were wrecked and damage of \$38,000 caused the various tenants by fire and water. Gaylord & Watson and John Metz suffered the greatest loss.

The theory of insanity, as set up by the defense in the Gulletau trial, has had slim support. Many witnesses have testified to their belief that the assassin is in some sort of crazy, but a majority of this class consider him responsible for his crime.

C. B. Farwell, of Chicago, said he never thought Gulletau a sane man, but on cross-examination that he was not so insane that he could not distinguish right from wrong. Scoville brother, of California, says that, from long and intimate personal acquaintance with the assassin he regards him as "cold blooded selfish, and thoroughly disreputable" and without a perfectly sane. Gulletau is persistent in his demand to have Arthur, Conkling, Platt, and Grant as "personal friends," who were set down upon Garfield that they would not speak to him on the street, and would not go to the White House, put on the stand. The court orders that written questions be put to President Arthur, to which he may return answers. Witnesses were examined as to the character of Gulletau's father, but none said they ever thought him insane. Testimony in rebuttal of the insanity witnesses of the defense will be offered by the government, of which there is plenty in reserve, but Mr. Conkling expresses the opinion that the trial will not last more than a week longer.

A young man of Delano, Minn., carried a bottle of deadly poison in the same pocket with his chewing tobacco. The flask exploded, impregnated the tobacco, and killed the chewer.

A persevering dog on the scent of a coon raised such a disturbance around the Ridgely church in Caroline County, Ind., that the Sunday evening service had to be abandoned when half through.

CONGRESS. THE SENATE—December 5.—Senator Davis formally convened the chamber at noon. Resolutions for committees of notification of the house of representatives, informing them of the organization of the senate, were adopted. A large number of bills were introduced among them the following: By Mr. Garland (Ark.), for the appointment of a commission to investigate questions of tariff and revenue laws; by Mr. Beck (Ky.), for retiring trade dollars and recouping them into standard silver dollars; by Mr. Miller (Cal.), treaty stipulations relative to Chinese; by Mr. Conger (Mich.), to promote the efficiency of the life saving service; by Mr. Windom (Minn.), to incorporate the Garfield memorial hospital; by Mr. Logan (Ill.), to place Gen. Grant upon the retired list of the army; by Senator Sherman, authorizing the issue of 3 percent bonds, not to exceed \$300,000,000, the proceeds of the sale, to go to the redemption of 8 1/2 bonds. Mr. Latham introduced a bill for the punishment of attempts to take the life of the President of the United States or others charged with the duties of the office of President of the United States, prefers as punishment upon conviction, imprisonment for life, such imprisonment to be by solitary confinement or hard labor in the discretion of the court.

The House met at 11 a. m. and proceeded to the election of Speaker. Nominations being in order, Mr. Keifer was put in nomination by Mr. Robeson (N. J.), Mr. Randall by Mr. House (Tenn.), and Mr. Ford by Mr. March,

(Me), Messrs. Burrows (Mich.), Holman, McCook and Ladd were appointed tellers. The roll was called and the result was as follows: Whole number of votes 285. Necessary for a choice 143. For Mr. Keifer 148, Randall 129, Ford 8. All the members whose seats were not contested were sworn in, and the Republican caucus nominees of the House elected.

December 6.—The second day of the session in the house was devoted principally to the drawing of seats, although the first hour was consumed by a general discussion on Haskell's order made by Frost of Missouri on Haskell's resolution of the previous day on continuing the rule of the last house. Frost made the point that the present house had no rules. The house will adjourn over till Friday to enable Speaker Keifer to make up his committee. The Michigan delegation held a conference Tuesday night and agreed to endorse Hon. J. W. Stone of Grand Rapids for commissioner of patents. They also endorsed Samuel Post for pension agent in place of Gen. Hartwell, declined. The annual meeting of the Michigan association for the election of officers resulted in the re-election of Z. Moses for president, and the election of R. H. Taylor, for vice president. F. B. Conger, for secretary, and John W. Green for treasurer. The executive committee for the coming year are W. H. Barton, Hon. W. R. Thompson, Colonel D. B. Alger, D. T. Pierce and A. F. Winslow.

In the session yesterday when Mr. Edmunds called up his resolution providing for the continuance of the committees as at the close of last session the President pro tem, Mr. Davis, made a speech defining his position. He said he intended to support the present administration as long as its course continued the same as now, reserving the right, however, to criticize it at any time he should see fit. He would therefore vote to continue the present formation of committees to enable the Republicans to have a fair show. He would not vote, however, to remove any of the present officers of the senate, so Sergeant-at-Arms Bright will continue in his office unless Senator Mahone can find a way of removing him independent of the vice-president's vote.

December 7.—Speaker Keifer and his advisers have been at work to-night arranging committees, which are to be announced next Tuesday. The Republican senators held a short caucus this morning to arrange for making some changes in the Republican membership of the senate committees in order to meet the personal convenience of senators and provide suitable committee positions for Windom. A committee was appointed by the caucus to confer with individual senators and report hereafter. The President has approved the recommendation of the Secretary of the Interior and accepted the additional twenty-five mile section of the Northern Pacific Railroad. The new section lies in Idaho. On Tuesday bills were introduced: To establish the territory of North Dakota, and providing temporary government therefor. For the establishment of the United States ocean mail service and the revival of foreign commerce in American steamships; authorizing a mail steamship service between New Orleans and Mexico ports; for the establishment of a mail steam service between the United States and Brazil; for the opening and keeping unobstructed navigation of the Red River, Louisiana; to authorize the Barbavia ship canal company to construct and operate a ship canal from New Orleans to the Gulf of Mexico over the lands and waters of the United States. By Mr. Windom to enable the people of Dakota to form a state government and for their admission as a state.

December 8.—Mr. Morrill, of the Senate, spoke at length on the tariff question. The subject of the tariff will attract much of the attention of Congress this winter, and a lively fight over it can be foreseen. The free traders will oppose the bill for a tariff commission. They say that it is only a trick of the protectionists, that the commission will be composed of protectionists, and instead of recommending a tariff revision will go still farther toward the protection extreme. On this ground they will fight the measure and try to get something in the direction of a tariff reduction.

December 10.—Of the 350 bills introduced in the Senate, during four days' session, a large proportion are private relief bills, that have heretofore failed. The bill introduced in the senate by Vest for the improvement of the Mississippi and Missouri provides for the expenditure of 10,000,000 under the direction of the Engineer Corps of the army; one-half of the amount upon the Mississippi and the remainder upon the Missouri in accordance with the plans already recommended by the Mississippi River Commission. The bill authorizes the Attorney-General to institute proper proceedings in United States Courts having jurisdiction for the appropriation of land and material necessary for the prosecution of work. The land and material so appropriated to be appraised and paid for.

The sub-committee on Bankruptcy law of which Senator Ingalls is chairman, has completed the work assigned to it, and its report is prepared. Mr. Ingalls has worked steadily all summer in collecting information on the subject. Over forty thousand circulars were sent to merchants, manufacturers, lawyers and commercial bodies asking opinions as to the necessity of a national bankruptcy law and suggestions as to its provisions. Great interest appears to have been taken by business men. The members of the sub-committee are favorable to the suggestion, which originated with Mr. Ingalls, that the United States District Courts be given charge of bankruptcy proceedings, with special provisions to enforce their judgments. It is known that Senator Edmunds favors this. The President yesterday evening signed a convention for money order exchanges between Victoria and the United States. The day before he signed a convention for exchanges between New South Wales and New Zealand. These go into effect the 1st of next January, and will greatly facilitate commerce between the United States and the Antipodes.

SKILL IN THE WORKSHOP.—To do good work the mechanic must have good health. If long hours of confinement in close rooms have enfeebled his hand or dimmed his sight, let him at once, and before some organic trouble appears, take a course of Hop Bitters, and his system will be rejuvenated, his nerves strengthened, his sight become clear, and the whole constitution be built up to a higher working condition.

Peach trees are now living bearing in Northampton county, Va., and the vicinity is believed to have the best soil for peach culture in the world.

SILVER CAREER, N. Y., Feb. 6, 1880. GENTS—You have been very low, and have tried everything to no advantage, and heard of your Hop Bitters recommended by so many, I concluded to give them a trial. I did, and now my mind is made up, and I am improving, and am nearly as strong as ever.

Important new minister (who wished to know all about his parishioners): "Then do I understand you that your aunt is on your father's side or on your mother's?" County lad: "Sometimes on one and sometimes on the other, 'ceptin' when father whacks 'em both, sir."

Fruit trees have blossomed this fall in many localities. A man on Staten Island, has a cherry tree with a second crop of cherries on it nearly ripe. The New Jersey cranberry crop was considerably injured by the recent frost.

An ex-consul of Great Britain, says the Brooklyn Eagle, related that Mr. Charles Townsend, Sedalia, Mo., was cured of rheumatism of the worst kind by St. Jacobs Oil.—Indianapolis (Ind.) Sentinel.

That was provoking, but still the Zulu had been obedient,—perhaps too obedient.—St. Nicholas.

The Ottawa (Kan.) Republican thus quotes: Mr. Harvey B. F. Keller, re-convinced, says: "I have long been convinced of the merit of St. Jacobs Oil, and use it in my family for rheumatism successfully."

The mean temperature is what distinguishes a man with every climate.

Photography, or Phonetic Shorthand Catalogue of works, with Photographic alphabets and illustrations, for business, sent on application. Address: JOHN PITTMAN, Cincinnati, O.

Read the Glass Man. Mr. Reid is not made of glass, as our readers might suppose from the above heading, but is so intimately connected with the glass trade of the West that, in reading his paper, we can feel that we are in his hands. We had the pleasure of seeing him at 14 1/2 E. Third street, on the 21st of last month, and he was every bit of a glass man that he made. He probably does more business in his line than all other dealers in the West combined.

Important to Travelers. SPECIAL NOTICE.—An official you by the BURLINGTON ROUTE, and you to read their advertisement to be found elsewhere in this issue.

Druggists say that LYDIA E. PINKHAM'S VEGETABLE COMPOUND is the best remedy for female weakness that they ever heard of, for it gives universal satisfaction. Send to Mrs. Lydia E. Pinkham, 238 Western Avenue, Lynn, Mass., for further particulars.

The Best Proof of Merit. It is uniform success, and in this case, Warner's Safe Kidney and Liver Cure, without doubt one of the greatest remedies in the land.

Tonic and Laxative. For the best blood purifier in the market buy James Tonic Pills. Largely composed of iron, sugar, cod-liver oil, and other ingredients, guaranteed to cleanse the system, and provide suitable committee positions for Windom. A committee was appointed by the caucus to confer with individual senators and report hereafter. The President has approved the recommendation of the Secretary of the Interior and accepted the additional twenty-five mile section of the Northern Pacific Railroad.

The Soldiers' Friend. MR. B. F. FRITZMAN, late of Indianapolis, Ind., but now of Washington, D. C., having lately returned to the last named place, is certainly entitled to great distinction on account of his goodness to the soldier, the pensioner, and his heirs. He has learned that the soldier's claims for pensions, bounty, and in fact all class of claims, can be more easily settled by him, being at the Capital, than elsewhere, on account of giving his personal attention at the various Departments of the Government. His long experience—and experience is every-thing—enables him to bring about a speedy settlement of all class of claims. He has prepared a pamphlet, containing a synopsis of the laws and regulations so clearly set forth that even a child can understand it. The fee for obtaining a pension is only ten dollars, while the pensioner frequently draws several hundred dollars at first payment. And the pension laws are so very liberal that a pension is given for any kind of a wound, disease, or disability, even if caused by accident or otherwise. And it should be known by every one that Mr. Fritzman's pamphlet contains a list of such other claims as have been unskillfully and negligently prosecuted by incompetent attorneys, and which he will take up and vigorously settle. It is not uncommon for him to secure the allowance of a pension claim after more than one rejection. There are thousands of such cases, and many of them are pension claims that were rejected during the five years that "Mr. Bently was Commissioner, all of which cases he has since taken up and vigorously settled. He makes no charge for his personal attention. He makes no charge for advice. His address is box 34, Washington D. C.—Wellsville Advocate.

RESCUED FROM DEATH. The following statement of William J. Joughlin, of Sumnerville, Mass., is so remarkable that we beg to ask for it the attention of our readers. He says: "In the fall of 1871 I was taken with violent rheumatism of the joints followed by a severe cough. I soon began to lose my appetite and flesh. I was so weak at one time I could not leave my bed. In the summer of 1872 I was admitted to the City Hospital, where the doctors said I had a hole in my left lung as big as a half dollar. I expended over a hundred dollars in doctors and medicines. I was as good as gone at one time a report went around that I was to die. I gave up hope, but a friend told me of Dr. Wm. Hall's Balsam for the Lungs. I laughed at my friend thinking that my case was incurable, but I got a bottle to satisfy them, and to my surprise I was cured. I commenced to feel better. My cough, however, did not revive and to-day I feel in better spirits than I have for three years."

HE LADIES OF THE WHITE HOUSE. OR IN THE HOME OF THE PRESIDENTS. A History of every Administration from Washington to the present time. Includes Personal and Private History never before published. Philadelphia: Wm. H. Burdett & Co., 100 North Fourth St., Philadelphia, Pa.

NEEDLES. Agents, Male and Female, can make from 5 to 10 cents per hour. Send for Circular. Price 25 cents. 125 Needles in a package, completely assorted, price 10 cents. 250 Needles, price 20 cents.
