Pianos Properly Priced

Our One Price System

Is building up a piano trade for this store that speaks for itself. It is something that customers admire as soon as they understand it, and people generally are rapidly learning its advantages, nearly every intending customer who comes here to look buys here. In the first place, they find a cleaner and better stock than in most stores, priced so moderately that the saving amounts to from \$25 to \$150 on a piano, according to its grade.

And then it requires no pull or dickering to get the lowest price. All pianos are marked in plain figures at their lowest possible cash price. Guaranteed lower or as low as any in America. If you desire gradual payments, they can be arranged just as you want them, and we charge but 5 per cent interest per annum on deferred payments. (A lower rate of interest than you can obtain at any bank.)

Come and Investigate

New Piano \$125

You will find this same grade and probably this same make of piano priced in the other Piano stores at from \$175 to \$225—but under our one-price system it is \$125 cash or \$10.00 cash and \$5.00 a month.

French & Bassett

DULUTH, MINN.
First Street and Third Avenue West, Duluth, Minn.

BELL BRAND COLLARS

BEAR THE UNION LABEL
ALL SHAPES QUARTER SIZES
SOLD ON QUALITY.

The patrons of the union label will be gratified to know that the Big Duluth has just installed a big stock of union made collars of all shapes and sizes. This is a most popular brand of collars, and union members and their friends are asked to visit the Big Duluth store and give the new shipment of collars their careful inspection.

These collars can be had in any shape and size at 15c, or 2 for 25c.

WAR BETWEEN FACTORY AND SCHOOL

Child labor can be minimized by official co-operation between factory inspectors and truant officers, by effective harmony of child labor and compulsory education laws and the forces that enforce these laws. This great nation of ours, like a sleeping giant,

has not yet fully awakened to the fact that saving the children today we save the country in the future, and as we love our country so should we protect these children, in whose hands some day will rest the precious stewardship of the republic. The fate and the municipality do not give sufficient material assistance to child saving. The enactment of laws should be followed by an adequate number of factory inspectors to enforce those laws. We must have appropriation with legislation. The competitive life of politics diverts the public moneys into other channels, and merely a pittance is tossed to factory inspection as a sop to labor. This same competitive life of politics—the struggle for supremacy between the great parties—makes the tenure of office for factory inspectors uncertain, with the result that the trained and faithful inspector at times must retire as a martyr to party fealty or factional strife among the bosses. In a factory inspector's official life one good term deserves another.

Capital has its competitive life, and we find business men prematurely gray and broken down with the worries of the pace of competition that kills. These men carry their worries home with them. Their business is their love, their constant thought, their life and often their death. Commercialism is ever at their elbow, urging them on in the race. Wealth seeks to multiply wealth at the expense of health, and as the employer overworks, "nervous prosperity" ruins as many men as a nervous prostration. Labor has its competitive life. It is organized labor against non-union labor, the closed shop and the open shop, and frequently violent contentions arise between labor and capital where the competitive life diverges to a struggle as to who will win the strike. And so the great struggle goes on in every walk of life—the battle for the survival of man over man, woman over woman and child over child. But let us spare the children from the competitive life of industrialism. Let us keep our children in school to be reared in the life of education, the life of patriotism and training for good citizenship. Let us say unto the factory, "Thou shalt not rob to school! Thou shalt not trample childhood under the heel of gold!"

DULUTH HEIGHTS GOSSIP BRIEF AND SOCIAL NEWS

UNION LABEL BECOMING POPULAR IN DOMINION

Growing Tendency of Canadian Manufacturers to put Label on Products.

Untiring Efforts of Loyal Trades Unionists Credit-ed with the Result.

The Herald and Star of Montreal, Canada, says: The growing tendency on the part of manufacturers in various lines to put the union label on union made goods is a helpful sign to those trades-unionists who have for years past, in season and out of season, urged members of labor unions and their families to demand the label on all purchases.

Sentiment Awakened.
For some years there seemed to be a disposition on the part of employers to refuse the label on their goods, and in many quarters this sentiment still controls, but the ever-increasing demand has forced many of them to forego any scholastic scruples they may have had, until at present union labeled goods of all classes and descriptions are offered to the public, freely advertised as such, and meet a ready sale, not only to members of trade-unions, their families and friends, but the public has awakened to the fact that, generally speaking, goods bearing the union label are superior to all others.

Universal Benefit.
If the public has at last been aroused to the superior quality of label goods, which are the product of union labor, receiving fair living wages and enjoying reasonably short workdays in shops where the sanitary conditions are clean and wholesome, it is a great gain for the nation as well as for the cause of unionism.

This education of the people has been slow but sure, and we who know that in many instances goods which do not bear the label are manufactured in sweatshops, prisons and poorly-ventilated, overcrowded, disease-producing tenements by the overworked, poorly-paid slaves of grasping employers should welcome this sign of the times, which can be fostered and strengthened by us until in time all goods on the market which have any claim to superiority will bear the mark of that union which is engaged in its manufacture.

To your efforts to create a demand for the label this condition is due, but the battle is not yet won. Keep demanding it on your purchase. As the demand increases so will the supply, and the time will soon come when goods which do not bear the union label will be forced from the market by the better made union label products.

The union farmers should learn a lesson from the success of their fellow-unionists, and day and night, in season and out of season, advocate the use of the farmers' union label by all dealers in farm products. In order to make their own label popular they should advocate the use of all union labels and not buy goods that have not the union label attached. The label is the strongest card the unionist has to play.

ABRAHAM LINCOLN'S HONESTY.
"The lawyer whose honesty is proved has the confidence of the judge and jury," asserts Judge Brewer in the "Atlantic Monthly." To illustrate his meaning he tells this story of Abraham Lincoln:

He was appointed to defend one charged with murder. The crime was a brutal one; the evidence entirely circumstantial; the accused a stranger. Feeling was high and against the friendless defendant. On the trial Lincoln drew from the witnesses full statements of what they saw and knew. There was no effort to confuse; no attempt to place before the jury the facts other than they were. In the argument, after calling attention to the fact that there was no direct testimony, Lincoln reviewed the circumstances, and, after conceding that this and that seemed to point to defendant's guilt, closed by saying that he had reflected much on the case, and while it seemed probable that defendant was guilty, he was not sure, and looking the jury straight in the face, said, "Are you?" The defendant was acquitted, and afterwards the real criminal was detected and punished.

The simple, straightforward way of Lincoln, backed by the confidence of the jury, won.

PLUMBERS OF SPOKANE SECURE BIG INCREASE

Bosses Grant Advance of \$1 per Day to Members of Union.

Concession Made Voluntarily and Most Harmonious Relations Prevail.

SPOKANE, Wash., April 18.—Firms employing 80 per cent of the members of the Plumbers' Union of Spokane, have expressed their willingness to pay \$6.50 a day for eight hours to members of the organization. This is an advance of \$1 a day over the present schedule. While no demand has been presented by the union, the employers have been approached with the foregoing result. The executive committee of the union first discussed an increase of 50 cents a day, but it has since been decided to ask for a straight advance of \$1. It is now given out that a demand will be made in time to have it in effect May 1. Every man in the union is employed and there is a need for more competent workmen.

Half Holiday on Saturday.
Officers of the Structural Building Trades Unions in Spokane have taken up a movement originated by the Bricklayers' Union for a half holiday on Saturdays at the expense of the men. The bricklayers have asked the International Executive Board to sanction the plan and if this is granted other building unions in the city will also ask for similar action, the plan being to have the holiday season begin early in July and continue throughout the summer. This plan will mean employment to 10 per cent more men, the demand for which is already in excess of the supply because of increased building operations in Spokane.

Make Deal With Farmers.
Officers of the Central Labor Union in Spokane have sent a communication to the American Society of Equity, an organization of the farmers, and as soon as the reply is received they will give support to a branch to be established here. A communication has been received from the society asking for the support of the Central labor body, and this was referred to the organization committee for investigation. The committee reported to the central body recommending that the secretary write to the headquarters of the society for further information and when this is received the central body will take action.

DR. A. GRAHAM OPENS OFFICES IN DULUTH

Successful Chiropractor Gives Some Views on How to Gain Health.

Discusses Nervous Diseases and His Method of Curing. Skeptics Solicited.

Dr. A. Graham, who recently opened offices in the Burrows building, for the chiropractic treatment of men and women is regarded as one of the best authorities of this theory in the country. In an interview with the Labor World, relative to his method of treatment, he says:

"Disease of every character, except that which may be induced by poison or by accident to body or limb, originates in a derangement of the spinal nerves. The nervous organism is the life force of the human being, and as the spinal cord is the center of the nervous system, here we find the cause of disease. The spinal column is composed of twenty-four movable vertebrae, a slight dislocation of one or more of these vertebrae will cause pressure on the nerves as they proceed from the spinal cord.

"Chiropractic adjustment, scientifically applied, removes the pressure from pinched nerves, and nature cures the disease. If you are sick, you have luxated vertebrae that cause your condition. Does this not explain to you some of the uncertainties of medicine? Is it not a good reason to your mind why other kinds of treatments may

HOW NOT TO GROW OLD.

Talk cheerfulness. Look on the sunny side of life. Keep on good terms with your wife, your stomach and your conscience. Don't allow yourself to get to counting your birthdays and figuring out how much nearer to the end of it all. Be a child in your living. Live simply and innocently. Don't try too hard to get rich, and above all things don't worship money. Cultivate the spirit of contentment. Dissatisfaction and discontent quickly bring furrows to the cheeks and dullness to the eyes. Avoid criticism and slander. In other words, if you can't boast, don't knock. There is some good in everything. Try to find it. Mr. Union Man—Notry your baybes that the Bell Phone is unfair.

HOW NOT TO GROW OLD.

Give me a chance and I will prove to you the truth of this statement. I will explain to you my treatments and their effect. There is no mystery in my treatments, for every detail is based on truth so fundamental that none can deny them. It will cost you nothing for consultation or examination. Don't shut your eyes and close away in doubt. Put aside all doubt and except my offer. I cannot cure those who lack the faith to try. In this science we use no drugs or medicine. Perfectly understood and practiced, this idea can be used at any time or place, for no mechanical adjuncts are necessary in adjusting the spine. Dr. A. Graham is located at Room 300, Burrows Bldg. Phone, Zenith, 1736-Y. Have you seen the "Fitwell's" \$15 black suit?
