

\$17.50 Will Buy a \$38.50

Suit Here Tomorrow

See the handsome suits in our west show window tomorrow—look at them—aren't they finer than any suits you've seen sold for so little as \$17.50? True there are not many of a kind. What matters that to you so long as you find your size and as there are all sizes in the lot, though not all sizes in any of the various lines? You are sure to be pleased if you come tomorrow.

The suits are styles that appeal to good dressers because of their smartness and uncommonness.

There are tans, grays, hair line striped navies and plain blacks in variety sufficient to please you. They are lined with fine peau de cygnes. The styles are up-to-date as a spring fashion plate. Our regular prices were \$28.50 to \$38.50—tomorrow the choice of this fine lot for only \$17.50.

LET US MAKE THE BUTTONS TO MATCH YOUR NEW DRESS.

SOCIALISTS ARE FOR STRICTEST ECONOMY

Record of the Party in Milwaukee Abundantly Evidences This.
Has Saved Milwaukee Taxpayers Many Thousands of Dollars.

By Carl D. Thompson.
The Socialists of Milwaukee have made another notable achievement. By readjusting the basis of taxation they have been able to abolish the custom of issuing bonds for street improvements and docking and dredging. Now that seems innocent enough, until it is discovered that as a result there is a saving to the people of the city of \$77,118.00 annually.

the city \$1.40 before all of the interest is paid and the bonds retired. In this way, under former administrations, the city has been issuing bonds that run for twenty years for docking and dredging work which should have been paid for each year. It has also been issuing bonds for street construction. The pavements would last about five years, and then another set of bonds would be issued to pave the same street. That would last about five years and then another set of bonds would be issued. So that in some cases the city was actually paying interest on three sets of bonds on one street. And as the city grew, the amount issued for street construction increased, and with it the interest charges on the bonds. This interest charge alone grew from \$2,500 in 1892 up to \$90,000 in 1910. And every year it would have increased had not the Socialists halted the custom.

This is an illustration of how the old administration have wasted the resources of the city. The present administration has halted the custom and henceforth bonds will not be issued for this purpose.

Minnesota State Federation of Labor convenes in Mankato, June 19.

ALGER SMITH & CO., LUMBER INDUSTRY
Manufactures and Wholesale Dealers Lumber Products of Every Description.

No industry has been a more important factor in the growth and development of the northwest than the lumber industry, and in Duluth it is practically the basis of more than half of our wonderful progress and development. It is with great pleasure that we name the firm of Alger Smith & Co., as among the fairest, most honorable and prominently progressive enterprises in the city of Duluth.

The men who comprise the officers and management are men of high standing who treat their employees and patrons with every consideration. They have proven themselves to be broad-minded and public-spirited and all their dealings with the public they have been universally courteous, fair and conservative.

In extending to this firm our hearty support and co-operation we feel that we are showing that spirit of reciprocity which is due to those concerns which treat the great question of labor with the utmost consideration and fairness. The energetic and sagacious business men who have the management of this company, framed the course of business methods pursued and made this concern such a notable and important success are men of pronounced business and executive ability, have always exhibited a most friendly and considerate attitude toward the cause of labor, and consequently command the highest respect and confidence of the men who toil.

The main offices of the company are located on the fifth floor of the Lonsdale building. The offices are large, practically arranged, and well adapted to meet the needs of a concern doing so large a volume of business as Alger Smith & Co.

To Build Labor Temple.

JOPLIN, Mo., June 7.—The central body of Joplin, Mo., has taken the preliminary steps to construct a labor temple. A building organization has been almost completed, and it is expected that each union in the city will participate to the full extent of its ability.

KELLEY-HOW-THOMPSON WHOLESALE HARDWARE
Company That Occupies a Prominent Position in the Wholesale Commercial World.

The city of Duluth has occasion to be proud of its many business enterprises but none has reflected more credit to the community than the Kelly-How-Thompson Hardware Co. On account of their liberal manner in dealing with their patrons and the courtesy and fairness extended by them to all they are accorded the good will of all our people. The growth of the company has been phenomenal as is evidenced by the fact that it is doing business today on capital more than forty times as large as it started with some fourteen years ago, this fact is most significant and tells a story of progress and development most creditable to the men in charge of the firm's activities. It tells a story of growth and development so rapid as almost to challenge belief. To build up such an immense business in so short a time and to hew out for itself such a prominent niche in the realm of commercial activity is making history with a vengeance. No house in its line can show such proportionate gains as has been made by the Kelly-How-Thompson company. It has been able to keep its business always increasing, not spasmodically, nor in a small way, but steadily and in such fashion that each year's totals have shown a splendid increase over those of the preceding year.

Beginning in 1896 as the Kelley Hardware company, with a capital of \$25,000 and a plentiful supply of energy, enthusiasm and knowledge of the business, there was never a backward step, but continually onward and upward. Five years later, in 1901, B. W. How became a member of the firm and the capital was increased to \$150,000. With this addition to the firm and its working capital the company extended its fields and made such gains that two years later the Thomson-Graskin company was absorbed, the style of the company becoming the Kelly-How-Thompson company and the capital again increased to \$300,000.

In January, 1903, it moved into its splendid new building on Fifth avenue west, planned and erected to accommodate the business in the best possible manner.

At the annual meeting of the stockholders in July 1905, it was evident from the growth in the volume of business that a further increase in capital was advisable and it was voted to increase the capital stock to \$500,000. In the two years following the business expanded to such an extent and the prospects for its further growth were so great that the working capital was once more doubled, the last increase being made last year. The high reputation of the house is built upon a solid foundation in the splendid line of hardware it places on the market under the "Hickory" brand. The trade has learned that any article with the "Hickory" stamp on it is

dependable in every way, as the greatest care is exercised in applying this brand only to products that would stand up under any test to which they might be subjected. This fact, in connection with the reduced prices that can be made by reason of the lowest freight rates on account of the lake haul and the elimination of one handling has created a great and ever increasing demand for this brand.

The home of the Kelly-How-Thompson company is a fine seven story modern equipped building, in which there every evidence of well balanced and smoothly working system for the proper housing, care and handling of the stock. In office, factory, warehouse and shipping rooms, everything moves along with clock like precision and dispatch. Add to these facts and conditions already alluded to a liberal, wise and efficient management, and the reasons for the remarkable success and phenomenal growth of the Kelly-How-Thompson company are manifest.

The trade of the house is extended into all the territory between and including upper Michigan and Montana and this country is well covered by a large force of travelling men.

The directors of the company are: M. H. Kelley, J. F. Killorin, A. D. Thomson, George W. Wells, and B. H. How.

FOR WOMAN SUFFRAGE.
MADISON, Wis., June 7.—Both houses of the Wisconsin legislature have passed a bill granting suffrage to women. It will now go to the people for approval.

Exclusion At Any Cost.
WASHINGTON, June 7.—William Morris Hughes, acting premier of Australia, openly declares that "Australia will never agree, except at the word's point, to admit Japanese immigrants, even should the refusal mean separation from the mother country."

Detectives Still Active.
LOS ANGELES, Cal., June 7.—The grand jury in Los Angeles have returned indictments against Bert H. Conners, A. B. Maple and F. Ira Bender, charging them with dynamiting the Hall of Records in that city last September. The first two are iron workers and the latter is president of the local lodge of blacksmiths. Bail was fixed at \$25,000 in each case.

McArdle Re-elected.
CANTON, Ohio, June 7.—P. J. McArdle, for a number of years the president of the Amalgamated Association of Iron, Steel and Tin Workers, has been re-elected at a convention just recently held in this city.

Port Myers, Fla. unions have secured an increase for all organizations in the town of 25 cents per day without friction.

Some people never reach the top because they get tired too near the bottom of the ladder.

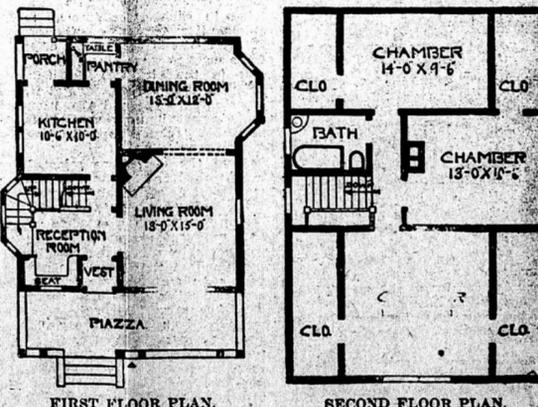

Stove molders at Spring City, Pa., obtained an increase of 5 per cent.

Cottage in Bungalow Style.

Design 867, by Glenn L. Saxton, Architect.

PERSPECTIVE VIEW—FROM A PHOTOGRAPH.

This design is built on bungalow lines and makes a very striking appearance. The first story is very carefully laid out so as to get the most possible space out of the given area. In the second story there are three large chambers, bathroom and splendid closet space, and all the rooms are finished in full height. Size 25 by 28.5 feet. There is a full basement seven feet in height. First story is nine feet high and second story eight feet. The first story is finished in red oak or birch and the second in pine to paint. Cost to build, exclusive of heating and plumbing, \$2,100.

By special arrangement with me the editor of this paper will furnish you complete set of plans and specifications of design No. 867 for the sum of \$15. GLENN L. SAXTON.

- July 17—Boston, Mass., International Steel and Copper Plate Printers' union.

Minnesota State Federation of Labor convenes in Mankato, June 19.

CHILD LABOR OUTRAGES IN STATE OF VIRGINIA

Cotton Manufacturing Industries Are the Chief Transgressors Against the Law.

RICHMOND, June 7.—Revelations of an appalling character have been brought to light by Dr. A. J. McKeelway, secretary of the National Child Labor committee, relating to the abuses of juvenile labor in the cotton manufacturing industry in Virginia and the south. "If you attempt to pass a drastic child labor law at the next general assembly, you will find a lobby to defeat it composed almost entirely of representatives of the cotton industries. In statistics it has been discovered that 70 per cent of the children employed in the cotton industries of Virginia are illiterate. In Alabama the percentage is lower by 5 per cent.

Just a Boy, but He Will One Day Be Emperor of Germany

HERE is a boy—just a fun loving boy—who will some day be emperor of Germany and king of Prussia unless events occur which at present can't be foreseen. But the day when he will ascend the throne is in the distant future unless other events of an unexpected nature occur. But such events are not improbable when one is considering European nobility, and Prince William Frederick, born July 4, 1906, may not have to wait until his grandfather and his father die orderly deaths before becoming a real ruler. Should he have to wait the wait may be long. His grandfather, Emperor William, is only fifty-two years old, and his health is fair. His father, Crown Prince Frederick William, is only twenty-nine, and he is what insurance men would regard as "a good risk" so far as physical conditions are concerned, so the date when the boy will ascend the throne is probably far ahead. But this does not bother the boy a whit. He is content to be a boy, and the life he lives is like that of thousands of other boys in Berlin and other portions of the German empire. He works a little harder, perhaps, than the others, and he is hedged around by a few more bothersome rules, but in a general way Prince William Frederick is merely what the picture indicates, just a boy.
