## 30,000 MINERS IN ENGLAND ON STIRKE

All Mines in Wales Threatened by Walkout-Government Appealed To.

LONDON, Sept. 3 .- The South Wales strike situation has grown more serious. Dispatches from Cardiff, Newport and other coal centers say the striking miners have refused to ite with the trade and especially with heed the advice of their executive council to return to work bending megotiations with the government. More than 30,000 of the 200,000 represented in the South Wales federation are now idle.

Word has come from Newport that probably every miner in the Mon-mouthshire district will quit work unless the conferences in London show a disposition on the part of the government to recognize the miners' claims. Four thousand more miners quit work in Monmouthshire last

Miners officials arrived here Saturday to renew their attempts to convince President Walter Runciman of the government board of trade that his arbitration award had fallen far short of the promises made by the government

If Runciman ignores the miners' representatives for the second time and refuses them a conference, at least half the miners in South Wales are expected to quit work.
