Steam Not Needed.
In Death valley, California, the summer temperature in artificial shade soars to 135 degrees, with 1 per cent of humidity.

Nobody Envy's a Dead Man.
Everybody envies the man who is going to die rich, but the moment he is dead everybody ceases to envy him.

Have Some.
Okolehao, which is Hawaiian moonshine, is similar to a combination of vinegar and alcohol.

How to Tell Sapphires.
A really good sapphire should appear blue by artificial light as well as daylight; some stones have a trace of black, and some red, the latter making them resemble amethyst, especially by lamplight, or gaslight.

Consider the Centipede.
It is a mistake to suppose that all centipedes have a hundred legs. The name is misleading. The most common variety usually have 34, but there are other species with as many as 100 or 200 legs.
