THE TWO ELIZABETHS.

Society in Undress as Discussed by Two Eminent Ladies.

MRS. STANTON AND MISS CLEVELAND.

The question of Low Necks, Wide Busts and Bare Arms Exhaustively Considered.

Elizabeth Cady Stanton, in a long letter addressed to Miss Cleveland upon the subject of ladies' dresses, makes the following historical and philosophical comments in regard to low necks and bare arms:

Woman's dominion over man was always supposed to be purely physical, and just in proportion as she could rouse his passions and hold him by those attractions to which he was most susceptible, he was her slave for the time being. Dress plays a most important part in this kind of domination, which those who make a study of the passionate nature of man thoroughly understand, and drape their persons accordingly. In the early history of the race, men hunted for wives as they now do for other game, and captured the choicest they could find. These hunters except their own persons, which they interfered with one another. The woman's chief pride and distinction was to be among the stolen. The next step was to make their husbands, and to those who came to purchase claimed the right to see the article offered, the scanty dresses of the time, and to display the greatest attractions. But once in the possession of the happy owner, the charms were to be exclusively veiled from all outside observers. Ample men are so selfish and exacting. They allow their wives and daughters to unveil before all eyes and the sun.

In Eastern nations the ideal woman was helpless and modest in the extreme—safe only in seclusion; hence one might guess she should be seduced by her attractions, nor her vanity cultivated by undue observation. The owner wished all her little arts concentrated on himself, and to display the greatest attractions. But once in the possession of the happy owner, the charms were to be exclusively veiled from all outside observers. Ample men are so selfish and exacting. They allow their wives and daughters to unveil before all eyes and the sun.

As a suit against the National Accountant.

The National Baseball Club has found its way into court, and there is a likelihood of some active litigation. Daniel O'Brien and James Ragan, stockholders of last year's club, through their solicitor, Daniel E. Cahill, to-day filed a bill in equity against Robert C. Hewitt, Charles E. White, Robert M. Drinkard, Henry B. Bennett, Michael B. Scanlon and A. T. Britton, the stockholders of the present club, for discovery and account. All of the defendants are said to be members of the defunct National Club, excepting Mr. Britton, who is a member of the new organization, known as the Washington National Baseball Club.

The bill recites that because of the failure of White to make a final account the earnings and profits cannot be stated. It claims that at the time of the dissolution of the old club there was a grand stand worth \$550, chairs worth \$225, other personal property and \$300 advanced to players for expenses to be repaid.

A paper was filed by all of the parties after ineffectual efforts had been made to induce them to join the new baseball organization, by which Messrs. Ragan and O'Brien each agreed to accept, in thirty days, \$250 in full settlement of their claims. They have demanded this sum from Mr. White and been informed that he had no money with which to make liquidation. It is also stated that the assets of the old club is being transferred to the Washingtons, and the complainants pray for an accounting, etc., the assets of the club at the time of the making of the paper filing, and the payment of a decree directing that the complainants be paid the sums found due them.

Why should young women longer display their arms and shoulders? Being possessed of higher charms and filling positions of honor and independence and claiming equal social and political rights with men, why should they unveil their charms to all eyes and the sun? It is a question of self-respect and of the respectability of the sex.

They are a degradation of the human soul, and a degradation of the human spirit. They are a degradation of the human race, and a degradation of the human world.

to whom this style of dress is becoming and comfortable follow.

I approve of showing dress which shows neck and shoulders, but which does not show the bust. Between the neck and bust there is a line always to be drawn. It is clear to the most frivolous society women that the most fashionable line never be passed, and a fashionable woman's low-necked evening dress does not show her bust. It is so, it is because she prefers to be so. It is wholly false so far as I have observed that the American woman can wear the evening dress up to the lobes of her ears if she likes. There is no Queen to command any woman to wear a certain dress. The dress which is worn is a matter of choice, and it is indeed shocking, unbecomingly revealing and deserving of the utmost denunciation on the score of morality, beauty, health and every other consideration which good men and women should comprise to preserve and exact. There is need of very few words on this subject, and no argument. Any American woman who wears the evening dress up to the lobes of her ears if she likes, there is no Queen to command any woman to wear a certain dress.
