BAHNSTOCK'S
VERMIFUGE.

WHY IS IT THAT SO MANY children die under the age of five years? That a large proportion of children die under that age, has long been a subject of remark, and without a satisfactory cause ascertained, it is certain. Also, it is known that worms exist in the human system from its earliest infancy; therefore parents, especially mothers, who are more constantly with their children, cannot be too observing of the first symptoms of worms; for so surely as they exist, can they be

SAFELY AND CERTAINLY removed from the most delicate infant, by the timely use of

B. A. FAHNESTOCK'S VERMIFUGE.

It is perfectly harmless, contains no Mercury, being a PURELY VEGETABLE COMPOSITION, and may be administered with the utmost SAFETY TO CHILDREN OF ALL AGES.

Worm Confections, made more for the purpose of pleasing the palate than of overcoming the disease, have been manufactured all over the country, but their short lease of life is nearly exhausted, and B. A. Fahnestock's Vermifuge continues to grow in favor daily.

CAUTION

Should occasion require you to purchase B. A. Fahnestock's Vermifuge, be particularly careful to see that the initials are B. A. This is the article that has been so FAVORABLY KNOWN SINCE 1829, and purchasers must insist on having it, if they do not wish to have an imitation forced upon them.
