

## Ague Cure

Is a purely vegetable bitter and powerful tonic, and is warranted a speedy and certain cure for Fever and Ague, Chills and Fever, Intermittent or Chill Fever, Remittent Fever, Dumb Ague, Periodical or Bilious Fever, and all malarial disorders. In malarial districts, the rapid pulse, coated tongue, thirst, lassitude, loss of appetite, pain in the back and joints, and coldness of the spine and extremities, are only pronouncements of severer symptoms, which terminate in the ague paroxysm, succeeded by high fever and profuse perspiration.

It is a startling fact, that quinine, arsenic and other poisonous minerals, form the basis of most of the "Fever and Ague Preparations," "Specifics," "Syrups," and "Tonics," in the market. The preparations made from these mineral poisons, although they are palatable, may break the chill, but do not cure, but leave the malarial and their own drug poison in the system, producing quinine, dizziness, ringing in the ears, headache, vertigo, and other disorders more formidable than the disease they were intended to cure. AYER'S AGUE CURE thoroughly eradicates these noxious poisons from the system, and always cures the severest cases. It contains no quinine, mineral salts, or any thing that could injure the most delicate patient; and its crowning excellence, above its certainty of cure, is that it leaves the system as free from disease as before the attack.

For Liver Complaints, AYER'S AGUE CURE, by direct action on the liver and biliary apparatus, drives out the poisons which produce these complaints, and stimulates the system to a vigorous, healthy condition.

We warrant it when taken according to directions.

Prepared by Dr. J. C. Ayer & Co., Lowell, Mass.

SOLD BY ALL DRUGGISTS EVERYWHERE.

### THE LIVER AND ITS FUNCTIONS.

It has become a well established fact that the larger portion of diseases to which the human family is subject arise from some derangement of the Liver. This organ is not only the largest, but at the same time the most important. The venous blood, on its return to the heart, passes through this organ, and in its passage the impurities are also the secretions which are necessary for digestion as well as for a healthy state of the system. From this it is easily seen that the Liver is the great purifier of the blood, and that it is the source of all the poisons of which the system is so often the victim.

With impure blood the system is diseased, and no organ can properly perform its functions unless it is supplied with pure blood. The Liver, therefore, is the great purifier of the blood, and it is the source of all the poisons of which the system is so often the victim.

It is a well known fact that the Liver is the great purifier of the blood, and it is the source of all the poisons of which the system is so often the victim.

It is a well known fact that the Liver is the great purifier of the blood, and it is the source of all the poisons of which the system is so often the victim.
