

It Pays! It Pays!!

WHAT PAYS? It pays every Manufacturer, Merchant, Mechanic, Inventor, Farmer, or Professional man, to keep informed on all the improvements and discoveries of the age.

It pays the head of every family to introduce into his household a newspaper that is instructive, one that fosters a taste for investigation, and promotes thought and encourages discussion among the members.

The Scientific American which has been published weekly for the last thirty years, does this, to an extent beyond that of any other publication, in fact it is the only weekly paper published in the United States, devoted to Manufacturers, Mechanics, Inventions and New Discoveries in the Arts and Sciences.

Every number is profusely illustrated and its contents embrace the latest and most interesting information pertaining to the Industrial, Mechanical and Scientific Progress of the World; Descriptions, with Beautiful Engravings, of New Inventions, New Implements, New Processes, and Improved Industries of all kinds; Useful Notes, Receipts, Suggestions and Advice, by Practical Writers, for Workmen and Employers, in all the various arts, forming a complete repository of New Inventions and Discoveries; containing a weekly record not only of the progress of the Industrial Arts in our own country, but also of all New Discoveries and Inventions in every branch of Engineering, Mechanics, and Science abroad.

The Scientific American has been the foremost of all industrial publications for the past Thirty Years. It is the oldest, largest, cheapest, and the best weekly illustrated paper devoted to Engineering, Mechanics, Chemistry, New Inventions, Science and Industrial Progress, published in the World.

The practical receipts are well worth ten times the subscription price. And for the shop and house will save many times the cost of subscription.

Merchants, Farmers, Mechanic, Engineers, Inventors, Manufacturers, Chemists, Lovers of Science, and People of all Professions, will find the Scientific American useful to them. It should have a place in every Family, Library, Study, Office, and Counting Room; in every Reading Room, College and School. A new volume commences January 1, 1876.

A year's numbers contain 832 pages and several hundred engravings. Thousands of volumes are preserved for binding and reference. Terms, \$3.20 a year by mail, including postage. Discount to Clubs. Special circulars giving Club rates sent free. Single copies mailed on receipt of 10 cents. May be had of all News Dealers.

Patents. In connection with the Scientific American, Messrs MUNN & Co. are Solicitors of American and Foreign Patents, and have the largest establishment in the world. More than fifty thousand applications have been made for patents through their agency.

Patents are obtained on the best terms. Models of New Inventions and Sketches examined and advice free. A special notice is made in the Scientific American of all Inventions Patented through this Agency, with the name and residence of the Patentee. Patents are often sold in part or whole to persons attracted to the invention by such notice. Send for a Pamphlet, containing full directions for obtaining Patents. The Weekly Sun.

1876. NEW YORK. 1876. Eighteen hundred and seventy-six is the Centennial year. It is also the year in which an Opposition House of Representatives, the first since the war, will be in power at Washington, and the year of the twenty-first election of a President of the United States.

All of these events are sure to be of great interest and importance, every citizen of the United States, and all who are connected with them will be fully and freshly reported and expounded in THE SUN.

The Opposition House of Representatives, taking the line of issue opened years ago by the SUN, will sternly and diligently investigate the corruptions and misdeeds of Grant's administration; and will, it is to be hoped, lay the foundation for a new and better period in our national history. Of all this the SUN will contain complete and accurate accounts, furnishing its readers with early and trustworthy information upon these absorbing topics.

The twenty-third Presidential election, with the preparations for it, will be memorable as deciding upon Grant's aspirations for a third term of power and plunder; and will more as deciding who shall be the candidate of the party of Reform, and as electing that candidate. Concerning all these subjects, those who read the SUN will have the constant means of being thoroughly well informed.

THE WEEKLY SUN which has attained a circulation of over eighty thousand copies, all ready has its readers in every State and Territory, and we trust that the year 1876 will see their numbers doubled. It will continue to be a thorough newspaper. All the general news of the day will be found in it, condensed and unimportant, at full length when of moment; and always, we trust, treated in a clear, interesting and instructive manner.

It is our aim to make THE WEEKLY SUN the best family newspaper in the world, and we shall continue to give in its columns a large amount of miscellaneous reading, such as stories, tales, poems, scientific intelligence and agricultural information, for which we are not able to make room in its daily edition. The agricultural department especially is one of its prominent features. The fashions are also regularly reported in its columns; and are the market of every kind.

THE WEEKLY SUN, eight pages with fifty-six broad columns is only \$1 20 a year, postage prepaid. As this price barely repays the cost of the paper, no discount can be made from this rate to clubs, agents, Postmasters, or anyone.

THE DAILY SUN, a large four page newspaper of twenty-eight columns, gives all the news for two cents in its daily edition; postage prepaid, 65c a month or \$6.00 a year. Sunday edition extra, \$1.10 per year. We have no traveling agents. Address, THE WEEKLY SUN, New York City. Nov 25, 1875-17.
