

THURSDAY MORNING, April 26, 1877.

ERRATA.—In the letter of our Richmond correspondent, published in last Beacon, there occurred several press errors which, in justice to the writer, we correct in our present issue.

CONTINUATION OF COURT PROCEEDINGS.—Thursday, March 29, Judge Ford on the bench.

State vs. William Lane and E. D. Slatum. Indictment for dredging in St. Mary's river. Tried by Court.

Friday, March 30th. The Court met. No case of public interest engaged the attention of the Court.

Saturday, March 31st. The case of State vs. Geo. W. Smoot, indicted for Bigamy, called up and postponed until Tuesday, 3rd proximo. State's Attorney and R. C. Combs (assigned by Court at request of State's Attorney) for State. James H. Wilson, Colonel and George Blakistone for traveler.

The Grand Jury after submitting their report on the condition of the jail, etc. were discharged with the thanks of the Court.

We extract from the report the reference to County Expenditures which this Grand Jury had in charge to report upon at the present term.

"That we have in the discharge of the duty imposed upon us, carefully examined the reports of county expenditures for the year 1876, made by the County Commissioners to the Grand Jury at the September term of the Circuit Court.

"That we have also carefully considered the report of said Grand Jury on the report of said Commissioners made to the Court at said term and that in our judgment the various presentments and recommendations therein made are eminently just and proper, for the reasons therein set forth, with one exception, viz: 'That the per diem of Jurors be reduced to two dollars.'

"That we do not concur in recommending said reduction in the per diem of Jurors, because we think they would then not receive for their services a sum sufficient to defray the necessary expenses of attending Court."

Monday, April 2nd. The Court met, but no business of interest to public transacted.

Tuesday, April 3rd. The case of State vs. Geo. W. Smoot called up on motion of State's Attorney for a postponement. After arguments, the Court postponed the case until Thursday, the 26th inst.

The Petit Jury were then discharged with the thanks of the Court until Thursday, the 26th inst.

SPRING MEETING.—The Spring Meeting of the Carroll County Agriculture Society will come off at Westminster in that county on May 29th, 30th and 31st, premiums offered amount to \$2000.—

First day, tournament, 1st prize \$100 gold watch, 2d prize \$40 silver watch, 3d prize \$20 silver watch, purse \$400 for horses that never beat 2:35. Second day, purse \$300 for horses that never beat 3:00, purse \$350 for horses that never beat 2:40. Third day, purse \$300 for horses that never beat 2:50, purse \$500 for horses that never beat 2:30. From the very liberal premiums offered it is expected that there will be some of the finest riding at the tournament ever seen in this State and the purses ought to induce some of the best trotters to enter.

NEW ADVERTISEMENTS.—Attention is called to the change of hours in the departure of the Steamer Sue from Foxwell's wharf. See notice in another column.

The attention of farmers is called to notice of Eureka Guano, John H. Waters, Esq., agent, to be found in our present issue. Mr. Waters showed us many certificates from farmers in our county who have used the Eureka with good effect and intend using it this Spring again. The Post Office address of the Agent is California, St. Mary's Co., Md.

SOUTHERN MARYLAND RAILROAD.—Once again we are pleased to state, (reports of retiring contracts, etc., to the contrary notwithstanding) that running in curves and other final engineering work is progressing with increased activity along the line of the road in our county, and further we have been allowed to inspect orders received from headquarters as late as yesterday which precludes any idea of delay in completing the road.

WHEAT PROSPECT.—The wheat prospect in our county this year is unfavorable. In the first place, there was a small crop seeded, secondly, it came up badly, thirdly, much of it was winter-killed and lastly, it is unusually backward and is making slow headway a growth.

THE POLITICAL SITUATION.—Whatever doubts may have been entertained of the ultimate success of President Hayes in reference to the withdrawal of Federal troops from the capitals of South Carolina and Louisiana, will be completely abandoned of the carpet-bag governments in those States, have been removed and at last set at rest, so far at least as the former State is concerned. An order has been adopted by Hayes and his Cabinet setting the Federal forces from their old guardianship of the State House at Columbia and re-locating them to proper quarters. The effect of this move will be, to supplement military by civil authority in the State, to open the Courts to all comers and make their decisions more of paramount effect. It also means the squelching of Chamberlain and his following, and the future rule of South Carolina by South Carolinians. In the contemplation of the wise and equitable action of the President in this matter, we are tempted almost to forget that the chief magistracy of the country has been wrongly if not corruptly appropriated and is now enjoyed by one utterly without equitable and with a very questionable legal claim to it. But all this is now in the condition of "spilt milk," and is referred to here, and not especially, more in sorrow than in anger. The liberation of Louisiana must soon follow. Indeed, we believe now the Commission that is on its way to New Orleans was organized with a view to make out such a case against the carpet-baggers of that State as would enable Hayes to abandon Packard and withdraw the troops without shocking his own party following. The proposed apparently fair mode of procedure under which the Commission is to act, we regard as a mere blind to deceive Packard. The new legislature which is intended to be called by the Commission will abolish carpet-bagism in the State and the hand of Mr. Hayes will not be seen in the transaction. This will be double-dealing on the part of His Excellency with the very people who made him President, but Mr. Hayes sees very clearly either Packard or the army must be parted with. The truth is, the qualifying clause attached by the last Congress to the army bill has settled the fate both of Chamberlain and Packard, but praise and applause should not be altogether withheld from Mr. Hayes on this account. To do him justice, we believe that, having got out of the carpet-baggers all that he could, he is now sincerely anxious to cut loose from them and to institute honest home rule over the whole South.

PROMPT ADJUSTMENT.—The London & Liverpool Royal Fire Insurance Company, (Joseph H. Key, Esq., of our town, agent), have settled with Mr. J. Philip Greenwell for the full amount of his insurance on the mill-house destroyed by fire a few days ago. The prompt and upright dealing of this company with its patrons is passing into a proverb here and is obtaining for its general confidence and wide popularity.

PHOSPHITZ VS. PROFITS.—If a man wishing to buy goods were to go into the store of a merchant, and find by the hieroglyphics, representing the cost mark, and the figures, representing the sale price, that the goods were marked from 100 to 200, 300, 400 and 500 per cent. profit, I doubt not that if he were sane he would turn and walk out, and congratulate himself as though he had escaped from a den of thieves.

Well, in the Baltimore Weekly Sun of 24th February, it is stated that a Dr. Nichols, State Chemist of Massachusetts, said in a lecture before the Board of Agriculture of that State, that the average cost of 17 different kinds of Superphosphates was about 33¢ per cent. of the sale price; or, in other words, that the Farmer paid \$50.00 for \$16.35 worth of manure, and in one case \$50.00 for \$7.50 worth of manure.

About two or three years ago, a Chemist gave a similar lecture in Philadelphia. I have not the authority at hand.

If this practice of buying almost worthless manure is pursued, can the Farmer look with reason for better times? I think common sense answers No! But he may look with perfect certainty for the time of penny and want, and the time when he will be a renter of his (now) own farm.

All will not go down together, nor does it kill all, but leaves a historian. The harder the times, the better the time for money to make money, and the greater number of Shylocks appears on the stage to demand their Pound of Flesh.

Saint Mary's County is out of pocket not less than from two to five million of dollars for Guano, Manipulated Superphosphates and Phosphites.—The Nomenclature extends from Royal to Archimedes ecstasy, and I propose gratis a name for the next Trade Mark the Farmer's Ignis Fatuus.

Farmers, generally, not all, (except those prove general rules) are following the practice of the unskilful card-player. He puts down his last V to get back his lost pile, and anon, it is gone to swell the lost pile.

The apparent benefit and effect attributed to fertilizers are sometimes unwarranted. I will relate two cases which came under my own knowledge. A few years after Peruvian Guano was introduced as a fertilizer, by some

cases the sheep would not graze in time for the winter. A gentleman who has been perfectly satisfied with the Guano, says that he had 7000 Guano, I should have been perfectly satisfied with the Guano. My wheat was fully equal to my neighbor's over the fence, in grain, straw and in every particular. But there was not a particle of anything on a manure. Again, about the year 1870, I laid off about ten acres for tobacco. To get the ten acres in one square piece, I had to take in about two acres of very poor corn land. Intending to use fertilizer on all of it, I stretched the measure raised on the farm, consisting of dirty, unrotted manure, called manure, over the ten acres. It was more of a caricature and burlesque, than a manure. I could not get the fertilizer because I could not get the manure. I would plant it, and perhaps I would be able to get it after the tobacco was planted, and use it as I had seen it done by a farmer, with good effect. But I could not get it, and used none. The tobacco on the poor land grew well, and stood from 3 to 5 feet high. On the old improved part, the tobacco was very large and heavy. Now if I had used fertilizer, in this case, I should have been perfectly satisfied with the result.

I have generally thought, that any land that would grow a tolerable plant of tobacco, would bring a good crop of wheat. Here I was greatly disappointed. I sowed just one bushel to the acre. I got 163 bushels, though the wheat did not fill well; and on the poor part added to the old tobacco level, the wheat was so low and weak, that my Reaper would not cut it.

The Farmer who uses Fertilizers extravagantly becomes a renter of his own farm, and his hand is tied in Baltimore. I knew a Farmer who bought ten tons one Spring. I think \$250 or \$300 would be a fair rent for his farm. I suspect the ten tons, (perhaps bought on time), freight, commission, carting home and putting on, cost about \$600. This is just two rents, at my estimate of the rental value of his farm. Now if he had been a real renter, he would have paid \$300 or three rents for his farm.

With this mode of farming, and a county tax almost the half of England's interest, does it require an Elisha to tell the changed condition of Saint Mary's Farmers in the near future? HARRIS.

[COMMUNICATED.] Messrs. Editors:—After reading the inaugural address of 'his Fraudulency' I was in hopes that he would endeavor to bring about a better state of affairs in the South. A month has now elapsed since he had the pleasure of taking Tilden's seat, and things are getting no better. Like his predecessor, he makes promises only to break them. Yet what better can we expect from a man who was guilty of accepting the Presidency when he knew full well that he was not elected? I trust, however, that the day of retribution is not far distant. The very manner by which he *crept into power*, and the wretched system which he is now attempting, in the hope of gaining favor, will in the natural course of their operations turn back upon him.

The Commission which he now urges to settle the difficulties in the South, cannot possibly be approved by any honest democrat. Already the one which has legalized a fraud by placing him in power will rest as a curse upon us and be handed down to posterity as the foulest blot on the pages of history. This transaction has furnished us with a valuable piece of instruction. It has brought home to our minds a solemn truth. It has taught us that the professions and promises of aspiring demagogues are put on to entrap the unwary and deceive the unsuspecting. It has convinced us that men who were thought to be infallible are not to be trusted when *party is in the way*. It cannot be expected that we shall sit calmly down and brood over this affair in silence. Although we have been cheated out of our lawful President, our Representatives are to blame to a certain extent. Therefore it is only right that we should submit with the good citizens of New York, Editors, there is no reason that we should a second time submit to a measure which we have every reason to believe will result as the first. So far as South Carolina is concerned, I have never felt any doubt as to the final recognition of Hampton. His letter to Gov. Hayes was a wise stroke of policy. It was very gratefully received by 'his Fraudulency' at that particular time; it enabled Hampton to gain his favor, and at the same time to out-general Chamberlain. The case of Louisiana, as we all know, is very different. Hayes cannot know, knowledge Nichols without admitting his own defeat, and bringing down the curse of his party on his grey hairs. On the other hand, he cannot recognize Packard without going back on his Southern policy—hence this Commission is ordered to take the burden from his own shoulders. The democrats have been deceived enough by false promises, and if they order any more Commission by word or act, may the curse of an outraged people rest upon them forever. Let Hayes withdraw his troops and the people will decide for themselves as to who was their choice at the ballot-box. It is only natural that they should feel no inclination to relinquish a right which was guaranteed to them by the Constitution. The man for once deceiving the liberty who can behold with indifference any attempt which may be made to wrest from him the right of suffrage, and who will not exert himself to preserve it inviolate from the ruthless hand of tyranny? Alas! alas! farewell to the dignity of manhood if the most that we can say under oppression is, let, or let me die in peace! G. F. D.

THE CHICAGO TRIBUNE.—The Chicago Tribune has just published a long and interesting article on the subject of the tobacco trade in this country. It contains many valuable facts and figures, and is well worth a perusal. The article is headed "The Tobacco Trade in America," and is written by a correspondent who is well versed in the subject. It discusses the history of the tobacco trade, the present state of the industry, and the prospects for the future. It also mentions the fact that the tobacco trade is one of the most important sources of revenue for the Government, and that it is a source of employment for many thousands of people. The article is well written and contains many interesting details.

THE NAMES OF NAILS.—The terms "four-penny," "six-penny," "ten-penny," etc., as applied to nails, mean this: "Four-penny" means four pounds to the thousand, and so on. It is an old English term and meant, at first, "ten pound" nails (the thousand being understood); but the old Englishman clipped it to "ten-penny," and from that to "ten-penny," and so it degenerated, until "penny" was substituted for "pound." So, when you ask for four-penny nails, nowadays, you want those of a thousand which will weigh four pounds; but in these degenerate times, we question whether you will get as many as a thousand in that weight.—When a thousand nails weigh less than one pound they are called tacks, brads, etc., and are reckoned by ounces (to the thousand); so you will see "8-oz.," "10-oz.," "16-oz.," etc., on papers of tacks.

VERMONT GREEN'S ADVERTISEMENTS.—We have just received this irresistibly funny book, by CURTIS BIRD, and if "every laugh pulls out from one's coffin," the readers of this book will have no need of the undertaker for many a long year. The book is full of wit and humor, and is well worth a perusal. It contains many amusing stories and anecdotes, and is a good read for anyone who enjoys a good laugh. The book is published by G. W. HALL, New York.

PERUVIAN GUANO FOR AGRICULTURE.—We have before us this number of the handsome fashion magazine of Philadelphia, and are sure that it will prove most interesting and delightful reading to all the ladies who are fond of the most fashionable and beautiful of all the arts. The magazine is published by G. W. HALL, New York.

COLONY OF FARMERS, MECHANICS & GOVERNMENT HOMESTEADERS to settle on the new Land Grant of the Little Rock and Fort Smith Railway. Wood-working machinery to be taken along for manufacturing, affording market for the timber and employment for the mechanics. Tickets fare reduced, and certificates given with ticket to refund amount on land purchases. For sectional maps and full information apply to W. D. SLACK, Land Commissioner, or to G. W. HERBOLD, Gen'l Agent, No. 240 West Fourth St., Cincinnati, O.

JACKSON'S BEST Sweet Navy Chewing Tobacco! Which we guarantee to be the finest Navy made. For sale by us in all shapes and sizes. FINE BROS. & CO., corner Eutaw and Franklin Streets, Baltimore. April 5, 1877—4w.

TOBACCO GROWERS! HORNERS' Tobacco SUSTAIN The Great Southern Plant Supporter STANES UNRIVALED IN ITS EXCELLENCE AS A NOURISHING AND INVIGORATING FOOD FOR THE TOBACCO PLANT. It possesses all the stimulating properties of Peruvian Guano, gives vigor to the plant, promotes its growth, and insures a healthy maturity of the crop, without burning or otherwise injuring the plants. Its superior merits are acknowledged by all who have used it.

EUREKA. Ammoniated Bone. STANDARD GUARANTEED. Super-Phosphate of Lime. MANUFACTURED BY THE ATLANTIC AND VIRGINIA FERTILIZING COMPANY. This genuine standard fertilizer continues to give in popularity. Whoever tested by the side of any other, it is pronounced the Best—try it.

STEAMER SUE. Will leave Foxwell's Wharf, near Leonardtown, at 7 o'clock, a. m., instead of 8 o'clock, a. m., as formerly. April 5, 1877—2t.

NEW ADVERTISEMENTS.—WONDERFUL GOODS! 25,000 of the CENTENNIAL EXPOSITION. Sold in 60 days. It being the complete (low-price) set of 170 pages, only 50¢ per copy. The entire history, grand buildings, wonderful exhibits, curiosities, great city, etc.; illustrated, and 500 colored plates, all in one volume. One new agent wanted. Send quickly for proof of above, opinions of officials, clergy and great names. Full description, and other terms. HUBBARD BROS. Firm, 733 Seventh St., Philadelphia. CAUTION Beware of falsely claimed official testimonials and worthless books. Send for \$66 a week in your own terms. Turnover and great cash flow. H. HALLETT & CO., Portland, Maine.

Drunkard Stop! C. G. BERRY, M. D. (formerly of Boston) has a harmless cure for HYPEREMIA, which can be given without the knowledge of the patient. Also one for the OPIUM HABIT. Permanent cures presented in book and stamp for evidence. Ask druggists for it. Address: BERRY & CO., Birmingham, Conn. \$55-\$77 a week to Agents. \$10 per case, recovery. L. JONES & CO., Nassau, N. Y. \$5 to \$80 per day at home. Strout & Co., Portland, Maine.

GEORGE PAGE & CO. Patent Circular Saw, Hand Saw, Wheel, Milling Machine, and other machinery. Also, Patent Circular Saw, Hand Saw, Wheel, Milling Machine, and other machinery. Also, Patent Circular Saw, Hand Saw, Wheel, Milling Machine, and other machinery. Also, Patent Circular Saw, Hand Saw, Wheel, Milling Machine, and other machinery.

Notice to Teachers. A BOARD will be a meeting of the Board of School Commissioners on WEDNESDAY, the 10th INSTANT, to approve Teachers' Reports for the Spring Term, 1877. Teachers are requested to have their Reports in the office by the day of meeting. GEO. THOMAS, Secy. N. B. Teachers wishing books sent them for the remainder of School year will please order for same in their Term Reports and indicate mode of sending. April 5, 1877—2t.

HORNER'S CONCENTRATED SUPERPHOSPHATE FOR ALL CROPS. It is made of the best and most concentrated variety of Western Guano known in Europe, and imported to this country exclusively by the undersigned, who, with the most ordinary cultivation, it flourishes, attaining an enormous size, and yielding a market at prices most gratifying to the producer. Its transplanting great care should be used to give sufficient space for growth. Solid heads, the size of the month of a four barrel, is the average of this choice variety. One package of the seed sent post paid on receipt of 50 cents, and one 3ct coupon stamp. Three packages to one address \$1.00 and two 3ct stamps. Twelve packages sent on receipt of \$3.00.

BOLTON & SONS, DEALERS IN Paints, Oils, Glass, Lanterns, Lamp Goods, Pitch, TAR, OAKUM, KEROSENE, SIGNAL AND MACHINERY OILS, GASOLINE, &c. NO. 92 W. PRATT STREET, BALTIMORE. April 5, 1877—3m.

ESTABLISHED 1848. HORNER'S SUPERPHOSPHATE LIME DISSOLVED BONE MADE OF PURE SLEIGHTER BONE BONES AND CONCENTRATED ANIMAL MEAT. It is richer in Phosphorus than any other market. Samples at Josiah's.

IMPORTANT TO Gardeners AND Agriculturists! Emperor William Cabbage. The best, largest, earliest and most profitable variety of Cabbage known in Europe, and imported to this country exclusively by the undersigned, who, with the most ordinary cultivation, it flourishes, attaining an enormous size, and yielding a market at prices most gratifying to the producer. Its transplanting great care should be used to give sufficient space for growth. Solid heads, the size of the month of a four barrel, is the average of this choice variety.
