

Local Dettings

Will our friends throughout the country be kind enough to furnish us with any local matter of interest in their respective neighborhoods? If anything should appear out of the regular order of things, make a note of it and send it to us.

Brief Mentions

Rain at last. Business dull. Sunflowers are now in full bloom. Vacation is nearly over. The preserving season has begun. Registration began last Monday. Several deaths have lately been seen in the city.

Archbishop Gibbons, of Baltimore, called on Wednesday last, in the Steamship Enterprise, for Halifax.

Rev. Dr. H. P. Moore, of the First Baptist Church, of Leonardtown, Md., is paying a short visit to his friends in our country.

The dinner for the benefit of Welley's Neck church was a great success. Over \$100 was realized.

Vendor predicts a fair but frosty September. The oyster season is rapidly approaching and the restaurants will soon be in full blast.

On Tuesday week corn and wheat were quoted at the same price in the Baltimore markets. Does the oldest inhabitant remember when it was so before?

An exchange says: A good way to make angels is to give the children plenty of green fruit.

The first number of the Enterprise appeared on Wednesday last. There is a great deal of sickness in the country.

Since our last issue no new race of snail-pox has been reported. Mr. H. P. Moore gives tonight a grand ball. From our knowledge of Mr. Moore's still in such affairs, we can confidently predict that it will be a grand success.

Our thanks are due to Mr. Black Green for copies of his speech in the U. S. Senate. His A. D. Green will also accept thanks for Congressional Record, speeches and other favors.

The dinner for the benefit of St. John's church was held on Wednesday last. Last Tuesday was the Feast of the Assumption.

Up to our ears going to peas; they were registered in this district 88 white and 49 black.

There will be a three days Mission at St. George's Church, beginning on Sunday, August 20th.

St. G. Jones & Co. This well-known firm has again this week laid before our readers the excellent qualities of their high grade fertilizers. As H. H. Hayden, Sec. of our country, is with them, we are confident to find cheer and give them a call.

Real Estate. We call attention to the advertisement of Messrs. Moore & Morgan, Agents, offering for sale the handsome residence and grounds, the property of Mrs. Geo. C. Morgan, situated in our village. This residence has been long known as the most desirable in the county on account of its location, and beauty. The fame which our village has for health cannot but make this property command a good price, and it should be bought by some party from the city, as a country residence.

647E-See our names in Whittier. Mr. N. D. Sellers, 192 West Pratt Street, Baltimore, Md., has invented and had patented a Gill-net or Seine Knitter which automatically accomplishes all that he claims for it and indeed all that could be wished. We have tried it ourselves and award it the very highest praise. Any one can take with it and can knit twice as fast as by the old method. Exact regularity of mesh is obtained by it and it is impossible to make a Tip Knot. Price, nickel plated, \$1.25; silver plated, \$1.50.

Tobacco Inspections. In looking over the returns made of the number of hogheads of tobacco inspected by the Baltimore warehouses up to July 30th, 1882, we find that the St. Mary's county houses, No. 3, is still in the lead, having an excess over the next highest, No. 5, of 723 hogheads. We make mention of this in no spirit of boasting, but to show that the management of No. 3 has obtained the fullest confidence of tobacco planters by close attention to, and fairness of, inspection. In the report immediately preceding the one under notice, No. 3 was also in advance of all the other houses in the number of hogheads it had inspected.

Forest and Streams. With the first issue in August, the popular New York Journal, Forest and Stream, has been enlarged to 28 pages, weekly; the Forest and Stream is devoted to Angling, Shooting and Yachting, and kindred out-of-door matters. It is one of the most remarkable journalistic successes of the day, having an excellent circulation all over the country. In appearance, size and quality of contents, the paper is a model, and deserves all the credit it has won. It is published by the Forest and Stream Publishing Co., 39 Park Row, New York City.

The Steamer Sea. Though chary with our compliments, still we believe in giving honor where honor is due. Business engagements, from time to time, have compelled us to visit Baltimore and hence, having often traveled on the Sea, we know whereof we speak. Besides being one of the best and most reliable steamers that ever ran in our bay, her officers, one and all, are always courteous and ever solicitous for the comfort of her patrons. We hope that the Sea may continue to receive the patronage of our people and that it may always be our lot to travel with such an efficient Captain and so agreeable a Clerk.

Comely! Attractive! Winning! These expressive words are often and properly applied to the fair ladies of our favored land, who keep their hair abundant and natural in color and lustre by the timely use of Ayer's Hair Vigor. The Vigor is safe and agreeable; and its effects are very lasting, making it the most economical, and at the same time the most beneficial and elegant of toilet preparations.

The Canal Problem

It is always pleasant to see even or perhaps any honor to citizens of our country, and therefore we possess in nothing that a correspondent of the Baltimore Herald, under a late date, makes mention of our colleague, man, Jas. T. M. Raley, Esq., as a probable successor to the present president of the Canal Commission. We are not afraid of damaging Mr. Raley's prospects, as the States as well as the country press generally not being favorites of Governor Hamilton at present, however it may have been when he was a candidate for public office, we would like to see him in a proper eulogium upon our old friend, but as it is, we forebear, contenting ourselves with the remark, that the executive ability and fidelity of Mr. Raley has been shown in all the offices to which he has ever been either elected or appointed.—The Herald's correspondent says:

John Hamilton of Albany, Lewis C. Smith, of Washington, Frederick C. Montgomery, Henry, of Frederick and J. T. M. Raley tobacco inspector, are named for the position. Messrs. Hamilton, Smith, Ralbot and Hoxley being said to have been called heretofore for the "Canal Ring," and from all I can learn here, Mr. Raley would be to Mr. Hamilton and his friends the most acceptable person for that position. He does not belong to either faction, but is a straight honest Democrat.

(Local Correspondence.) ST. CLEMENT'S BAY, August 15th, 1882. Messrs. Editors:—On Wednesday last, I attended the Temperance meeting, held on the Camp Ground in the Palmetto district, where a large and very appreciative audience was assembled to listen to interesting and touching lectures on that theme, delivered by the following gentlemen: First, Mr. Mosher, Secretary of the State Temperance Alliance, who made a lengthy and touching appeal to his hearers to desert their Bacchanalian orgies and become true men and Christians and lead a sober and industrious life. And then Edward Higgins, of the Baltimore Bar, spoke at great length and depicted the horrors of intemperance and its deteriorating effect upon Christianity and religion. Then came the War Hero of Temperance, Wm. E. Daniels, also of the Baltimore Bar and President of the State Temperance Alliance, who delivered a very long and interesting lecture, and depicted many terrible scenes in which families had been brought to poverty and disfigurement by the diabolical sin of intemperance. All of the speakers were listened to with marked attention.

Miss Ada Mosher entertained the audience with several very interesting recitations, which were beautifully and artistically rendered.

In looking over the Morning Herald, of August 15th, I came across the following paragraph: "The President of the Canal is now being very much displeased with you and your committee have been the cause of it." Mr. T. M. Raley, now tobacco inspector, spoken of, Mr. Raley having been Gov. Hamilton's choice for State Treasurer against Barnes Compton, it is said that he will be acceptable to the Governor, and that as Mr. Raley is possessed of considerable executive ability Mr. Keating will make no serious opposition to his election, providing Governor Hamilton nominates him for that position." And again, on the 10th, "that Mr. Keating would aid in making Mr. Raley of St. Mary's county, President, so that Hamilton will have a chance to appoint his friend, Smoot of Charles County tobacco inspector." I know that they could not appoint an older or more efficient officer. Mr. Raley has been a life long Democrat, and has spent the best days of his life and his money in defense of democratic principles, and has been one of the great managers that has kept the party together in this State for eleven years.

(Local Correspondence.) ST. CLEMENT'S BAY, Aug. 14, 1882. Messrs. Editors:—Reading your issue (and I know your readers do) that indignation, together with a consciousness of immediate events, should conspire to deprive your valuable paper of the services of such an able (?) correspondent as you must allow me to be. I hope, however, that such a misfortune may not soon again befall you, and that I may be able to keep you regularly posted on all the events—great and small—in the neighborhood. I know that you were on the point of despairing of ever again hearing from me, so I determined to give you an agreeable surprise in the form of a little nonsense.

The dry, hot weather still continues and its disastrous effects on the crops are plainly visible. Nowhere can be found a good crop throughout. Tobacco, most of which was planted late, has scarcely advanced beyond the state in which it was when planted. Corn is of small and sickly growth, and the prospect for a good crop anything but promising.

Farmers have finished thrashing their wheat, and the crop proved to be extraordinarily good. The average yield in this neighborhood, taken from about seven crops, was thirteen, which is conceded to be a better yield than has been obtained for a number of years.

Mr. Tom Greenwell of the mill has just completed and launched a magnificent ferry boat for the accommodation of those who reside upon the banks of the mill race. They can now enjoy a pleasant mode of traveling to and fro between their suburban homes and the village. Mr. Greenwell is now engaged in constructing an automatic flying machine, by which, when perfected, he expects to navigate the air with as much facility as he does the mill race in his ferry boat.

A sad catastrophe occurred near here a few evenings ago by which two young men narrowly escaped being drowned. They started near night, just as a thunder storm was coming up, to call on some young ladies in the neighborhood. They had not proceeded far when 'down rushed the rain impetuous and continued till' they had arrived, dripping and breathless, at their destination, in a condition to inspire pity if not a more tender feeling.

After having been resuscitated and supplied with dry garments, they spent the remainder of their happy deliverance from a watery grave. But they stole away during the night rightly suspected of being ashamed to be seen in the daylight.

There will be a tournament and dinner at St. Joseph's church on next Tuesday, the 22nd inst., the proceeds of which are to be applied to paying off the debt of the church. The managers wish and expect every member of the congregation to contribute something to the dinner, and hope to make the affair a grand success.

Yours with esteem, G.

[Local Correspondence.]

DAVIDSON, Aug. 14, 1882. Messrs. Editors:—The St. Mary's Sunday School picnic near Laurel Grove, which came off on July 24th, was a success as usual. There was not quite so large a crowd as I have seen, but those who were present fully enjoyed themselves. The children were out in force and were fully enjoying having a good time, which I am glad to see.

The camp meeting continued on Friday, the 4th instant, and continued on Friday, the 11th. It was one of the most successful camps ever held here—spiritually, socially and financially. Over thirty were converted. All seemed to enjoy themselves and all the money asked for was obtained with but little trouble.

The Temperance cause received quite a boom on Wednesday, the 9th. Miss Ada Mosher, a younger sister of Miss Minnie Mosher, of St. Paul and vicinity, known to many people, favored us with recitations, which were well received by the large audience present. Messrs. C. S. Mosher, Sec. of the Md. Temperance Alliance, Wm. Daniels, President of same, and Mr. Higgins, all of Baltimore, delivered addresses. All did well and portrayed the evils of intemperance in forcible terms. But the speech of the day was by Mr. Daniels. He viewed the subject in all its bearings, socially, morally and financially, by any committee that permits the sale of alcoholic drinks by law. The speech was not only grand, but effective. Over one hundred pledged themselves to abstain from intoxicating drinks as a beverage. God speed them in their noble work. Good order with one exception prevailed during the camp, and this exception was illustrative of the evils of intemperance. The disturbance occurred on Wednesday, the 9th instant, in the afternoon. It was promptly checked and the offender taken before a Justice and disciplined by the law.

Corn and tobacco crops are looking very well, but we are sadly in need of rain. The seasonable weather week before last gave them a start, but now is the important time with us, and unless we have rain soon our crops will be much shortened. Wheat crops have yielded above the average, though some are dissatisfied. The best yield in our immediate neighborhood was Mr. Wm. Dixon's on the Queenette. From four bushels of seed he obtained 100 bushels. Not much from the seed, you say. Perhaps not. But as Mr. Dixon seeded his wheat very thick, I think the yield per acre will compare favorably with any in the county.

As your laughing correspondent Observer pulled through his laughter enough to criticize my short article in regard to the management of the republican party in this State, I hope he has sufficiently recovered to weigh calmly what I shall say in response. He states the fraud is one of the principal planks of the republican party, but doesn't tell where or how. He might wish to know, I think, and that the democratic party had become in this State a synonym for all that is filthy and corrupt in politics—for proof I refer him to Gov. Hamilton and other members of the party. His article is itself an exemplification of the leading plank of the party, and that is, the straw that will break the camel's back, and that is the truth of the matter, if he had not had enough to laugh so inordinately he perhaps could have seen it) but one which was in a great measure accepted and acted upon. I sought to warn republicans against the wiles and money of democrats, who knowing that Col. Crane if nominated would be elected, would do their best to tamper with delegates and secure the nomination of some demagogue whose election would be doubtful, or who could be made a plant tool in case of his election.

He places great stress upon the seeming incongruity of my two assertions that Col. Crane is the only eligible republican in the district for the judgeship, and that St. Mary's is one of the banner republican counties in the State, both in brains and majorities. He forgets that the republican party as an organization in St. Mary's is young—not over 12 years of age—consequently most of our other lawyers are yet wedded to the fossil democracy. But we have young ones who are coming to the front and taking their places. Besides, the law is not a profession, but a trade, and other trades and professions generally come in for their share.

In my feeble efforts for the republican cause, I shall certainly condemn those who so soon as their fellow-citizens place them in positions of prominence seek and take a change in their own benefit. I repeat that the republicans of St. Mary's should come to the front and assert their rights and privileges, not as an Observer would have us do, by opposing only—that is too democratic—but by acting. Any suggestion of the secessionist bosses of either faction, offered as republicans for the interest of the whole party, should be acted upon, but any thought toward seceding, only to give one faction some advantage over the other, should be promptly repudiated. Let us give our best energies to the support of the whole party, and not a few who will unhesitatingly wreck the party that they may swim. Let us not repeat the mistakes of our adversaries in our own county, who by this very course have helped so much toward our success.

Occasional.

Where Shall I Send my Boy?

Parents, Save Time and Money!—Send to Glenwood, Patrons say: "Best and cheapest for boys in Maryland;" "Six months at Glenwood equaled to two years in other schools." Nature's method. Eye and hand training. Home care and comforts. Offer extension, \$100. Address PROFESSOR L. G. MATHEWS, A. M., Glenwood, Howard Co., Md.

Wilson Female College, CHAMBERSBURG, PA.

OPENS SEPTEMBER 20th, 1882. HAS A COLLEGIATE A SEMINARY AND SPECIAL COURSE. GRADUATES YOUNG WOMEN IN FINE ARTS A SPECIALTY. Highest standard—the best Teachers. Write to Rev. J. C. CALDWELL, D. D. President.

BALTIMORE FEMALE COLLEGE.

The only Female College in Maryland, chartered and endowed by the State, has a fine building, ample grounds, good apparatus, an able Faculty, and, after a liberal course of instruction, confers regular degrees. A free scholarship for each county. The Thirty-fifth year opens September 18. BOARD AND TUITION, \$275 per year. N. C. BROOKS, A. M., LL. D., President. Aug. 10, 1882—4r.

Camp Meeting.

THERE will be a great Camp Meeting held by N. E. Church (colored) near Charlotte Hall, on the road leading from Charlotte Hall to Newport, one mile from Charlotte Hall, beginning THURSDAY, August 17th, and continue for one week. Some of the most prominent ministers of the connection will be present and a great time is expected. The public are cordially invited to attend. Sunday, the 20th of August, will be a great day. Revs. B. Brown, D. D., W. H. B. Voderly, A. M., of Lincoln University, and other distinguished ministers will be present. G. E. CUBBY, Pastor. Aug. 10, 1882—2t.

FOR THE LEGISLATURE.

Messrs. Editors:—Please announce the name of Mr. JOHN H. LEACH as an independent candidate for a seat in the House of Representatives at the next General Assembly of Maryland. POOR MAN AND REPUBLICAN. Feb. 9, 1882.

A BRIEF BIOGRAPHY.—Horr of Michigan.

Remember him! His full name is Rowell G. Horr. He lives in East Saginaw street where he is at present. He lives at 817 Twelfth st. northwest, when he is in Washington looking after the people's interest in the name of the Eighth district of Michigan. He was born in Vermont, and has been at times a clerk of the courts, a lawyer, a miner and a dealer in lumber. He is a minority representative, having been elected to the Forty-seventh Congress by 21,224 Republican votes against 22,686 divided between two other candidates. He is a humorist, and takes the floor now and then to make funny speeches. He sailed into the debate on the river and harbor bill on June 15 with the remark that there was "no measure before the House founded more completely and certainly upon safe and just business principles." He voted for the river and harbor bill on June 17. He voted again for the river and harbor bill when it was passed over the veto on August 2. He is frequently referred to as "Horr." He uttered almost the last words of the session, and his last words, about ten minutes and a half before adjournment, were expended in an effort to amend the river and harbor bill so as to make part of the appropriation for locks and dams available for the purchase of sites. Holman blocked him.—N. Y. Sun.

EXCELSIOR.

Summer is here, and with its advent we announce our readiness to meet and satisfactorily fill all orders and requirements on the part of the public. In this wide and length of Maryland there is no stock of CLOTHING for Men, Boys' and Children is equal to the unrivaled assortment we now have to offer, whether in the matter of STYLE, DURABILITY, FINISH or General Excellence. Furthermore, every transaction is executed under the fair and square conditions originated by us: "Goods exchanged or money refunded." In other words, it is "satisfaction or no sale." To those bringing blanks, write for our self-measurement blanks, and trust to us to send you, C. O. D., as good a suit, and as perfect fitting one, as you could personally select. As a SPECIAL OFFER we agree to refund customers from a distance to pay one-half the traveling expense incurred, on exhibition of the ticket or tickets touching for the same. Make your purchase before the 15th of August, and thus convince yourself that we share with you the expense of the trip.

"Excelsior"

is the only Clothing House in the United States that makes this great offer! Bear in mind that our Furnishing Goods Department is one of the finest in the land, and that the low price of our prices is a matter of surprise to all. Do not forget the cardinal principles of our house, the rounds of our leader of success, FAIR DEALING! ONE PRICE! PERMANENT POPULARITY! SATISFACTION OR NO SALE!

MALARIA

Malaria is an almost indescribable malady which not even the most talented physicians are able to fathom. Its cause is most frequently ascribed to local surroundings, and there is very little question, but this opinion is substantiated by facts. Malaria does not necessarily mean chills and fever while these troubles usually accompany it. It often affects the sufferer with general lassitude, accompanied by loss of appetite, sleeplessness, a tired feeling and a high fever, the person afflicted growing weaker and weaker, loses flesh day after day, until he becomes a mere skeleton, a shadow of his former self.

Malaria once having laid hold upon the human frame, the door of the system is thrown open, and the most deadly poisons are introduced and embedded in the system. I did not know that the liver, the digestive organs, the lungs, the kidneys, the bladder, the stomach, the bowels, the heart, the brain, the nerves, the muscles, the bones, the joints, the skin, the hair, the nails, the teeth, the eyes, the ears, the nose, the mouth, the throat, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate gland, the testicles, the ovaries, the uterus, the vagina, the cervix, the fallopian tubes, the peritoneum, the pleura, the lungs, the heart, the lungs, the stomach, the bowels, the bladder, the kidneys, the liver, the spleen, the pancreas, the gall bladder, the prostate
