LEONARDTOWN, MD.

THURSDAY Morning, September 20.

Democratic Ticket.

For Delegate to the 53rd Congress:
Dr. George Wells,
of Anne Arundel.

For Delegate to the 54th Congress:
John G. Rogers,
of Howard County.

Sugar has always been subject to taxation in our country, and the best revenue producer the Government ever had until the McKinley bill, that gave a bounty to the sugar producer. The result of this legislation was to tax the poor people of this country on all else they used in order to run the Government and pay this sugar bounty—a bounty amounting to some \$12,000,000 annually.

In 1878 wool sold for about 40 cents per pound. As the years went by, the price decreased until in 1892-3-4 it about reached rock bottom. And, be it remembered, that all of this time we were living under a high tariff law and the higher the tariff the lower the price of wool got. The tariff reached its highest point under McKinley and wool touched its lowest price. The McKinley law has been repealed only about a month and under the present law, which makes wool free, that commodity has begun to advance in price: The lesson taught is so plain that he who runs may read.

From the 4th day of March 1857 to the 4th day of March 1893, the Republican party made our laws—the laws which brought our country to death's door—for during that long stretch of years the Republican party was the only party that at any one time held the Presidency, the Senate and the House of Representatives—the three law making branches of our government. They made the laws; they set in motion the cruel machinery which crushed the business of the country, and now their blatant orators and hee-lers are striving to make the ignorant and credulous believe that the responsibility is not theirs. If not theirs, whose is it? Certainly not the Democrats. For their financial law has not been in effect for but one month.

Our tariff bill, with all its imperfections on its head, is a much better bill than the McKinley bill, and is a long step in the right direction. It is not all we wanted, and it is not all we intend our representatives to get, but it is better than it has been represented to be. It makes substantial cuts all along the line. It puts hundreds of articles of prime necessity in everyday life upon the free list and scales down the McKinley rates on thousands of others.

Upon the free list are lumber, salt, binding twine, cotton ties, wool, bags for grain and cotton bagging; also plows, tooth and disk harrows, harvesters, reapers, agricultural drills, planters, mowers, horse-rakes, cultivators, thrashing machines, cotton gins and divers other articles, as the sale bills say, "too tedious to mention."

This free list will make houses cheaper, housekeeping cheaper and living cheaper; thereby placing a premium upon matrimony and the establishment of homes—which is the wisest thing that any Government can do.

The tariff on woolen goods was cut 50 per cent; carpets 60 per cent; and so on through the long list of things which everybody must use in this changeable climate.

NEWS IN BRIEF.
