Give The Poor Man's Child A Chance.

Much is said about encouraging immigration to Southern Maryland, but little or nothing about the educational facilities to be provided for the children of the immigrants.

Charlotte Hall and St. Mary's Seminary are not public schools.

Charlotte Hall and St. Mary's Seminary are not public schools, and though State beneficiaries, the public derive little or no benefit from them.

It would cost the State little more, if any.

The Seminary, whose usefulness has long since ceased, could be sold with the proceeds the necessary buildings erected at Charlotte Hall, where the industrial as well as the liberal arts could be taught.

The boys and girls of Southern Maryland are intelligent and quick witted. All they want is an opportunity.

Let them be educated and they will return by their increased usefulness a thousand fold the money expended upon them.

If this idea is worth anything let it have free discussion. The Fifth Congressional District is interested in it, but St. Mary's having both schools, it is but right that she should take the initiative.

Some time ago I was taken sick with a cramp in the stomach, followed by diarrhoea. I took a couple of doses of Chamberlain's Colic, Cholera and Diarrhoea Remedy and was immediately relieved.

I consider it the best medicine in the market for all such complaints. I have sold the remedy to others and every one who uses it speaks highly of it.

Who will suggest something better for the poor man's child? The legislators will be elected this fall, so now is the time for a free and full discussion of the subject.

Prof. Gilbert Walden.

We give below a few opinions of the press of Prof. Walden, who will lecture at the Town Hall Monday, June 19th, for the benefit of the Episcopal Church.

His entertainment was elegant in the extreme, consisting of humorous, pathetic and dramatic readings, in all of which he fully demonstrated his highly developed oratorical powers.

Gilbert Walden, of Virginia, the famous Southern Educationist, gave a pleasing and instructive entertainment last night in the 'Temple', and a large and enthusiastic audience of 1500 people greeted him.

A rare treat awaited those who went to St. Vernon Church, to hear the Dialect Reader and Biographer, Gilbert Walden, in his famous Southern recitations and humorous recitals.

The Beacon was pleased to receive a visit recently from Misses Mary Alwine, of Washington, and Misses Page Alvey and Gussie Wathen of the County.

And now it's too hot—warm! It should be borne in mind that it is getting time to have warm weather. June is with us, and if the Sun is going to warm us up here on this grand globe of ours it is time for it to commence work. Sun light and sun heat, it is true, are not weighed to an ounce, or measured to a dram, so far as mortals know, yet it is not being used uselessly. We will get our share despite grumblers of various types.

Everybody is working more or less faithfully at their respective occupations. See that carpenter—no 'jackleg'—but a tiptop manipulator of the saw and plane, how he gives his work!

Look at that boy at the end of the wharf. How patiently he sits waiting for a bite. There's my watta a large cod—three foot long and large in proportion—has had hooked and safely placed in a box near by. Say, sonny, do you know much about fishing?

Just watch me, sir, and I'll prove beyond a doubt that I'm up to the business every time. You see, sir, the reason there are so many poor fisher-men is they lack patience and some persons are too scrupulous—too conscientious, forsooth. They regard angling as a sin, because fish are deceived, but I don't think so. Who? Here's another one. I'll get my box full after awhile. Nothing like patience, you see. I think it was Franklin who said interrogatively to some one of his many acquaintances—it may have been to a little boy about my size and age. Dost thou love life? And he replied almost in the same breath. Then do not squander time, for that is the stuff life is made of. Sir, I love life, and if you'll just take a peep into that box, you'll understand that I have not thrown away much of my time. Patience has its perfect work, and I'm an admirer of Franklin, and I keep the great expression of his constantly upon my mind. I'm going to succeed as a fisherman at least and please, sir, don't let your mind rest upon this point, so—good-bye, and we left the little fellow, patient as Job, watching to see his cork go under.
