End of Star and Stage Route Service—Death of James Bonner—Miss Ellen Burke's Funeral—Remodeled Fire Steamer Expected Feb. 1st—Marriage of Fred L. Dawes and Mrs. Anna J. Parrett, of Montville.

The star mail and stage route maintained for years between Westerly and Potter Hill and Ashaway has been pushed aside by the steady march of progress, and beginning next Monday the mails will be carried by the Ashaway and Westerly trolley road. There will be three mails each way on week days and two on Sundays. The people of those places have obtained the transportation privileges for several weeks, and owing in part to the reduction in fare when compared with the charge by the stage route, and the increased carrying capacity, more frequent visitation is made between these places. The change in the mail service means quicker delivery, and the schedule will be so arranged as to best serve the people.

The spur tracks to some of the manufacturing concerns are getting the benefit of better and cheaper transportation facilities. At about the same time all these spur tracks will be finished, and the new trolley road will be then in full working order.

Last week Hancock and Budington post, Grand Army of the Republic, had their installation of officers, elections and social sessions, and this week the Woman's Relief corps, auxiliaries of these posts, will be in the running. The installation will be a feast and social session in the Grand Army banquet hall in Union street. On Thursday evening Budington post, Woman's Relief corps, will have public installation and social session.

TAFT INAUGURAL CEREMONIES. Discussion in House Over Use of Pension Office Building.

Washington, Jan. 11.—After undergoing a stormy discussion in the house of representatives today, the resolution authorizing the granting of pensions to the committee on inaugural ceremonies and the use of the pension office building for the inaugural ball was committed to go over for two weeks before final action will be taken upon it.

As it stands, the section relating to the pension building was stricken out, and a further amendment was made refusing permission to extend overhead wires into the structure. It was manifest from the outset that a majority of those present was opposed to the pension office proposal, and Mr. Smith of Michigan, having the measure in charge, was unable to rally his forces, and in consequence was beaten at every turn.

Various other measures were considered and passed, all relating exclusively to the District of Columbia. Speaker Cannon announced the committee on the grant of pensions, provided for by the resolution adopted last Saturday.

Dyspepsia

and Indigestion are very quickly stopped when your food begins to digest. Kodol digests all you eat.

Of course nothing goes right when your stomach is all wrong. Your system is overloaded in spots and underfed in others. It requires all your attention. Your head is heavy. Maybe it aches. You feel dull. You don't really care if you succeed or not and you mostly don't.

What you need is Kodol; you have dyspepsia. It is useless to try to make the stomach do what it can't. Might as well crank your auto after the gasoline is burned out. Far more sensible to whip a tired horse. He will go till he drops. The stomach won't. It stops when it is tired and makes you a lot of trouble.

Maybe you don't weary it with too much work. Perhaps it has a notion of kicking about certain kinds of food. Fats perhaps. Starch most likely. Albumen possibly.

Kodol digests all you eat. Funny thing. Almost all digestants are made to digest albumen only. Seem to forget all about fats, phosphates, starch and the rest. Acid makes as much trouble as anything. Why not make a digestant that will do more?

It was hard work to get Kodol right. Unless it could be made to digest any food anywhere in the digestive tract we did not want to make Kodol.

Unless it could do more than any digestant known—even Nature's—we didn't want to offer Kodol.

Hard scientific work did it. Made Kodol. We claim that Kodol will do all the work of a healthy digestive apparatus. That it digests any food anywhere, at once and entirely. It does more than Nature because she is limited in place—Kodol isn't.

There is no halfway work about Kodol. It is a tonic without being a stimulant. It quiets without containing a bit of narcotic.

It rests and Nature cures. It works partly by increasing the secretion and flow of the digestive juices, partly by actually preparing undigested food for proper natural assimilation. But it does all the work. It does not stop with a single class of foods in a certain place. It takes them anywhere. Hunts till it finds its work and then does it.

Don't say again that you can't eat everything. It is nothing to be proud of. It means that you have abused your stomach knowingly and ignorantly. That you are not willing to help Nature repair the damage. That you'd rather starve yourself by depriving your system of some variety of nourishment it needs. That is what dieting really means—half starvation.

With Kodol at hand, such treatment is worse than useless. It is criminally careless. The way to gain digestive strength is to help the digestive apparatus, not to quit using it.

Try Kodol. You will begin to believe in it as soon as you swallow it. You will feel it working at once. It loses no time. The wonder will be why you waited.
