

FEW ACCIDENTS, BUT NONE VERY SERIOUS.

Ex-State Treasurer Gallup Injured in Collision—R. W. Perkins Had Poor Spell—Mrs. Rockwood Hurt.

At 1:15 o'clock two automobiles crashed together in a head-on collision as they were rounding the curve of the Johnson home at the upper end of the old Norwich or Founders' green.

The machines were quite badly shaken up, but fortunately the passengers were more lucky, only one sustaining injuries of any consequence.

Both machines were going at a fair rate of speed when one encountered State Secretary M. H. Rogers and H. H. Gallup of this city. The machine was owned by Secretary Rogers. The machine that was plying its way toward had a heavier load, containing Chairman Edwin A. Tracy, Frederick Cary and three ladies.

The mishap that followed the crash was general, but Mr. Gallup was the only one to sustain injuries, being cut and bruised about the knees. He was taken to the Johnson home temporarily and then to his home in another auto and was given medical assistance.

Mr. Gallup got patched up so as to get back on the reviewing stand with the aid of crutches in time to witness the parade. Mr. Tracy and the others of the party to be congratulated, that nothing more serious resulted. The machines were beside the road for some time in a badly crippled condition, although Secretary Rogers' machine sustained the greater damage.

Just as the parade reached the upper end of the parade R. W. Perkins of the marshal's staff was taken with a fainting spell, having gone without breakfast and taken a glass of ice water when he was heated. Dr. Donohue attended to him until he recovered and was taken to his home, where in the evening he was reported to be all right.

During the historical reproductions Mrs. Rockwood of Richmond, Va., and Mr. and Mrs. Ward were seated in a carriage and as the person holding the reins advanced he fell back and made a wild plunge through the grounds. Both women were thrown out and received a number of cuts. She was attended by Dr. W. S. C. Perkins and taken to her home.

During the historical reproductions on Washington square, but no serious damage resulted.

FIRE DEPARTMENT HAD NUMBER OF CALLS.

Only One Bell Alarm, Although Three Telephone Calls Are Answered.

The first call for the fire department on Monday came in the evening at 8:20, when a telephone message of a fire seen on a roof came in, and from the word given to the Central station it was supposed the fire was on Laurel Hill, sending Chief Stanton and the chemical engine to the Laurel Hill bridge and down Talman street through the crowds watching the fireworks.

The chemical engine, which was looking for the fire, and meanwhile someone had turned in an alarm from box 82 at the corner of Hamilton avenue and Main street, East of the bridge. This put the department on the right trail and the fire was quickly located in the lower corner of the shingle roof of the building on the east side of the street, owned by the estate of Solomon Lucas and occupied by Thomas K. Hartley upstairs and Edward Marx downstairs.

The aerial truck and engine company No. 1 also responded to the alarm, being over the bridge, which was almost impassable from the crowd of people, teams and automobiles on it. There were three telephone alarms called to the department on the night of Rogers hill. Engine company No. 1 was called to a point off Spruce street, where they laid 850 feet of hose, and after 11 o'clock the same company went to Hinchley hill for another fire on the same cause.

At 8:15 the engine company No. 1 was called to a point near School street, off Union, for a brush fire.

VERY QUIET DAY IN POLICE DEPARTMENT.

Only One Arrest for Disobeying Fire-arms Ordinance—Fifty Extra Men Under Chief Murphy.

The celebration meant a big day for the local police force, but withal one of the quietest on record for such a crowd. Chief Murphy spent the entire day until midnight at his desk and the department machinery ran as smoothly as clockwork. All the forty-five local policemen were on duty, assisted by fifty from Hartford, New Haven, Meriden and Waterbury, as well as five plain clothes men.

The squads of visiting policemen each reported in command of a sergeant, were given the oath by Chief Murphy, and assigned to duty. At parade time they were distributed along the line of march at such regular intervals as to cover the whole line and were well mixed with the crowd and no disturbances of any kind were reported.

The prohibition against the use of firearms or fireworks seemed to have been taken as final by the entire populace and it was not till evening that any officer was called upon to make an arrest for an infraction of the rules made for the celebration. Policeman Fenton arrested a man in the evening on the East Side, charging him with firing a revolver at duty. The accused gave his name as Napoleon Audette of White Rock, R. I., and was locked up for trial this morning.

A place to lodge the policemen from other cities was found at the Norwich state hospital in a new building erected there and the Waterbury, New Haven and Meriden contingents were sent down there on the 11:15 trolley after they had completed their term of duty for the evening. They got their meals at the Del-Hoff. The Hartford contingent is located on Cliff street.

HEARD IN THE REVIEW STAND.

President Assured by the Mayor That Chair Would Hold Him.

Shortly after the president's arrival upon the reviewing stand he asked Mayor Lippitt if that would be all right for him to remain seated. The mayor and the mayor laughingly replied that it would.

When the governor entered the stand President Taft greeted him in this manner: "I am glad that you endured the ordeal and are here at last," a slight play upon his former jest at the playing of the piano.

Being questioned by the governor as to what he came here for, the president replied: "What do you suppose I came here for? I am ready to pass the examination and if you had to make a speech you would be ready to do the same thing."

All the officials, the president, governor and mayor were applauded as they entered the reviewing stand. Mayor Lippitt getting a big hand, and many remarked his resemblance to President Taft.

Had Meals at Bushnell Chapel. Two of the visiting bands on Monday—the Fifth Massachusetts and Hart's from Hartford—were given their meals at the Bushnell chapel by the Ladies' Benevolent Union of the Central Baptist church, as arranged for by the music committee. These were the only ones that the committee had to look after, as all the other bands took care of themselves. The visiting musicians expressed entire satisfaction with the menu offered by the church.

DETAIL OF POLICE FOR CELEBRATION.

RETURN OF THE TURNERS.

Winning Team from National Turnfest Welcomed at Waterbury by All German Societies.

The athletic team which represented the Waterbury Turn Verein at the national turnfest in Cincinnati got a rousing welcome Tuesday night on its return home.

The Waterbury society won second prize in two events and third prize for all around athletics. Teams from all over the country were entered. Several members of the team won prizes for individual work. Charles Steinmetz, one member of the team, was laid up in a hospital two days with a sprained ankle, sustained by a fall from a horizontal bar. After a parade through the principal streets of Waterbury the team was taken to Turn hall on Bowditch street, where a social session was held and addresses of congratulation delivered.

Dr. Elliot's Five-Foot Library.

Dr. Elliot's five-foot library shelf may be a six-foot or a seven-foot shelf before he gets through with it. Also it is dollars, and maybe more dollars, in Dr. Elliot's pocket. Announcement of the Harvard edition of the books, bound, of course, in calico, has been sent to every Harvard graduate, with the intimation that true Harvard patriotism should lead him to invest in a shelf and buy the books to be put on it. For the privilege of this capitalizing Harvard man's love for their alma mater and ex-president Dr. Elliot has been liberally paid by these publishers, as he himself frankly states. The inference is that when he extends his shelf a foot or two there will be more money in it for him. Capacious carpers may sneer, but the transaction is all right. There is no reason why Dr. Elliot should for nothing tell the world the books which in his opinion constitute a liberal education when publishers stand ready to pay him for thus enlightening the world. The only thing of general interest in the incident is that it shows how many ways more than one there are for turning an honest penny.—Waterbury American.

Has Good Results to Date in Derby.

That the inspection of milk in Derby was not begun any too early is shown by the reports received by the milk inspector, Dr. Frank A. Elmes, from the state official, who has tested the samples submitted to him. Since the inspector was appointed and began his duties he has taken a number of samples, some from the wagons of the dealers and some from the places in the city where milk is sold. In many instances the milk has been found all right. In some cases it has been found all wrong. In still others it has been

HANDLE FOR FIRE HOSE.

Will Lighten Firemen's Work and Increase Their Efficiency.

Two interests are conserved in the invention by a Connecticut man of a fire hose carrier. The fireman's work is made easier and his efficiency therefore increased, with the result that another advance is made in the safeguarding of homes from fire. Anyone who has watched firemen fighting the flames must have noticed how difficult it is to manipulate the heavy and unwieldy hose. When the big rubber tube becomes wet it is very hard to hold, especially when carrying it up a ladder or over shaky roofs. Here the carrier comes into use. In appearance it resembles a pair of ice-tongs. It has a pair of jaws below and a large ring for a handle. The jaws fit around the hose and are locked by means of a sliding tongue. With a few of these carriers fastened along a line of hose firemen can handle it with ease and are enabled to drag it to vantage points which would otherwise be almost impossible of access.

Finds for Plaintiff in Horse Case.

Judge Gager, who presided at the June term of the Tolland county superior court, at Rockville, has sent to his clerk, Lyman Twining Tingler, his decision in the case of Frederick Burnham of Andover against Charles E. Brown, of Coventry, finding for the plaintiff, who is awarded judgment for \$32.25. Mr. Burnham sued for \$50 for the sale of a horse. The defendant was to pay in thirty days, but he not only did not pay, but sold the horse to another man for \$40. Brown's claim was that the animal was not as represented, therefore he refused to pay.

True Generosity.

Mrs. Roosevelt and Miss Ethel show plenty of common sense. The former declines to be interviewed, and the latter when asked to pose for her picture replies: "We have been in the public eye for seven years and have had enough of it. Give somebody else a chance."—Boston Transcript.

Road to Matrimony.

See that almost 100 school teachers have taken out licenses in this city to be married within the next 10 days. No wonder any of our young men graduate of the Normal college intend to become teachers.—New York Herald.

Can Grow Up With Senate.

A Mr. Turnipseed has been elected a member of the Georgia legislature.—Chicago Tribune.

MAJOR STEINER ENTERTAINED.

Senators Bulkeley and Brandegee, Congressmen Higgins and Tillson and Members of Governor's Staff With Friends.

On Monday evening Major Steiner entertained Senators Bulkeley and Brandegee, Congressmen Higgins and Tillson and the members of the governor's staff at his home on Church street, the fireworks being watched from the lawn. There were also a few invited friends in the party and a delightful evening resulted, the hospitality of the genial major being greatly enjoyed.

Girls Marched in Body.

The girls of St. Anne's detachment of Tierney cadets furnished an inspiring sight before the parade as they marched up Broadway to take their places in the yard at Mrs. J. M. Huntington's on Broadway, which had been courteously given by Mrs. Huntington for their use to see the parade. Chief Murphy detailed Policeman Cowles to escort the girls safe from their rooms. In charge of their color guard of four, the detachment carried the silk American flag presented to them the day before by Col. John P. Murphy.

Tact Wins the Customer.

A clerk in a department store had before him a woman no longer young. She was looking over some colors and was undecided. The salesman knew his business and knew human nature, too. Smilingly addressing the woman, he inquired: "Madam, is it for yourself or an old lady?" He sold the goods and gained the customer's good opinion.

Gentle Sarcasm.

A good old west country preacher, who had decided to leave an unremunerative charge, finding it impossible to collect his salary, said in his farewell sermon: "I have little more to add, dear brethren, save this: You were all in favor of free salvation, and the manner in which you have treated me proves that you have got it!"

Daily Health Hint.

Candies and sweet articles are highly concentrated nourishment that ought, when eaten, to be mixed with coarser food in order to secure proper digestion. This kind of food is more likely to turn acid on a weak stomach than any other, while none so surely tends to produce constipation.

Efforts Not All Wasted.

A Geneva ear and throat specialist declares that yawning is helpful; in fact, that it is one of the most beneficial forms of exercise. Hereafter speakers who are a little shy on elocution may know that at least they do some good to their auditors.

Woman's Way.

When a man tells his wife of an increase in his wages she doesn't burst out in congratulations; she has an absent-minded look in her eyes, as if calculating how many yards it will take for a dress she had hitherto felt that she couldn't afford.—Athenian Globe.

NORWICH TOWN CONGREGATIONAL CHURCH—AS OLD AS THE TOWN

Shortening Sources

Lard is made from hog-fat; its origin is the pig-sty. It makes food greasy, indigestible and dangerous. **Cottolene** comes from the cotton fields of the Sunny South. Its basis is the purest refined cottonseed oil. It is pure, healthful, and makes digestible, nourishing food. It is the purest and best frying and shortening medium possible to manufacture. Once get in the habit of using **Cottolene**, and you will never let lard enter your kitchen again. Wherever exhibited in competition with other cooking fats, **Cottolene** has always been granted highest awards.

COTTOLENE is Guaranteed Your grocer is hereby authorized to refund your money in case you are not pleased, after having given **Cottolene** a fair test.

Never Sold in Bulk **Cottolene** is packed in pails with an airtight top to keep it clean, fresh and wholesome, and prevent it from catching dust and absorbing disagreeable odors, such as fish, oil, etc.

Cook Book Free For a 2c stamp, to pay postage, we will mail you our new "PURE FOOD COOK BOOK" edited and compiled by Mrs. Mary J. Lincoln, the famous Food Expert, and containing nearly 300 valuable recipes.

Made only by THE N. K. FAIRBANK COMPANY, Chicago

"Nature's Gift from the Sunny South"

Tree Resembles Umbrella.

A curious tree grows in one of the numerous islands which are straddled about the Pacific ocean. It grows, at its full height, to nearly 30 feet, with branches spreading like a huge umbrella, yet it is completely leafless, the species having never been known to show signs of a single bud. Its sap is useful as a medicine, but as fuel the wood is worse than useless, being as hard as iron and quite as difficult to burn.

Water at a Cent a Pitcher.

The spectacle of water being retailed in the public streets can be seen almost any weekday at St. Day in Cornwall. In all probability there is no other case of the kind in England. The charge for the water is a cent per pitcher. The water is obtained from what is known as Nogue Shoot, about half a mile from the village, where there is an abundant supply of pure water.

Talent and Tact.

Talent is power, tact is the skill to use it. An engine can whirl a train with 20 cars over the continent at a mile a minute clip, but it could not do this without the motive power of steam—it would stand on the rails, an inert mass of steel and iron. 'Tis the steam that makes the wheels revolve and causes it to rush through the lengths of space.

His Reward.

"I wonder what they will do about the reward for that diamond necklace of Bingleton's?" said Dawson. "He offered a thousand dollars for the arrest of the thief, and the fellow was arrested the other night by one of the police dogs." "There will be no trouble about that," said the Genial idiot. "They'll give the dog a thousand bones."—Harper's Weekly.

Timber the Ore Mined Here.

One of the most curious mines in the world is in Tongking, China, where, in a sand formation at a depth of from 12 to 20 feet there is a deposit of stems of trees. The Chinese work this mine for the timber, which is found in good condition, and is used in making coffins and troughs and for carving and other purposes.

No Danger from Jimmie's Knife.

On Jimmie's birthday his mother gave him a knife. A little friend told him that he ought to give his mother a penny so that it would not cut their friendship, whereupon Jimmie replied: "It won't cut anything else, so I guess it won't cut our friendship."—Delineator.

Knock Down Wanted?

An interesting news item states that a woman shot through the door and "killed a strange burglar." Of course the lady ought to have been given an introduction and the bold intruder was remiss in not sending up his card.—Atlanta Georgian.

"Pickled" Tea.

Natives of Burma and parts of India prepare tea in a peculiar way called "pickling." The leaves are boiled and pressed into bamboo tubes, which are buried in the ground until the material has matured.

Cannibal Shark.

An Australian paper records the capture of a shark 15 feet six inches long and seven feet girth, whose contents included a full-sized porpoise and another shark five feet long.

Eighth Wonder of the World.

There are said to be seven great wonders in the world, and it is every woman's opinion that if an eighth were added, it would be a man's conscience.—Athenian (Kan.) Globe.

Sweetly Solemn Thought.

The realization that our most troublesome troubles may be dramatized falls like a benediction on the peevish and panting heart.—Cleveland News.

Philosophy.

"They may be just as good fish in the sea as ever was ketch'd, but no-buddy ever appears to be dead sure about it."

An Ever-Present Marvel.

Considering the dreadful things that children eat, is it not surprising that any of them live to be human beings?—From "Pippins and Peaches."

The Root of All Good.

In the man whose childhood has known carelessness there lies a fiber of memory which can be touched to noble issues.—George Elliot.

Last year's output of coal in England showed a decrease of over 6,000,000 tons.

WHAT THE PAPERS SAY.

One Girl Who Went Wrong.

Some years ago there lived in Missouri a girl named Mary O'Brien. She was the country town, the city, in turn, grew too small for her and she went to New York, where she was lost. In short, she ceased to exist, having adopted stage life and the name of Ruth Hilton. Antonia Ruiz, a member of the Cuban legation, saw her, fell in love with her and, as it was an honest love, he married her. But he found out that Ruth Hilton hadn't been her only name; that she was very friendly with men, and had lived with a number of them. They separated, and, when Mary O'Brien again bobbed to light it was as Mme. Ruiz, living in fashionable apartments in London, and the "friend" of Alfred Vanderbilt. She kept eight servants and the splendor in which she lived and her beauty were the talk of London. You know the rest: Vanderbilt tired of her, quit going to see her, she moped and cried, and finally shot and killed herself and now lies in an unmarked grave.—Athenian Globe.

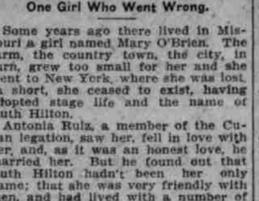

Care for the Dogs.

With the combination of warm weather and dogs that have not free access to cool water, the complaints of "mad dogs" are bound to become more frequent. It is stoutly maintained by people who ought to know that the so-called hydrophobia is but an imaginary disease, resulting from too close confinement and lack of water, combined perhaps with some excitement on the part of the dog, and fright and hysteria on the part of the person bitten. In any case, while it is well to take every possible precaution, it is well to remember that excitement and fear certainly will aggravate any symptoms of trouble in either man or beast. "Keep cool" is good advice and easy to follow by the man at the seashore or who is not bitten, but where it becomes a personal matter it is much more difficult to remember and follow. Yet therein lies safety.—Windham County Observer.

Delay Easily Explained.

When once a famous member returned to the British house of commons after a by-election for Knaresborough, his unusually delayed appearance was commented upon in the presence of Sir Wilfrid Lawson. The newly elected member, though a wealthy man, was known to be extremely careful about stray expenses. "Isn't it odd," some one said, "Tom Collins doesn't turn up?" "Not at all, not at all," said Sir Wilfrid; "Not as waiting for an excursion train."

TIERNEY CADETS GOING UP BROADWAY.

TIERNEY CADETS GOING UP BROADWAY.

Think What You Lose

When you get a silk glove of inferior make, you pay the same price as the Kayser would cost.

And think what you lose. Kayser has the durable fabric, the exquisite finish and the perfect fit.

Kaysers have the patent tips, and the guarantee in every pair.

Yet they cost you not a penny more than the poorest silk gloves made.

The Kayser

Patent Finger-Tipped Silk Gloves

Kaysers are the final result of 25 years of experience. The pure silk fabric is made in our factory, to get a weave that wears.

Every glove goes through fifty operations to attain perfection in finish and fit. To get these gloves—the kind you want—look for "Kayser" in the hem.

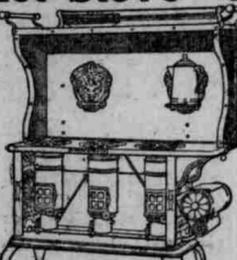

Short Silk Gloves 50c, 75c, \$1.00, \$1.25
Long Silk Gloves 75c, \$1.00, \$1.25, \$1.50

JULIUS KAYSER & CO., Makers, New York

Hot Stove—Cool Kitchen

How do you expect to endure the broiling days of summer if you prepare all the food over a glowing coal fire?

You need a "New Perfection" Oil Stove that will do the cooking without cooking the cook. It concentrates plenty of heat under the pot and diffuses little or none through the room.

NEW PERFECTION Wick Blue Flame Oil Cook-Stove

besides being the perfect stove for summer use is just as efficient for year 'round use. Does anything any other stove will do. It is built just like the modern steel coal range, with a CABINET TOP that makes it possible to keep food warm after it is cooked. Made in three sizes. Sold either with or without Cabinet Top. If not at your dealer's write our nearest agency.

The Rayo Lamp a substantially made and handsome lamp. Burns for hours with a strong, mellow light. Just what you need for evening reading or to light the dining-room. If not with your dealer, write our nearest agency.

STANDARD OIL COMPANY (Incorporated)
