

Norwich Bulletin and Courier

113 YEARS OLD.

Subscription price, 12c a week; 50c a month; \$4.00 a year.

Entered at the Postoffice at Norwich, Conn., as second-class matter. Telephone Office, 450. Bulletin Business Office, 450. Bulletin Editorial Office, 35-1. Bulletin Job Office, 35-4. Whitehall Office, Room 2, Murray Building. Telephone, 210.

Norwich, Wednesday, July 21, 1920.

The Circulation of The Bulletin.

The Bulletin has the largest circulation of any paper in Eastern Connecticut, and from three to four times larger than that of any in Norwich. It is delivered to over 2,600 of the 4,953 houses in Norwich, and read by ninety-three per cent of the people. In Windham it is delivered to over 900 houses, in Putnam and Danielson to over 1,100, and in all of these places it is considered the local daily. Eastern Connecticut has forty-nine towns, one hundred and sixty-two post office districts and forty-one rural free delivery routes. The Bulletin is sold in every town and on all of the R. F. D. routes in Eastern Connecticut.

CIRCULATION

Table showing circulation statistics for 1901, 1905, 1906, 1907, and 1908, with values ranging from 4,424 to 7,510.

WHAT IS THE BOOK GOING TO BE

The question is being asked, What is the 125th anniversary Jubilee book going to be like? It is not going to be like any book ever printed about Norwich, if we have the right conception of it. It is going to be an accurate account of the entire celebration gathered by a competent scholar, from reliable sources and no pains are to be spared in making it the finest book ever printed about the city and town of Norwich.

It is expected that this book will have 400 pages, with 50 pages of appropriate portraits and pictures. It is to be sold for \$2.00, bound in cloth, and for \$3.00, bound in leather. There has been received orders for about 150. The Bulletin would like to make an edition of 1,000, but unless there is a quickened demand the edition is likely to be cut down to 500 copies.

The Jubilee book of 1859 was not to be had less than \$5 or \$7 a copy when wanted this year. This book will be at a premium in the future. The Bulletin is planning to have it ready for delivery about the 1st of December. Those who desire a copy should send their order to The Business Manager of The Bulletin, Norwich, Conn.

THE GOOD OLD VACATION TIME.

There are so many views upon the advantages and disadvantages of a vacation and how to spend it, that nothing less than a volume is sufficient to discuss upon every phase of this homely, every-day subject. To some a vacation stands for a rest, while to others it is spoken of as a change. Some people are sure that idleness makes the ideal vacation, others that changing from a vacation to an avocation is most profitable, still others that a change of air and scene and even society is essential to make a vacation what it should be. This may all be so, and the ideal vacation, if the worker and the traveler may set joy out of the order of their choice just as bees and butterflies get honey from flowers.

The strenuous vacation, the expensive vacation and the vacation which never had a substantial foundation to rest upon, in consequence of the condition following them, cannot be said to meet the true idea of rest or recuperation. The good, old vacation time is on now, and in many cases those who pay the bills and do the work are not having such a joyous time—it is the others who find "the splendid enjoyment" and whose nice over the out-going appears to know no bounds. This is no new condition—those who bear the burden find their pleasure in the joy of others, and while this is not always true, it is so often demonstrated that we feel sure that not all the good souls have passed from life.

The vacation which ends in added weariness, or in added debt which may not be paid up before December, is not ideal, but it is too common, and he who overdoes it, or who attempts "to live like a lord" on the interest of what he owes, is sacrificing too much to style.

The vacation that is right is the one which increases health and pleasure and adds nothing to our burdens. Prof. Simon Newcomb began life as a wood chopper and ended as America's greatest astronomer. The hard hitter in early life usually aims for something soft.

The Americans have invested \$130,000,000 in automobiles the past year. We are going some!

Here is a western recipe: To keep cool on hot days never think of Texas or

A RECORD NEVER BEATEN.

So far as is known, Edward Payson Weston is the only man in his years who has walked 2,395 miles in 105 days, an average of 27 1/2 miles a day. While this was five days longer than Weston's walk a half-century ago, he lost 15 whole days on account of heat and storms, and allowing for these unforeseen and unavoidable delays, his average daily stint was 43 1/4 miles a day. This shows what walking will do for a man in the way of muscle and endurance, for although 71 he arrived at San Francisco in first-class condition and in the best of spirits. There may be disappointment in the fact that he did not equal the performance of his youth in Weston, but this is irrational, for it was not to be expected that he could do it; and he has made a world record which is not likely to be broken by a walker over three score years and ten for years to come.

THE BOYS OF CORNELL IN KANSAS.

The call of Kansas for harvest hands brings to that state many enthusiastic and interesting volunteers to help reap the harvest, and among the 20,000 who sought employment this year there were none that beat the record of the boys of Cornell, Kansas City Journal tells the story thus: "Good morning," said a cheery voice, belonging to a lad not more than 22. His party straw came off his head, the policy hand making a streak of light as it flashed through air. His hair was light and very curly, his eyes blue, his complexion "peachy" as a girl's; his hands white. His clothes were strictly "colleges" in every detail.

"Were any boys in here asking for me this morning?" he asked, giving his name. "No," was the reply. "They'll be here, and I'll wait for them. If I may," he answered, taking a chair. "In a little while the shuffe of feet was heard outside, and above it the rumble of a song, which had in it something of 'Cornell, Cornell, I yell like hell, Cornell.' The Kansas City Journal tells the story thus: "Good morning," said a cheery voice, belonging to a lad not more than 22. His party straw came off his head, the policy hand making a streak of light as it flashed through air. His hair was light and very curly, his eyes blue, his complexion "peachy" as a girl's; his hands white. His clothes were strictly "colleges" in every detail.

"You are not going to accept of the position, are you?" he asked. "No, I haven't," Annie positively denied. "But you have had, my dear, an unsatisfactory position with 'Love, Honor and Obedience' as preliminaries to acceptance," Marlon audaciously affirmed. Then, unthinkingly of the laugh which arose at her, she closed her eyes while the clever guessing, she went on: "The conscientious teacher who educates her younger sister, and assists her brother to make a success of life will reap neither a great amount of money nor of fame, but in the consciousness

comes before the house.—Bridgport Standard. A merciful magistrate is Judge Hughes of the superior court in Boston, who, seeing the July suffering of his jurors, ordered 51 alpaca coats for them and paid for them out of his own pocket, thus lightening their clothing and at the same time maintaining a decent respect for sartorial court proprieties.—Waterbury American.

Why? If Governor Weeks wants to load an expense of \$20,000 a year upon the state in order to find out how many political friends he has, he should consider a privilege supposed to go with his office, but to the taxpayer he is stretching the limit. When the motor vehicles of the state can be handled by the secretary of state's office for \$2,500 a year, why must the state for an extra \$17,500—Bridgport Post.

Polar Region Mysteries. Many theorists have clung tenaciously to the belief that there is an open sea and comparatively constant temperature surrounding the axial point designated the North Pole. This theory has been greatly weakened by the observations of Peary and others who have traveled across what seems to be an endless frozen ocean in their journeys toward the pole. But it is certain that we do not by any means know all the temperature freaks of far north latitudes, and a discovery made only last month bears out this conclusion.

The Island of Bogoslof, located in Behring sea, has more than once attracted attention because of changes in conformation, brought about apparently by subterranean forces. A party which landed on the island from the revenue cutter Perry on the 10th of last month discovered that two elevated peaks had disappeared and that a bed of water that had formerly penetrated the land, but which had been connected with the open sea, was entirely enclosed by land and transformed into a lake. But the most remarkable fact was that the water of this lake had a summer temperature of 71 degrees in the center of the lake are two small islands, and one of these islands is constantly puffing out a volume of steam.

The unexpectedness of the earth are of vast extent, and though the preponderance of the gathered evidence is in favor of the conclusion that there is a frozen sea at the north end and a land area capped with ice a hundred feet thick at the south end, yet there is abundant opportunity for those with Jules Verne imaginations to locate spots where roses bloom, and tropic conditions prevail. If there is a small island in Behring sea, warmed from the fires beneath, why may there not be an area as big as the state of Ohio farther north so warmed? All that is needed is a crust over the entire area sufficiently thin and thin enough to be sufficiently hot and regular to create perpetual summer conditions in whatever polar spot may be selected.—Baltimore American.

WHAT THE PAPERS SAY. Clipped Wings Have Sprouted Again. At the beginning of the present session of congress, when Cannon was re-elected speaker, it was vociferously announced that his wings had been clipped and his autocratic authority modified. His appointments of house members of the conference committee and the spirit of disregard for fairness and justice shown by him would indicate that those clipped wings have sprouted again, and are in working order.—Bristol Post.

Nagel Deserves the Warm Hand. Secretary Nagel of the department of commerce and labor is doing things that will make any hard-working American feel like shaking him warmly by the hand. He is shaking the barnacles from his particular part of the ship of state. In common parlance, he is firing the loaders and he is doing a good job of it. The department of commerce and labor is practically new, but when Nagel got on the job he found it creaking by non-working employees who had gained their salaries in positions through political pull. He expects to clean out about a hundred of them and may go further.—Waterbury Republican.

Fit for Tat Expected. The bill passed by the house allowing women to vote in Connecticut on the license question was rejected by the senate and the disagreeing action sent it back to the house. The house is still to act on the senate's bill allowing taxpaying women to vote on matters of taxation, and it would not be at all strange if the senate's rejection of the house measure mentioned above were returned in kind by the rejection of the senate's bill when it

PERSONS TALKED ABOUT. William L. Burley, who is classified by rank as a private, although he is nearly white in appearance, has been a public school principal in New York for several years. Mrs. E. M. Kirkpatrick of Parma, Idaho, has given \$20,000 to the Southern college of Idaho. The money is to erect Sterry hall, in honor of her father, the late W. C. Sterry. General Castro, issuing proclamations from Santander, Spain, is a droll failure as an exiled Napoleon planning his return from Elba. No steamship company would sell him a ticket home.

London has a new chief of the fire brigade, Lieut. Sampson Sladen, R. N., having recently been elected to the office by the London county council. The salary of the office is \$4,500 a year, less than half what New York pays Chief Croker. Sladen's compensation was raised a while ago to \$10,000

It is real amusing to know that the American automobilist shows greater respect for law than the British auto-

THE BULLETIN'S DAILY STORY

THE PROPHECY.

The notes of the piano now filled the room with a full, rich melody, then softened into the sweet, plaintive tones of the minor key, into which the skillful fingers of the young musician glided.

"Pauline, don't. Your music is saying: 'This is the last meeting of the dear old club,' Annie Ella interrupted.

"Never mind, Pauline. She has a melancholy drop in her blood that she delights in sharing with us," Marlon Heik said, half-jestingly.

"It is one of Boston's suburbs, that the four girls were gathered. The room, sweet with the fragrance of roses which lined jars and vases, looked inexpressibly dear to the girls who had been such friends the two years that they had been students together at the New England conservatory. It would have been difficult to have found girls more unalike in looks, in dispositions or in social abilities, yet their love for one another had won for them the name of 'The Inseparable Quartette.' Once they had met at Marlon's home, where two years ago they had organized the 'Good Times' club. On the morrow the girls were to separate, not to meet again for five years, when they would hold their first reunion.

"The last notes of Pauline's music died away with a half-sobbing sound, to dispel the feeling of sadness which was fast gaining ascendancy. Marlon remained gazing after her, his eyes fixed on the girl who had been his first love. "Oh, say, girls, let's each turn over and reveal and prophesy which shall ultimately be ours, success or failure. Who agrees?"

"All we do!" was the simultaneous response. "Marlon, you tell," said Crystal. Marlon, the really talented one of the set, "for to you Dame Fortune shows nothing but her treasures."

"Yes, Marlon, do," the others urged. "Well, I must take your hand so you can transmit my personality to me," Marlon looked demurely and began with a solemn voice: "I see four years of hard labor not unmingled with discouragement, and then assuredly success. When we meet again, five years from today, Pauline will play a beautiful original melody that she will dedicate to me in remembrance of this prophecy."

"Now, Annie, hearken to what fate has in store for you! Yours is more complicated. Marlon closed her eyes while the girls listened intently to what she was about to say. "You are not going to accept of the position, are you?" he asked. "No, I haven't," Annie positively denied.

"But you have had, my dear, an unsatisfactory position with 'Love, Honor and Obedience' as preliminaries to acceptance," Marlon audaciously affirmed. Then, unthinkingly of the laugh which arose at her, she closed her eyes while the clever guessing, she went on: "The conscientious teacher who educates her younger sister, and assists her brother to make a success of life will reap neither a great amount of money nor of fame, but in the consciousness

ANOTHER WOMAN CURED

By Lydia E. Pinkham's Vegetable Compound

Gardner, Maine.—"I have been a great sufferer from organic troubles, and a severe female weakness. The doctor said I would have to go to the hospital for an operation, but I could not bear to think of it. I decided to try Lydia E. Pinkham's Vegetable Compound, and was entirely cured after three months' use of them."—Mrs. S. A. Williams, R. F. D. No. 14, Box 39, Gardner, Me.

No woman should submit to a surgical operation, which may mean death, until she has given Lydia E. Pinkham's Vegetable Compound, made exclusively from roots and herbs, a fair trial. This famous medicine for women has for thirty years proved to be the most valuable tonic and renewer of the female organism. Women residing in almost every city and town in the United States bear willing testimony to the wonderful virtue of Lydia E. Pinkham's Vegetable Compound. It cures female ill, and creates radiant, buoyant female health. If you are suffering from any of the following ailments, give it a trial.

Mrs. Pinkham, at Lynn, Mass., invites all sick women to write her for advice. Her advice is free, and always helpful.

Rich or poor or proud and handsome, Even you can read this Chanson, By no law of luck or chance, Every tooth you save enhances, All your smiles and conversation, Renders joy to all relations, Don't despair when teeth are aching, Save them, all their shapes remaking, Life's prolonged and health extended, Every time a tooth is mended, You will find your joy remedied, Dentist I "my crown" reveals it, Every art by art conceals it, Nature gave you all in good season, Teeth to eat with, minds to reason, Is it her fault, yours or mine, Shall their loss be mine or thine, Thou shalt know in all good time.

DR. R. E. BEARDSLEY 237 Main Street apr20d

DON'T WORRY; It Makes Wrinkles. Worry over ill-health does you no good, and merely causes wrinkles. That make you look older than you are. If you are sick, don't worry, but go about it to make yourself well. To do this we repeat the words of thousands of other former sufferers from womanly ills, similar to yours, when we say, Take Viburn-O.

It is a wonderful female remedy, as you will admit if you try it. Directions for its use are printed in six languages with every bottle. Price \$1.25 at druggists. FRANCO-GERMAN CHEMICAL CO. 106 West 129th Street, New York, mar21d
