BY END RUNS AND FORWARD PASS

Harvard Varsity Scores in First Scrimmage—O'laherty Looks Good as Quarter—Leaders Stay the Same in American League—Cleveland Drops a Notch.

Cambridge, Mass., Sept. 23.—The Harvard football squad had the first scrimmage of the year today. It lasted twelve minutes—long enough for the first team to secure a touchdown by reason of a succession of end runs and a forward pass cleverly worked by O'laherty, who seems to be a very likely candidate for quarterback. Morrison and Corbett showed up well in the back field. Three of the varsity players, Minot, Gil Brown and West were not in the first team today.

ATHLETIC STAR FOR ACADEMY CAPTAIN

Jack Gallivan at the Helm—Scrimmage Practice Today.

Thursday it was expected that the Academy eleven might have a little

ual drill has gone on all this week under the eye of Coach Tirrell and Captain Jack Gallivan, so that many of the elementary points of gridiron lore have been drilled into the ambitious squad that has been out on the campus. Along with the veteran material to draw on this season for a strong eleven, the Academy will have the advantage of being under a captain with a lot of football experience, and one of the most prominent athletes in all branches of sport that the school has had in recent years. On the football team last season, he with Chapple McKay made up the premier pair of ends. The boys were not without their long runs after receiving the forward pass that many times put the red and white yards nearer their opponents' goal. He was also almost an invincible gainer by this pretty play of modern football, being a sure dependence for a good gain when the Academy needed to cover a few more yards on the field. This year it is probable that he will be seen in the backfield, where he will be equally valuable to the Academy and a terror to the opposing eleven.

Three Out in Reliability Run.

Albany, N. Y., Sept. 23.—Three of the automobiles in the Frank A. Munsey reliability contest from Washington to Boston and return were disabled in the third run from Milford, Pa., to Albany and failed to report here tonight. The run tomorrow is from Albany to Boston with a check at Springfield and Worcester. Six of the 25 contestants have perfect scores.

Association Football at Schem Park.

E. C. Hilton, the Norwich association football captain, made arrangements Thursday evening with Rev. Hugh Treanor, by which the football team can have Schem park for their games this fall and winter. A meeting of the football club is to be held soon to get things under way and the season will then be opened.

Little King Wins Holly Stakes.

Gravesend, N. Y., Sept. 23.—Little King, at 5 to 1, and showing big improvement, won the Holly selling stakes, about six furlongs, here today, defeating King of the Hill, a favorite, by a head, with Pretend, the favorite, third. Little King opened up a big lead early and looked as if he would win easily, but King of the Hill, who came at a gallop, just failed to get up.

It was Reported in Washington

that cholera has appeared in Vladivostok.

FINANCIAL AND COMMERCIAL.

TENDENCY TO HIGHER PRICES.

Dry's Total Dealings the Smallest in Over a Week.

New York, Sept. 23.—There was some further liquidation at times in today's stock market. When relieved from this pressure prices tended to recover, but the dealings dwindled to such an extent as to reduce the day's total to the smallest figure in over a week. The day proved almost barren of news, and the market of very little interest. In the period of dullness one or two specialties were picked out for individual upward movements. The telegraph stocks were an instance. Mackay companies rose buoyantly to new high record figures accompanied by rumors of intended dividend increases. Western Union here it company, and American Telephone and Telegraph was affected to a less extent, the movement in concert with these stocks invariably gives rise to rumors of intended consolidation. Money both on call and on time seemed to grow somewhat easier, perhaps as a result of liquidation of stocks already effected. It was reported, however, that some further calling of loans was being made both by the banks and the trust companies. The currency movement was against the banks since the sub-treasury has started again to withdraw large sums from the banks, the amount since the last bank statement having risen to \$2,822,000, although this compares with a loss to the same source for the similar period last week of \$5,542,000. The deposit of \$200,000 for the sub-treasury for telegraphic transfer to New Orleans was an incident of the day to attract attention as marking the beginning of a new demand upon the New York banks. The storm losses and the high price of cotton. It was assumed, might have hastened this demand to some extent. The money situation, in fact, was accepted on the side of business affairs there were none but helpful influences. The accelerated pace of the demand for iron and for different grades of steel products was widely testified to. President Corey of the United States Steel corporation contributing the assertion that "we are right now in the midst of the greatest development in the history of the iron and steel business. Next year will witness a record-breaking production of steel in every line."

The crop news was good, except for the storm losses in the cotton belt and more hopeful estimates were current of the dimensions of the coming yield of corn. These influences were retained by the money position, but they contributed to the recovery from the early positive depression, without avail in the endeavor to hold the recovery. Bonds were irregular. Total sales, including United States Steel, States bonds were unchanged on call.
