is Perfectly Safe. The man whose sons are all daughters continues to regard football as a grand game.—Chicago Record-Herald.

Found Teeth: Now Looking for Man. Whoever has lost a set of upper false teeth, or has had them stolen, by calling on George Quinn, Mr. Quinn does not know how the teeth came to be where he picked them up near the railroad track above the station, but he does not believe that they were lost as the result of their owner being struck by a train. The teeth belong to a man and are in good order. They do not seem to be injured in any way, and will be as valuable as ever to the owner if he can be found. Dentists in the city may be asked to identify the teeth if the rest of the man cannot be found.

Woman's Belongings Found. Earl Winslow, assistant in the post-office, reports having found a woman's hat, purse and shopping bag on the railroad track near the stone bridge over the river at the south end of the side track in Danvers. The coat is a short, dark blue garment, with small amount of braid trimming. The hat was a rather small shape of straw and was draped with a dark veil. The purse was empty and the handbag had been turned inside out.

Mr. Winslow made a search of the vicinity, but could find no evidence to indicate that there is a mystery connected with the articles being on the track. After looking about the territory around the bridge and in the river without finding any indication of there being anything wrong, he left the articles where he had found them. The matter has not been reported to the police.

LECLAIRE FUND '00. Liberal Response to Appeal for Monument Subscriptions.

A final appeal is being sent out to those who may be interested in the erection of a memorial to Dr. Charles J. LeClaire. The project of raising a fund for this purpose was commenced upon after the death of Dr. LeClaire last spring, and has been in charge of a committee of local men of which Peter Boniface has been the head. Circulars were sent all over New England to fraternal societies with which the deceased physician was affiliated, and many responses have been received. The fund has grown to about \$500 and pledges have also been received that more money is to be sent.

The committee in charge are desirous that the fund be completed in sufficient time to insure having the monument placed in position on the LeClaire lot in St. James' cemetery on the first anniversary of the death of Dr. LeClaire, which will occur in the early part of next April.

Gifts to the fund from many friends of Dr. LeClaire have been received and

MILK IMPROVEMENT. Report from State Laboratories Shows Decided Improvement at Ansonia.

The report on the analysis of milk sent from Ansonia to the state board of health laboratories in Middletown on October 27 shows a very decided improvement in the quality of the milk. Twelve samples were forwarded, and all except three of these show that the number of bacteria per cubic centimeter is less than 50,000. One of the exceptions, however, is a very bad case, showing 3,560,000 bacteria, the other two showing 422,500 and 390,000 respectively, sufficient to place them in the unsatisfactory class. This improvement is due in part to the better care that is being taken of milk and in part to the cooler weather.

In a note on the back of the report it is stated that bacteria below 10,000 per cubic centimeter indicates milk of very good quality, and bacteria from 10,000 to 20,000 indicates milk of good quality. Three of the samples show less than 10,000 bacteria, one reading 4,000, another 7,000, and another 9,000.

Concerning the percentage of fat only one of the samples is below legal standard, 3.25 per cent, and this is down to 2.9. One of them is up to eight per cent, another up to six, several at five and the rest at four or a trifle better. The milk that showed 422,500 bacteria showed eight per cent of fat. The reflectometer readings, which show the amount of water in the milk, indicated that none of the milk had been watered.

It looks as if the fight for good milk in Ansonia which has been waged all summer long is bearing fruit, and if it is followed up, as it undoubtedly will be, during the coming winter, the supply will be far better than it has ever been before, and next summer should be much better than it has been during the past summer.

BUILDING NEW TROLLEY. Five Miles of Road to Be Constructed at Middletown.

At a meeting of the directors of the Meriden, Middletown & Guilford road, held in Meriden Thursday, a contract was awarded Frank Arrington for building the five miles of trolley road between Middletown and what is known as the Arrington corner in Durham.

Frank Arrington signed the contract Friday afternoon and proposes to commence work on the new line this week.

The new line will form a connecting link between the present Middletown line and Meriden, so that it will be possible to ride from Middletown to Durham by way of Middletown.

Later, the company expects to extend the line down into Guilford and thence by connection to New Haven.

Miss Alice Skinner going to prison. Miss Alice Skinner will be taken from the jail at Brooklyn today (Friday) and transferred to the state prison at Wethersfield. Sheriff P. B. Sibley will have charge of the prisoner, who was recently sentenced in the superior court at Willimantic to serve five years for an attempt at arson.

Danielson friends have received papers from Henry F. Clark, who left Danvers a few weeks ago to go to spend the winter with relatives on the Pacific coast. Mr. Clark is now in Los Angeles.

Frank Young Custodian of Armory. Frank Young has received an appointment from the state to be ordnance sergeant for the armory in Danielson. Sergeant Young, under the appointment, will have charge of the armory and all property of the state that it contains, and supervision of the grounds about the building. There is a salary attached to the appointment.

First Day of Indian Specimen. Thursday was a perfect specimen of an Indian summer day, as delightful as an idealist could desire. The temperature climbed to 65 during the early afternoon and brought the clear-weather shoppers in great number.

Woman's Belongings Found. DANIELSON AND PUTNAM NEWS.

DANIELSON Alice Skinner to Go to Wethersfield—Frank Young in Charge of Armory—\$500 Received Towards LeClaire Monument Fund.

Mrs. Burnette Maurer of Potter street has been taken to the Day-Kimball hospital at Putnam. It is thought that she is suffering from appendicitis.

Miss Lillian LeMay and Miss Yvonne LeClaire are at Woonsocket, the guests of friends today (Friday).

Abel L. Reeves was in Woonsocket Thursday.

Henry T. Driscoll of Northampton was in Danielson Thursday.

To Attend Hartford Ceremonies. Capt. and Mrs. A. P. Woodward, Lieut. Albert L. Darbie, Attorney Sablin S. Russell, Sheriff Preston B. Sibley and Representative E. H. Keesh will go to Hartford to be present at the dedication of the state armory.

Miss Reeves Read Address to Governor. The convent of Jesu Marie at Woonsocket has been organized for twenty-five years, and this week the silver anniversary is being observed with ceremony. The observance extends to the Hartford convent to be present at the dedication of the state armory.

Alice Skinner Going to Prison. Miss Alice Skinner will be taken from the jail at Brooklyn today (Friday) and transferred to the state prison at Wethersfield. Sheriff P. B. Sibley will have charge of the prisoner, who was recently sentenced in the superior court at Willimantic to serve five years for an attempt at arson.

Danielson friends have received papers from Henry F. Clark, who left Danvers a few weeks ago to go to spend the winter with relatives on the Pacific coast. Mr. Clark is now in Los Angeles.

LECLAIRE FUND '00. Liberal Response to Appeal for Monument Subscriptions.

A final appeal is being sent out to those who may be interested in the erection of a memorial to Dr. Charles J. LeClaire. The project of raising a fund for this purpose was commenced upon after the death of Dr. LeClaire last spring, and has been in charge of a committee of local men of which Peter Boniface has been the head. Circulars were sent all over New England to fraternal societies with which the deceased physician was affiliated, and many responses have been received. The fund has grown to about \$500 and pledges have also been received that more money is to be sent.

The committee in charge are desirous that the fund be completed in sufficient time to insure having the monument placed in position on the LeClaire lot in St. James' cemetery on the first anniversary of the death of Dr. LeClaire, which will occur in the early part of next April.

Gifts to the fund from many friends of Dr. LeClaire have been received and

many more are expected from Danielson and surrounding towns.

Webster Dogs for Coon Hunt. More than a score of members have signified their intention to go on the coon hunt that has been organized from among the members of the Boonham club on Saturday night. The party will go to East Killigly early in the evening and the hunt will be held in the vicinity of that place. Fred Taft of Webster, one of the most famous coon hunters in this part of New England, will be along with four extra good dogs.

Exit Yellow Block. The yellow block has been razed and a pile of lumber is all that remains to show where the building has stood for so many years. Mr. Nado made a good purchase when he got the building for \$5 and will be able to make considerable profit out of his venture as there is some good lumber in the building.

Mrs. H. M. Hovey Injured by Fall. Word has been received here that Mrs. H. M. Hovey, wife of the former principal of Killigly high school, has been seriously injured by a fall and is now in a state of ill health equal to that which kept her in a patient in the Day-Kimball hospital at Putnam for several months in the early part of this year.

Mr. and Mrs. Hovey are now located in Litchfield, this state.

Personal Mention. Representative E. H. Keesh and Attorney Sablin S. Russell will attend the Yale-Princeton game at New Haven Saturday.

Joseph Curtis and Miss Evelyn H. Curtis will go to Providence tomorrow for a visit with friends in that city, where they formerly lived.

Rev. and Mrs. R. S. Cushman are at Middletown to attend the inauguration of President Sharplin Tuesday, at the University of which Mr. Cushman is an alumnus.

Sunday will be observed as Thanksgiving Sunday at the Methodist church and the floral decorations will include a rare display of the beautiful flower. Special music has been arranged. In the evening the Chrysanthemum.

Social Committee of Ladies' Auxiliary. The following have been chosen social committee of the ladies' auxiliary of the Y. M. C. A. for November and December, the first social of the season to be held Wednesday evening, November 17:

For November—Miss Mattie O'Brien, Mrs. C. H. Starkweather, Mrs. John Reed, Mrs. Charles Potter, Mrs. J. M. Clarke, Mrs. John Paine, Miss Emma Burbank, Mrs. Mary Smith.

For December—Miss Grace O'Brien, Miss Grace Stanton, Miss Sarah Putnam, Miss Cora Chase, Mrs. C. H. Pike, Mrs. George Guild, Mrs. F. E. Colvin, Mrs. W. E. Keesh.

Mrs. B. Drabble of Providence is the guest of her parents, Mr. and Mrs. James A. Nichols.

PUTNAM High School Plays Woodstock Today—Address by Rev. J. W. Walker—Local Grange to Visit Woodstock Grange—News of Persons and of Places.

Putnam High school and Woodstock in Hammond hall this afternoon in the first contest between the schools this season.

There will be no session of the superior court in Putnam Tuesday. The adjournment for Wednesday concluded business for this week.

Described European Experiences. Several friends of Rev. J. W. Walker, pastor of St. Philip's church, heard him describe his experiences during a recent trip abroad, at the home of Mr. and Mrs. Richard Gorman, Thursday evening. The party included a majority of those who gave Mr. Walker a farewell party on the eve of his departure for Europe.

Hector Bayeur has been elected secretary of the Naturalization club, to succeed Attorney George E. Carter, resigned. Ubric Beauvois was elected assistant secretary to succeed Mr. Bayeur.

Democrats Talk on Nominations. Alderman-at-Large L. E. Smith for mayor and Omer Larue for alderman at-large is a combination that some of the democrats are talking for places on the ticket of that party at the coming city election. The gentlemen mentioned will probably be urged to be candidates.

To Build Big Reservoir. The French River Textile company, at Mechanicville, is arranging for the building of a reservoir of 150,000 gallons capacity to be located on the hill in the village of Mechanicville, and to be used to supply that manufacturing village with water.

Grange Invited to Woodstock. The members of Putnam Grange have been invited, and have voted to accept the invitation, to be guests of the members of Woodstock Grange at a neighborhood meeting to be held next Tuesday evening.

SALVATION ARMY To Commemorate First Anniversary of Advent in Putnam. The first anniversary of the advent of the Salvation Army in Putnam will

be observed tomorrow and Sunday. The observance is to be opened at 7 o'clock Saturday evening with a musical and literary program. At this time Captain A. H. and Mrs. Withee will make their annual report. This report will open the eyes of Putnam people to the amount of good work which the Salvation Army is doing in town. The amount of charitable work that the Captain and Mrs. Withee have been able to do under the trying circumstances of a first year in a town will be no less than surprising. The great part of their effort has been expended on the homeless—the surface sufferers, people deserving but needy, who have been overlooked in the distribution of the surplus goods of the kindly citizens of Putnam. They have done their work quietly, but none the less effectively, and a condensed statement of their activity will show what they have accomplished with what the people have given them.

Sociality Gives Whist. The members of the English speaking society of the Young Ladies' Sociality gave a whist in A. O. H. hall Thursday evening, at which many were present.

A party of the many Putnam persons who received invitations will go to Hartford today to be present at the dedication of the new state armory.

Dead Man Not Yet Identified. Inquiry among many of the transient mill hands in the small villages about Putnam has failed to lead to any clue that would help in establishing the identity of the man killed near the long bridge last Friday night by the Borton-bound express.

In all probability the man killed was a mill worker, but though descriptions of him have been given by many who might know him, not a scrap of information of value has been obtained, and probably never will be.

Claim Fox Bounties. Russell W. Mowry, O. N. Baker and A. E. Cutler have claimed bounties for having shot foxes within the town of Putnam this fall.

Officers of A. F. Society. Following are the newly elected officers of the A. F. Society of the Methodist church. President, Miss Alice Bolcher; vice president, Miss Merwin Cutler; secretary, Miss Beatrice Bishop. The society will meet tomorrow (Saturday) afternoon with Miss Mildred Rice.

Station Agent Gilbert Ill. Carl Gilbert, station agent of the N. Y. N. H. & H. Railroad company at Pomfret, is ill with typhoid fever at the Day-Kimball hospital. The disease is prevalent in sporadic form in various villages in this section of the county, and is believed to be the result of a "return" and poor water supply.

Francis J. Camden of Worcester was in Putnam Thursday.

To Collect Thanksgiving Donations. All the Thanksgiving day donations for the Day-Kimball hospital are to be received next Thursday. Members of the women's board will be at L. S. Smith's store to receive the bags that are to be sent in, not only from Putnam, but from surrounding towns.

MERIDEN AERONAUTS Have Completed a Machine for Sky Flights.

Two young men of Meriden, who have considerable mechanical ingenuity, have practically completed a glider, or aeroplane without motive power, and they have tried it out with marked success. They are modest chaps and have kept their efforts to themselves, but the trials have attracted attention, although they have made them in the evening.

Frederick Stevens, a foreman at Factor H. and E. D. Nooney have been at work on the thing for some time and they have constructed a biplane glider out of spruce, piano wire and muslin. The planes are 20 feet long, four feet wide and they are hung four feet apart.

There is no damper or elevating planes in front but there is a rudder of two intersecting planes in the rear which help give balance and direction. There is an opening in the lower frame and into this the operator puts his head and shoulders. He then starts with a run on a hill and clears the ground as the glider straightens out in the wind. The operator balances the machine by moving his body—thus tipping the planes up and down.

The young men have practiced on the hills at the golf links, and although they have not had much wind, still they have glided 50 and 60 feet with ease. They assert that a steady wind and a greater height will permit them to go a much greater distance.

They are doing this partly for the sport and partly also for the experience it gives them in handling planes, as they intend to build a machine with propellers and an engine, and thus have a practical aeroplane. Their efforts will be watched with interest as it is believed they are experimenting in the right direction.—Meriden Journal.

USING THE TELEPHONE. Experiment on Northampton Division in Handling Trains.

Railroad men of the New Haven system are much interested in the outcome of the road's plans for the equipment of the telegraph and vision stations with telephones for a test of their efficiency in train despatching. Many railroads use the telephone for this purpose, and the Santa Fe system, the first to adopt this method of despatching, has given the telephone a good trial in this work and now has about 3,000 miles of track operated by telephone and telegraph.

It is believed, however, that the telegraph service will always be maintained, though the telephone equipment will be used to a great extent on the Northampton line.

In transmitting orders by telephone, the dispatcher sends out in full the names of stations, numbers of engines and trains, the times and the proper names involved. This, however, does not insure accuracy and precision, and the dispatcher writes the order in the record before him as he gives it, not waiting to make the record of what it is until he has written it to him by the operator, as is done in the telegraph operation. This change in making the record of the order from subsequent to the time it is given is very important from the standpoint of absolute accuracy.

Building of Concrete Blocks. Considerable interest has been shown by the public in general and mill owners in particular in the construction of a large addition to the H. A. Matthews Manufacturing company's plant at Seymour. This building is 10x50 feet, and when completed will be two stories high. It is being constructed of concrete cement blocks, the first of its kind to be erected in Seymour.

This new building will give the Matthews Manufacturing company additional floor space of 12,240 feet, and will considerably increase the already large capacity of the plant. This company has been gradually working into the manufacture of automobile parts and it is partially on this account that additional capacity is needed.

Matter of Self-Preservation. With the Taft cocktail at New Orleans and the artillery punch at Savannah, it is quite clear that President Taft must be kept warm and none too soon.—Pittsburg Gazette-Timer
