The church quartette and a chorus of twenty led in singing of Alexander hymns in the opening service, and the anthem, I Love to Hear My Saviour's Voice (Glover), expressively sung by the quartette.

The soloist for the evening was Raymond E. Johnson, who was heard in two violin numbers, the first, the Nocturne from Mendelssohn's Midsummer Night Dream, and the second, the Schumann's Traumerlied, which was given with expression and feeling. Rev. P. C. Wright announced Mr. and Mrs. Albert Foster of Providence, violinist and cellist, for next Sunday evening.

Rev. Mr. Wright's sermon was upon the topic, Some Lessons Under Which Men Live. Instancing some of the geographical and astronomical details of the world, the preacher mentioned some delusions that hold men, according to the words of Jesus, from seeing the possibility of forecasting His coming, and the delusion of thinking all is well with the world, and the crowd. It has never been men who walked in the crowd, that have moved this world, but men who have seen the crowd and alone with God for true life, and watch and pray always that they may be worthy to stand before the Son of God.

SHELTERING ARMS SERVICE. W. D. Tillson and Spooner Chorus Choir Greatly Appreciated.

Assisting in the service were many young people from the Spooner chorus choir, under the direction of George A. Turner. The service of song opened with God Will Take Care of You. A duet, in Jesus, by James L. Case and George U. Turner, and the tenor solo, I Am With You, by Mr. Turner, were given with fine effect. HOLY, ALL POWERFUL. Is the Name of Jesus—Rev. F. L. Fitzpatrick Preaches Against Its Irreverent, Indifferent Use.

The ingratitude, as well as the sin of profanity and irreverent use of the name of Jesus, when at the high mass in St. Patrick's church, Rev. F. L. Fitzpatrick preached from the epistle for the day, Acts iv:13-18, his sermon on the name of Jesus. He said there is no other name under heaven given to men, whereby we must be saved. The preacher considered the name of Jesus as most holy and most powerful, directing attention to its origin, its significance, and Christ's own promise as to its efficacy with His Father.

The name first spoken to Mary in the salutation of the Angel Gabriel, "and thou shalt call His name Jesus," the name which was the sole means by which the apostles conceived the known world for Christ, has ever been the strength of the weak and the comfort of the sorrowing, epitomizes the gospel of Christ's sacrifice for us, is the final message of hope and cheer for the weary and the faint. Realizing its meaning then, the speaker urged his listeners to improve the opportunity on Sunday, to receive and pledge themselves against its irreverent and indifferent use.

The high mass was celebrated by Rev. Joseph E. McCarthy. The offertory was sung by Roderick F. Sullivan, accompanied with customary organ and effective registration by the organist, Mr. Farrell.

The American Excess

Of Good Living

The Principal Cause of the Great Prevalence of Indigestion and Dyspepsia

A Trial Package of Stuart's Dyspepsia Tablets Sent Free.

Man inhabits every part of the globe where external influences can be successfully resisted. Food is an important element in effecting this, and nature has provided for it accordingly. The colder the climate the more animal food and oily substances are required; the warmer a preponderance of vegetables and fruits is necessary in one's diet.

The whole-hulder of the fur-clad Eskimo, and the rice of the nude African, are as much necessities of locality as matters of choice. The same indications exist in civilization. Thus, the diet in America and England is essentially different from that in Italy, Spain and Egypt.

The effects of universal communication are nowhere more obvious than on the luxuriant island of Hawaii. The refined cuisine, all climates, both sea and land, are laid under contribution, and the result is a diet that is indigestible, without assistance everything that is put into it. Combining together such varied products, the neglect of the relation between climate and food, are very active causes of dyspepsia.

The heavy substantial dishes of this climate accord badly with the thermic capacity of the stomach, and inflexibility in regulating the kind and quantity of food is a cause of a large proportion of the ill health and stomach troubles among the English and Americans.

Thousands of people who have suffered from stomach trouble, and a general ill-health resulting therefrom, have purchased and used Stuart's Dyspepsia Tablets after each meal, and whenever any of the well-known symptoms of indigestion are present. These tablets after each meal, should contain every element that exists in the stomach to digest the food, and in the exact
