

Norwich Bulletin and Courier.

114 YEARS OLD.

Subscription price, 12c a week; 50c a month; \$5.00 a year.

Entered at the Postoffice at Norwich, Conn., as second-class matter.

Telephone No. 210.

Bulletin Business Office, 430, Bulletin Editorial Rooms, 25-3, Bulletin Job Office, 25-4, Williams Office, Room 2, Murray Building, Telephone, 210.

Norwich, Wednesday, April 20, 1910.

The Circulation of The Bulletin.

The Bulletin has the largest circulation of any paper in Eastern Connecticut, and from three to four times larger than that of any in Norwich. It is delivered to over 2,000 of the 4,000 houses in Norwich, and read by ninety-three per cent. of the people. In Windham it is delivered to over 300 houses, in Putnam and Shelton to every fifth, and in all of these places it is considered the local daily.

Eastern Connecticut has forty-five towns, one hundred and forty-five postoffices, and forty-one rural free delivery routes.

The Bulletin is sold in every town and on all of the R. F. D. routes in Eastern Connecticut.

CIRCULATION

Table showing circulation statistics: 1901, average 4,412; 1905, average 5,920; April 16, 7,666.

A GLORIOUS RAIN.

The heavy shower of Monday night was a blessing to this region and the soaked earth will soon be ready to cultivate in earnest; and the crops that had been planted will now show accelerated growth.

SENSIBLE GIRL GRADUATES.

The girls of the graduating class of the Lynn, Mass., high school have distinguished themselves by their good sense in voting to make their graduating dresses plain white muslin dresses without laces or frills.

EDITORIAL NOTES.

If the comet has no tail, would Mr. Bailey know his own comet should he see it?

A DEATH TRAP.

The excitement at New Haven over Coroner Mear's report, which shows that negligence was largely the cause of the death of the six firemen there, seems to be warranted by the findings which place the blame for the accident upon those in charge of the jail.

It is gratifying to think that a Massachusetts alienist finds that Roosevelt shows no signs of insanity!

The tall of Roosevelt's kite attracts attention to many people.

The girl cannot see what there is in a baseball game to excite a boy so; and the boy is equally puzzled over the agitating effect upon a girl of a millinery display.

A Vermont boy has been mangled by a railroad torpedo he found and tried to crack. There appear to be too many of these torpedoes left around.

Governor Hughes is capable of filling the vacancy caused by the death of Justice Brewer, and the people hope that he will accept the appointment.

Do not think that the census enumerator is making big wages. It is a job task for a smart man.

ARBOR DAY.

Friday next is Arbor Day in Connecticut, and it should be honored by the citizens as well as by the pupils of the schools. It is a day devoted to a practical purpose. Governor Draper in his Arbor day proclamation says:

"I urge all citizens of the commonwealth to do something practical and definite on that day towards planting new trees or improving those already growing. It behooves every person to do his share. If he cannot do much he can at least do something to assist in the preservation of the shade trees in our cities and towns, which adds so much to the beauty and comfort of our lives."

FOR PRACTICAL TEACHING.

In an address made at Birmingham, Ala., to the largest number of teachers that ever met together in that state, Booker T. Washington criticized the present day educational system as follows:

"We want to see to it that education is made to concern itself with the common, the practical, the things of life, and with the extraordinary things of life."

"I will guarantee to say that the average negro child in Alabama hears more about the city of Peking in China than he does about the kind of pig or the kind of cow, or the kind of vegetable that will best grow in the community where that child is."

"I am sure that it will pay three-fourths of the teachers who are here gathered to disband their school for a week after their return home, so far as the old style of teaching is concerned, and let teachers and pupils occupy themselves in examining and beautifying the inside of the school room, in whitewashing or painting the outside of the school room, in putting up partitions on the broken down floor, in putting new hinges on the gate, in cleaning up all trash and rubbish around the school house, in planting some flowers and vines and vegetables in the school house, in making the desks and tables in the school room attractive and decent, in teaching the boys and girls how to keep themselves clean, to clean their teeth, to properly patch and darn their clothing."

"Education should fit one, as I have stated, to live successfully in the environments in which he is placed. In our case, the negro child in the south is surrounded by another race of a different color, with a different history. We are not exceptional in that respect. There is scarcely any portion of the world that is occupied wholly by one single race. Where two races differ in language, different in color, different in antecedents dwell together, it is highly important that each child be taught that he must be liberal, broad, generous, sympathetic in relation to the other race. Nothing would more quickly dam and fetter and injure for all time the negro child than for him to grow up with a spirit of racial hatred in Alabama. Teach him on every occasion that love is more attractive and decent, in teaching the boys and girls how to keep themselves clean, to clean their teeth, to properly patch and darn their clothing."

"Education should fit one, as I have stated, to live successfully in the environments in which he is placed. In our case, the negro child in the south is surrounded by another race of a different color, with a different history. We are not exceptional in that respect. There is scarcely any portion of the world that is occupied wholly by one single race. Where two races differ in language, different in color, different in antecedents dwell together, it is highly important that each child be taught that he must be liberal, broad, generous, sympathetic in relation to the other race. Nothing would more quickly dam and fetter and injure for all time the negro child than for him to grow up with a spirit of racial hatred in Alabama. Teach him on every occasion that love is more attractive and decent, in teaching the boys and girls how to keep themselves clean, to clean their teeth, to properly patch and darn their clothing."

Dr. Washington recognizes that truth and a spirit of kindness if perpetuated in will elevate and save any race.

EDITORIAL NOTES.

If the comet has no tail, would Mr. Bailey know his own comet should he see it?

Maine reports sardines as being short; but there is no diminution of sardines herabouts.

Since Fashion has moved the waist line ten inches in a many years, inquiry is made whether "up or down."

Mice may carry the microbe of the measles, but they are not the carriers of Newburyport, Mass., has had over 500 cases.

Mayor Gaynor of New York is showing the no quarrel or does his friends enemies full as fast as he does friends.

Happy thought for today: The man who is fond of being with the majority should have no doubt about his final destiny.

Sara Bernhardt is about to make her fifth farewell tour of America. It comes high, but we all enjoy Sara's farewell.

Automobilists doesn't require a doctor and a trained nurse to cure it. A bank check or a mortgage affects a perfect cure.

A Philadelphia doctor declares there is no dirt without disease. He can have no doubt disease is in the air all of the time.

Josef Israel painted "A Frugal Meal" and it sold for \$19,500 at auction. It is only frugal meal that ever commanded such a price.

All members of the family should be reported to the census enumerator and all dogs to the town clerk. It is good policy to do both.

Because Jeffrey's wind pleases his trainers is no sign that it will displease Johnson. He is looking for something to take hard blows.

If the socialist mayor of Milwaukee succeeds in giving the people the best government they ever had, he will make socialism popular there.

The cold-storage men do not have it all their way. They offer high prices for eggs, but the egg-shellers get them two or three cents better a dozen.

It is so much cheaper to mistake

THE BULLETIN'S DAILY STORY HER MISTAKE

Cogswell had growled and fussed about the three suits of underwear she had bought for her husband.

"I declared with finality that they were to be constructed for a orange-outing or baboon, because the sleeves were abnormally long, entirely out of proportion to the average garment."

"I know you," said Cogswell, "why I was moved to fall in love with you in the first place, it was for your tender heart and sympathetic nature! Fall to with the scissors, darling!"

one's wife for a burglar than to obtain a divorce, that men who thus "wider" themselves are suspected.

The Soaring Sandwich.

Thousands and thousands of the downtown lunch business are mournfully reading the latest items of sandwich news.

It is proposed to establish a wireless telegraph station at the meteorological observatory on Mount Mirador in the Philippines, to give warning of typhoons to vessels in the China sea and points along the China coast.

HER MISTAKE

Mrs. Cogswell thereupon laid violent hands upon the two suits just home from the laundry and, mindful of the really remarkable length of the sleeves, was endeavoring to cut them off.

"I declared with finality that they were to be constructed for a orange-outing or baboon, because the sleeves were abnormally long, entirely out of proportion to the average garment."

"I know you," said Cogswell, "why I was moved to fall in love with you in the first place, it was for your tender heart and sympathetic nature! Fall to with the scissors, darling!"
