A Bright Shine for Nickel Plate. Nickel faucets and bathroom fixtures are ornamental so long as they are kept bright. The trouble is to keep them bright. There are many substances on the market which profess to keep nickel in bright, shiny condition, but most of them are to be avoided as they contain harsh, gritty substances which scratch the nickel and silver plate. Warm soda of the Gold Dust washing powder and water will however, clean these fixtures thoroughly and safely. If they are dim, rub a little of the Gold Dust directly on the surface, rinse and wash with a piece of soft linen or flannel. Nickel highly washed each week in Gold Dust and water, and wiped with a soft cloth, will never get dull or rusty, but will be easy to keep bright and clean as a piece of brass.

Since 1836 the BARSTOW STOVE CO. has been experimenting to perfect these proportions. Every practical improvement is embodied in BARSTOW RICHMOND RANGES. They have gas ovens for baking with or without a coal fire and gas shelves for quick cooking. The gas range attachment doubles the capacity of the range. Other conveniences are—Swing Fire Top, for easy feeding, broiling and toasting; Patent Sliding Tea Plates; Oven Food Rake; Simmering Cover; a Reliable Heat Indicator; and nicker parts which lift off for cleaning or when blackening the range.
