Department of Cemeteries— 3,300.00

Police Department— 32,000.00

Gas and Electrical Department— 150,000.00

Finance Department— 4,000.00

Ponemah Co.'s Big Weave Shed Practically Finished

One of the Largest in New England, Being 700 Feet Long and 200 Feet Wide—Third to be Constructed with Reinforced Concrete Roof—Electric Power and Light, Hot Water and Sprinkler Systems and Sawtooth Roof—Cost Will Be About \$250,000.

The main contractors, the J. W. Bishop company, of Providence, have practically finished their work at the Ponemah company's big weaved shed at Taftville, upon which they started ten months ago, the date on which ground was first broken being July 24, 1909.

The shed, which is 700 feet long and 200 feet wide, with a roof built according to the standard design generally followed in weaved sheds to allow the light from the north only to enter.

There are 22 sections, or teeth, in the roof, the principal length being 473 feet. Resting on concrete piers, 24 inches square at the top, which have been sunk a distance of from three to five feet to the bottom, 380 columns uphold the structure.

Each column has an individual pier. Of the 930 there are 154 six-inch cast iron main bearing columns, seven to each section, upholding the roof. The main floor is carried on 836 intermediate columns, 388 of cast iron and 528 of hard pine.

Also located in the basement are four concrete piers, each about six by eight at the top, and sunk down five feet, to carry the four motors that will furnish power for the looms.

All the shafting is to be located in the basement, which is 11 feet in height and amply lighted. The floor is at present earth.

140,000 Square Feet of Flooring. The weaved floor is of three thicknesses of planking laid diagonally. Resting on the supporting columns is the main floor of five-inch Florida yellow pine.

Above this is the intermediate floor of seven-eighths inch North Carolina pine, and the top floor is seven-eighths inch hard maple. The planks are laid diagonally to withstand vibration. There remains only about 30,000 square feet of maple flooring to be laid out of a total of over 140,000 square feet.

The roof of the building is made of concrete, reinforced with expanded metal. It is stated that it is the third and the biggest weaved shed to be built with a concrete roof in the country, the other two being in New Bedford, and were built by the Bishop company.

Concrete has not been used in the past for one reason because of the problems of condensation to be met within, as the high temperature required in the weaveshop and the low temperature outside in winter result

A ventilating space of about 15 feet in width and seven feet in height. Further ventilation can be obtained by transom windows at both ends of each tooth.

Heated by Hot Water. The whole mill is heated by hot water, the boiler house, 85x120 feet high, with two Dillon boilers installed and room for two more, is located at the northwestern corner of the building.

A gas engine located in a fire-proof engine room in the corner of the weaved shed will run a hot water circulating pump. A main seven-inch pipe feeds into heating coils which run around the walls and are also on the ceiling. The pipes of the automatic sprinkler system cover the building thoroughly.

Nine Miles of Pipe. The total length of all the pipes in the weaved shed is estimated at nine miles. The hot water system is complete and the heat was on Tuesday.

The sprinkler system is complete and the piping is covered with aluminum bronze. The main mill painting has been completed, the entire interior having been painted white except a light green shade five feet high on the walls and columns.

In the two towers, 15x30, which are located on each side of the mill, will be eight toilet rooms, the brickwork finished in white enamel, and the floors will be of concrete, pitched to the center. There are two 10-inch sewer lines to the river.

Bridges from the Street. Two bridges will lead with a slight pitch from the street to the entrance. The south bridge will be 134 feet long and the north one 180 feet, concrete steps leading down to the latter and a concrete ramp to the boiler room.

The bridges will be ten feet wide, with iron entrance gates and a five-foot iron fence on each side. They will be illuminated by electric lights hung from archways over the bridge. The interior will be suitably lighted with electricity.

Although a number of the smaller contractors are still working, some of the main work has been completed. The finishing up of the Bishop company marks the real completion of the big job. Supt. W. A. Chaffee has had charge of the construction since Aug. 1, 1909, and the work has gone steadily and satisfactorily onward under his direction.

The weaved shed is a most important addition to the manufacturing assets of Norwich and shows in a strong and favorable light the enterprise of the Ponemah company.

SIXTEEN FRIENDS AT BIRTHDAY PARTY. Given Mrs. Charles H. Brown at Home in Church Street.

At 7:30 Monday evening sixteen friends gathered at the home of Mr. and Mrs. Charles H. Brown at 38 Church street in honor of Mrs. Brown's 21st birthday.

During the evening games were played, as were piano solos by Miss Gladys Hall, Misses Jennie E. Dearing, Mildred Gibson and Niola Smith rendered vocal solos. Miss Gladys Hall playing the accompaniments, being necessary to respond to encores.

After the prizes were awarded to the winners, the party was held in the dining room, the table and room being handsomely decorated with flowers and streamers. Sandwiches, salad, cake, fruit, tea and chocolate were served. Assisting in service were Mrs. Eva Worth and Mrs. C. A. Brown.

At a late hour the guests departed for their homes after spending a pleasant evening, wishing the hostess many happy returns. Many beautiful presents were received, including cut glass, china, linen and a set of dining room chairs.

Those present included Misses Jennie E. Dearing, Gladys Hall, Mildred Gibson, Niola Smith, Bessie Brown, Amy White, Edna Stinson, Violet Pelletier, Mrs. C. A. Brown, Mrs. Eva Worth, Mrs. Millie Bennett, Messrs Robert Fletcher, Raymond Worth, Winston A. Robinson, U. Greiner and Vivian R. Allen.

Lebanon Good Citizenship Meeting. The second in the series of meetings of public interest under the auspices of the Lebanon prohibition town committee, was held in Grange hall, Lebanon, May 20. Otto L. Poulitz presided.

Rev. E. B. Smith read the Scripture and offered prayer. Behind the scenes was the Lebanon prohibition town committee, was held in Grange hall, Lebanon, May 20. Otto L. Poulitz presided.

Complaining Too Quick. Lieutenant Shackleton says steam heat is the curse of American hotels. Wait until he gets on the one-night stand circuit in the northwest next winter. —St. Paul Pioneer-Press.

In Nuremberg there are 1,700 houses built before 1400 A. D. and 3,577 built in the seventeenth and eighteenth centuries.
