

Norwich Bulletin and Courier

114 YEARS OLD. Subscription price, 12c a week; 50c a month; \$5.00 a year.

The Circulation of The Bulletin.

The Bulletin has the largest circulation of any paper in Eastern Connecticut, and from three to four times larger than that of any in the state.

CIRCULATION table with columns for year and circulation figures: 1901 average 4,412; 1905 average 5,920; June 4, 7,700.

A DEMOCRATIC VICTORY.

The democrats have reason to feel well over the results of Monday's election, when they swept the field clean with an average majority of 141.

The republicans were surprised, but they have cause for pride in being able to pass a balance to the enemy equivalent to a one mill tax on the grand list instead of a deficit.

The defeated party also has the consolation of knowing that it has a clean record and its rejection was not because of its sins. The Bulletin does not remember a party defeat under just such conditions, but it is apparent enough that the people wanted a change, end made it.

There is often cause for joy in defeat, and it is not lacking now. It was good judgment on the part of the voters when they determined to reject Charles F. Thayer to the majority to give him a complete democratic council which turns over to him the entire government and puts upon him and his party the full responsibility for the city administration.

Albert S. Comstock headed one of the cleanest and ablest tickets put in nomination by the republicans for many years, and the rejection of the ticket does not affect the cleanliness or character of the men who were willing to serve the citizens if they were favored with the major vote.

There is no cause for demurring. The issues are all fairly closed, and as good citizens we are all bound to do our best in promoting the welfare of Norwich.

THE DIRECT PRIMARY SYSTEM. While the political tendency in New England is back to the direct primary system as a better method of procedure, the trial of it at the west shows that it does not cut indifference to public affairs, or improve the situation to any extent. A change in the method and temper of the voter is the thing that is needed and it is not so readily brought about.

A despatch from Indianapolis concerning the result of the primaries at the recent election states that the count of the votes in that city shows that neither party cast over 33 per cent of its total vote. While the republican vote is more than 30,000, some of the candidates were nominated on a vote of little more than 4,000 and some of the democratic candidates with a total vote of the party larger than the republican vote at the last election, were nominated by even less than 4,000 votes.

"The people won't come out to primaries," says a leading Indiana politician, "and it isn't worth while to try to get them out. Here were more than a hundred candidates for office, yet less than one-third of the voters came to the polls. And now we have men on the ticket and national matters are one-eighth of the voting strength of the party, and the other seven-eighths under no obligations whatever to support them."

How to interest citizens in politics and then to keep them interested is a problem which is not likely to be easily solved. It is apparent enough that the direct primaries will not do it.

BEHIND THE AGE. It would not do for any man except those high in the legal profession to tell the people that American jurisprudence is one hundred years behind the times; but since the criticism has authoritatively behind it, its interest to the readers of The Bulletin will be thereby enhanced.

A joint committee of the National Bar association and the National Civic federation recently made a report, in the course of which was remarked: "The system under which the law is administered in this country is 100 years behind the age. The procedure in equity cases is a scandal to our jurisprudence. Many cases are decided not on their merits but purely on technical questions. Not only has something got to be done about it, but something will be done about it. We all hope that something will be done about it. The law's delay and the weakness of the courts upon important state and national matters have cost them the respect of the people. If the law met important issues as it should, there would be an end of mob law in this country. The laxity of the courts is chargeable with an increase of disorder and crime. President Taft is not the only statesman who thinks that something will be done about it by the next generation. A Jersey couple walked forty miles to be married. There is no question as to their earnestness and sincerity.

AGAINST BENZOATE OF SODA.

The benzoate of soda war which divided the administration forces is not over. The canners are opposed to it and the Indiana Canners association recently passed a strong resolution against the use of any condimental preservatives except sugar, salt, spices and vinegar, and pledging the association to the enforcement of all laws which make for food purity and sanitation.

The Indiana canners were doubtless stirred to this action first, because of Secretary Wilson's interference with the proceedings of the national convention of canners; and, second, because of the testimony regarding unsanitary packing house conditions that necessitate the use of benzoate of soda, which is being produced in the Indiana courts at this time, where the friends of the preservative are seeking to force their goods upon the people of Indiana against the prohibition of the state board of health.

The two concerns which were most insistent in securing the appointment of the Remsen board, which resulted in the overturning of Dr. Wiley's inhibition of benzoate of soda, are the Wilsons' subsidiary with championship of the drug, are the prime movers in the suit against the Indiana state board of health. One of these firms labels its product as preserved with 1-10th of one per cent, and the other with 1-12th of one per cent benzoate of soda. Dr. W. D. McAbee, assistant chemist of the state board, in securing the appointment of the Remsen board, which resulted in the overturning of Dr. Wiley's inhibition of benzoate of soda, are the prime movers in the suit against the Indiana state board of health.

By so doing we'd set an excellent example for the rest of the world. The United States the leading citizens are doing the same thing that we do. They are talking politics again, but they are not talking about the blacksmith shop, and talk about the insurgent movement, being used in the analysis of a democratic congress. This thing of talking politics is the besetting sin of the American people. In units we are a nation, but in individuals we are a collection of islands.

"Now, our friend the horse doctor has been in the business for a quarter of a century, and he has seen all kinds of roads, in all kinds of weather. His life has been eventful. He should be able to tell doctors of the future, which would be instructive as well as entertaining. Set a good example, doc, and drop the insurgent movement, and the tariff on brass knives, and give us a year about some experience of your own."

"I'll go you one for luck," said the horse doctor. "One night last winter I had just returned home from a long and heart-breaking drive in the country. It was a beautiful night. The wind was blowing from seventeen directions at once, and the roads were a fright. I was just going to bed when the telephone bell rang and I received the information that Col. Quilter's fast trotting mare was doubled up with the colic as his farm seven miles in the country. I couldn't afford to elight the colic, as he was the superintendent of the county. He is the richest man in this part of the country. He has a big stock farm and I can't imagine why he wants to go to congress."

"It will cost him a lot of money to be elected, if he ever is elected, and I think his chances are slim. He is the old original stand-patter and has no use whatever for this insurgent movement. The last time I was talking with him he said that he had no particular admiration for Cannon, Payne and Aldrich as individuals, but they stood for policies which have made this country rich, and it would be dangerous to overturn these policies. I told him—"

"Whether are we drifting?" asked the school superintendent. "You become so batty on policies that you simply can't leave the subject alone?" "I'll be ding-twisted if I realized that I was talking politics again, but the horse doctor, with embarrassment, said: 'Let me try it again. My own team was too tired to take out again, so I hired old Sandy Patterson to haul me in his rig. Sandy has been trying to get a pension for thirty years and is always turned down, for the trilling reason that he never was in the war. He is naturally bitter against the government, and all the way out to the colic he was insisting that the administration is playing into the hands of the Guggenheims. I tried to explain to him—"

"I see, it's a hopeless case," cried the school superintendent.—Chicago News.

THE BULLETIN'S DAILY STORY

THEIR TALK

"Speaking of the insurgent movement," began the horse doctor, "it appears to me—"

"Speaking of the insurgent movement," interrupted the superintendent of the village school, "reminds me of the Dutch have taken Holland. Secretary Wilson's Conqueror has been dead for several years. Then why, I ask, should the spirit of mortal be proud?"

"You may know what you're talking about but I'll be hanged if I do," said the horse doctor. "I was saying that the insurgent movement—"

"I know just what you intended to say. I know just what you say it seven times a day for six months. We, the people of this brainy suburb assemble here in the post office for social purposes and the conversation always goes the same old round. Nobody ever thinks of talking about anything interesting—"

"There isn't a man in the bunch who can shed any light on the subject," said the superintendent of the village school, "but I have an opinion that hasn't been sprung a million times before, and nobody cares a cent what our individual or collective opinions are. We've talked for forty-seven years and six months we'd never get any further than we are now. So why not break loose and talk about things we understand?"

"By so doing we'd set an excellent example for the rest of the world. The United States the leading citizens are doing the same thing that we do. They are talking politics again, but they are not talking about the blacksmith shop, and talk about the insurgent movement, being used in the analysis of a democratic congress. This thing of talking politics is the besetting sin of the American people. In units we are a nation, but in individuals we are a collection of islands."

"Now, our friend the horse doctor has been in the business for a quarter of a century, and he has seen all kinds of roads, in all kinds of weather. His life has been eventful. He should be able to tell doctors of the future, which would be instructive as well as entertaining. Set a good example, doc, and drop the insurgent movement, and the tariff on brass knives, and give us a year about some experience of your own."

"I'll go you one for luck," said the horse doctor. "One night last winter I had just returned home from a long and heart-breaking drive in the country. It was a beautiful night. The wind was blowing from seventeen directions at once, and the roads were a fright. I was just going to bed when the telephone bell rang and I received the information that Col. Quilter's fast trotting mare was doubled up with the colic as his farm seven miles in the country. I couldn't afford to elight the colic, as he was the superintendent of the county. He is the richest man in this part of the country. He has a big stock farm and I can't imagine why he wants to go to congress."

"It will cost him a lot of money to be elected, if he ever is elected, and I think his chances are slim. He is the old original stand-patter and has no use whatever for this insurgent movement. The last time I was talking with him he said that he had no particular admiration for Cannon, Payne and Aldrich as individuals, but they stood for policies which have made this country rich, and it would be dangerous to overturn these policies. I told him—"

"Whether are we drifting?" asked the school superintendent. "You become so batty on policies that you simply can't leave the subject alone?" "I'll be ding-twisted if I realized that I was talking politics again, but the horse doctor, with embarrassment, said: 'Let me try it again. My own team was too tired to take out again, so I hired old Sandy Patterson to haul me in his rig. Sandy has been trying to get a pension for thirty years and is always turned down, for the trilling reason that he never was in the war. He is naturally bitter against the government, and all the way out to the colic he was insisting that the administration is playing into the hands of the Guggenheims. I tried to explain to him—"

dweller, and will do well to chart his route with special selection of open fields and forests, whereof the foliage in case of misadventure may perchance somewhat brook his fall.

The reasoning of the Berlin doctrine may be good, but it seems to somewhat lack in sense of proportion. We do not know what they do to scorching automobiles in the German capital, but in harmony with the aviation precedent the automobile interest would be likely to spend most of their time in prison. Before our police apply the Berlin rule to aviators they should first quell the reckless auto drivers.—Pittsburg Dispatch.

Belongs to the Smithsonian. Chamcey Dewey still hangs to the ragged edge of illusion. He is not a live bird, but a specimen of taxidermy.—Pittsburg Post.
