

Norwich Bulletin and Courier.

114 YEARS OLD. Subscription price, 12c a week; 50c a month; \$6.00 a year.

The Circulation of The Bulletin.

The Bulletin has the largest circulation of any paper in Eastern Connecticut, and from three to four times larger than that of any in Western.

CIRCULATION table with columns for Year, Average, and Circulation figures.

THE GOAL SUPPLY.

An engineer of the United States Geological Survey made the prediction last week in the west that the present coal supply of the country would be exhausted in 140 years from this date.

ANOTHER OPEN DOOR.

Massachusetts and Rhode Island are pleased with the prospect of the Grand Trunk extending its lines through their territory to the eastward.

THE SECTARIAN CHARTER STANDS.

The recent endeavor to eliminate from the charter of Brown university the sectarian clause did not succeed.

An exchange says: "Girl grade are never advised, at commencement time, to marry and settle down. No one seems to think such advice necessary."

SWAT THE FLY.

This is what an authority says about the common housefly. "Many diseases which are attributed to milk and water originate through flies."

There are so many different kinds of flies that in this swarming one should be prompted to swat the fly intelligently. It would be murder to kill an insect which is a thorough insurance.

THE POSSIBILITIES OF HOME-BUILDING.

The possibilities of home building is a subject which is of as much interest in the little cities as in the larger.

EDITORIAL NOTES.

The train that took Taft from Toledo to Detroit made one mile a minute.

If advice could keep men from falling, there would be no work for Dun & Co.

June rolls on and the concrete walks hold hard and winter clothing is not uncomfortable.

The louder heart condemns Colonel Roosevelt the higher he will stand with the people.

A popular June command: "John, build a fire under the steam boiler, for the house is cold."

A great many near-actors get into vaudeville and the circuit managers cannot seem to help it.

A western man's fourth wife has left him; but he says: "If at first you don't succeed, try, try again," suits him.

Since an astrologer has figured out a five years' reign for George V., he may live to reign as long as did Victoria.

Happy thought for today: If the people knew as much about us as we know about ourselves, we shouldn't be so chasty.

How will the French custom house officers catch a smuggler who like the rolls can go and come on the winds or against them?

The mayor of Marion, Ohio, is charged with being against the Golden Rule because he punishes every man who gets drunk put in jail.

It is now said that John D. Rockefeller has given away his 400 dogs. Why should he need more dogs than an Arctic explorer?

A new geysir has begun to throw ice-cold water in Yellowstone park. We should be pleased to see such a break nearer home.

How surprised Senator Lorimer has appeared to be over the statement votes were bought for him. He doesn't know that it is so now that the guilty have told the world of it.

The Springfield Republican has just moved into its new five-story building which is illuminated by electricity and electric power is used for motive power for its printing machinery.

Made by a Connecticut Sculptor. The Custer statue, which was unveiled by President Taft in front of the Monroe county (Mich.) court house, is the work of E. C. Potter of Greenwich, Conn.

Woman in Life and in the Kitchen

CONCERNING WOMEN.

There are twenty-seven American women registered as medical students in the University of Berlin.

Sixty-two per cent of adult Danish women voted at the first election which afforded them the privilege.

G. Frederick Turner, author of the recent novel, "Gloria," has married the youngest daughter of George Grosmith, the English actor.

Mrs. Adelaide Johnson, the American sculptor, who opened a studio in London last season, is reported not only to have all the orders for work that she can execute, but to be winning a name for herself as an wintering speaker.

Queen Maud of Norway has innumerable hobbies and recreations, many of them being of a very useful and practical nature. She devotes many hours to sewing, wood carving and bookbinding, and in regard to the latter work she has turned out some really beautiful specimens of the craft.

Miss Bertha Robinson of Wellesley college, a member of the junior class, decided to get married before graduation, but not until she had secured the permission of the faculty to return next fall and take up her studies with the senior class.

Miss Bertha Robinson of Wellesley college, a member of the junior class, decided to get married before graduation, but not until she had secured the permission of the faculty to return next fall and take up her studies with the senior class.

NEEDLEWORK NOTES. The gumpie of plain sheer tulle or net is more frequently used than any other of tucks. The yoke is extremely shallow, and the clear flesh tint is the usual color.

A dainty little workbag, just fitted to hold the embroidered collars and belts and other paraphernalia, is made of light blue china silk. China silk makes a good lining, by the way, for bags, which are to hold embroidered silks and other things which might be likely to catch upon rougher fabrics.

The use of a knot is to be avoided in sewing and not to be tolerated in embroidery. Sometimes a tiny one is slipped under a hem, but it will show on right side if material is sheer and makes an ugly lump in ironing.

Double faced shades are a boon to persons who desire dark shades to deaden the glare of the light in summer and yet do not want two sets of shades in the window.

Cream Cheese Salad. Mould one cream cheese into egg-shaped balls and place in a flat salad bowl. Do not use light colored lettuce. Serve with French Dressing.

Consider Woodwork when Re-papering. Take a piece of the carpet with you when you go to paper hunting, but do not try to match it. Be satisfied to get the color to harmonize.

Marshmallow Pudding. Soak one tablespoonful of gelatine in one-half cup of cold water for half hour. Beat the whites of two eggs thoroughly, add to them a cupful of powdered sugar.

HEALTH AND BEAUTY. Physicians claim that sleep is more refreshing in a dark room than in a light one. The best time to go to bed is when it is dark.

After living for several months on simple foods, in addition to increased good health, it would be found that an increased capacity of taste and a keener relish have been acquired.

Massage is not only a beautifying agent, but it is a wonderful cure for neuritis. If attention is paid especially to the muscles of the eyes and brow, it is excellent for rheumatism and all nervous conditions.

For ingrowing nails wear wider boots and clip the nails so they curve down in the center of the top. Nails as a rule are a little rounded or pointed.

When one has pounded a finger or otherwise bruised one's foot, try the effect of cold water. Soak the foot in a bowl of cold water for a few minutes.

The Bathing Cap. The popular bathing cap of today can be easily made by any woman. One style of cap consists of an oval shaped piece of material, with a band of material by means of a drawstring run through a pocket on the wrong side of the fabric.

Dainty Wedding Gift. In these modern days, when luncheon, tea and sometimes coffee are served on the bare table, whose shining surface is protected from the possible scratching of the plates and other dishes by mats or dollies, nothing could be more acceptable to a bride-to-be than a set of crocheted mats.

German Pancakes. Take any stale slices of bread, soak them in cold milk, put into frying pan one ounce dripping, let it boil; beat an egg, dip each piece of bread in egg (or brush it over), cover thoroughly with a golden brown. In the fat; place it on dish, spread some home-made preserve over it and it will be found to be a most delicious treat.

Milk Punch. Take the rinds of thirty lemons and let stand in three pints of rum for forty-eight hours. Grate the juice of the lemons and add to three quarts of rum and three quarts of water. Add the three pints of rum that the lemon rinds stood in. Next take three quarts of sweet milk and set on the fire and make scalding hot, and add it to the lemon juice, rum and water. Let this stand for twenty-four hours in a
