

Norwich Bulletin and Gazette

114 YEARS OLD

Subscription price, 12c a week; 50c a month; \$6.00 a year.

Entered at the Postoffice at Norwich, Conn., as second-class matter.

Telephone Office: Bulletin Rooms, 25-1, Bulletin Job Office, 25-2, Williams Office, Room 3 Murray Building, Telephone 210.

Norwich, Monday, Sept. 5, 1910.

The Circulation of The Bulletin.

The Bulletin has the largest circulation of any paper in Eastern Connecticut, and from three to four times larger than that of any in Norwich. It is delivered to over 2,000 of the 4,000 houses in Norwich, and read by ninety-three per cent. of the people. In Wadsworth, in Putnam and Danbury to over 1,100, and in all of these places it is considered the local daily.

Eastern Connecticut has forty-nine towns, one hundred and forty-five postoffice districts, and forty-one rural free delivery routes.

The Bulletin is sold in every town and on all of the R. F. D. routes in Eastern Connecticut.

CIRCULATION

Table with 2 columns: Year, Circulation. 1901, average 4,412; 1905, average 5,920; Week ending September 3, 8,033.

OUR ADDED MILLIONS.

It is confidently expected that this census will show that the American flag waves over from 90,000,000 to 100,000,000 people, and in view of this opinion and the fact that we have since 1900 welcomed 9,600,000 aliens, the question is asked if we have any more Americans now than then. Let us hope that they are all good adopted American citizens by this time; and we know that their natural addition of more than half as many millions more will be genuine citizens.

These aliens begin at the bottom and climb up. By industry and thrift they found homes and enter business and make fortunes.

If Americans expect to be the dominant race in their own country they have got to do the hard work along with the other kind; they have got to learn the trades, and do a larger part of the mental work.

The inferior to the rear, the superior to the front, is the natural order; and in this shifting of circumstances we find the children of those who were served by foreigners in turn serving the children of those who formerly served their parents. The way down is through ease—the way up by work.

"America for Americans!" is only a loud noise. America is for those who support her institutions and her standards—those who make the most of themselves and the country.

There are more Americans in these states than ever before; and from alien stock have always risen our best citizens.

THE TWENTY-CENT COTTON BUBBLE.

Wall street's cotton crop is largely imaginary—the hysteria goes into history as real fits. Fity it is that Wall street cannot stir itself up without striking up the country. The Toledo Blade recalls a little history to show what a Wall street cotton excitement means. It says:

Cotton, on the New York cotton exchange, went to 20 cents on Monday, the highest price it has touched since 1873, when it sold at a little over 21 cents a pound, following the price of 27 1/4 of the year before. In 1904, Sully, of New York, and Brown, of New Orleans, organized a bull campaign and drove the price up to 17 1/4.

At that time the floor of the New York exchange was a bedlam. The shouting, the crying, the gesticulations, the wild disorder of dress, were such realities as no Georgia negro camp meeting evangelist ever invented as descriptions of chaos. Men tore at one another and men screamed into one another's ears and when the closing bell had brought quiet there flared forth brokers and traders disheveled and hysterical, many of whom could give no exact accounting of the transactions they had made.

"When time had brought out the real facts of the situation of the cotton crop of 1904 and the state of the market it was learned that there was no just reason for the excitement. The boom was of traders' manufacture. It brought benefit, if any at all, only indirectly to the cotton grower and led to discussion of suppressing the exchanges as gambling houses. The 20-cent price was caused by the large number of dealers who found themselves in a position of having only three days in which to cover their shorts for August, and lacking the necessary resources for delivery. It had, therefore, nothing to do with the law of supply and demand, only so far as the speculators were short on supply and were bound to demand by contract."

The New York thief who took a baby out of its carriage and stole the carriage and baby's coat must have been competitor of the charity box thieves.

If Kansas sends John Brown's statue to the Hall of Fame at Washington, it will be time to call off all opposition to General Lee's statue.

The couple who closed a 60 years' courtship by marriage are just as likely to discover their mistake as if they had married 59 years ago.

Where the picnic has failed to break the drought, considerably expected that the county fairs will succeed.

When Boston's new flying competition is labeled No. 1 and laid away, Boston will feel as if a new era had dawned.

The statistics show that the third does not grow less if the saloons do, do.

A WEEK'S VACATION.

There are a half-hundred cotton mills booked to shut down for the present week in Massachusetts as a means of curtailing the output of cotton print goods, and in consequence over 20,000 operatives will be in enforced idleness during the interval. These, 46 mills are located in Fall River alone.

The Lancaster gingham mills of Clinton closed Saturday until September 12. Two thousand employees are affected, and until the same date the 1,400 employees of the Lyman cotton mills of Holyoke will be idle, the entire plant having closed Saturday night.

This will bring about three million spindles to a standstill, and reduce the output of print cloth to 175,000 pieces. In addition to the reduction caused by the short year period which was inaugurated several weeks ago.

If there must be a season of enforced idleness it is much better that it should be in September than in January.

CERTIFICATES OF DEPOSIT.

The evidences of the new postal savings bank will be on hand in a week or two, when the administration will have submitted to it specimens of the new postal savings cards designed for depositors by the postmaster-general's board of experts. There are to be no bank books. It is explained that each card will be issued upon a deposit of 10 cents, and upon it, when nine ten-cent savings stamps shall have been affixed, a duplicate punch will convert it into a certificate for \$1. When ten dollars have been so punched a final certificate of \$10 may be issued in its stead; such certificates will be in denominations of \$10, \$20 and \$50. They are not transferable, they can be redeemed only at the postoffice of deposit by the original depositor, where he must be properly identified.

The New York Times of Sunday, commenting upon the plan, said: "In Great Britain depositors may withdraw their funds from any postoffice upon satisfactory identification. But the board of experts has decided that, inasmuch as only \$100,000 was appropriated for the installation of these banks, this added convenience would involve too large an initial expenditure. It is estimated, according to the report of the National City bank, that the appropriation will permit the establishment of not more than one postal savings bank in each state. But this will be enough to give the plan a demonstration, and to reveal defects before the system is extended to include all the second-class postoffices."

EDITORIAL NOTES.

Philadelphia has 4,500 children it must put on half-time in the schools.

Mars may be showing more vapors, but it cannot beat September at that trick.

The republican congressional campaign textbook contains 282 pages of facts.

Colonel Roosevelt is all ready to plank a platform for any republican state.

Duck shooting is legal in Vermont from now until January. Brush up the decoys.

China prefers American built Dreadnaughts and it is business to supply them.

Berlin is not complaining because the cholera there doesn't prove to be the real thing.

If the human race cannot be saved without abolishing kissing it doesn't care to be rescued.

The dogs of Medford, Mass., must be fond of chickens—they cleaned 80 out of four flocks.

New York has a glimmer of the fact that it is destined to be the biggest city on earth.

St. Louis should know better than to ask what is in a sausage. That depends upon the price!

Happy thought for today: Labor day is sane and safe. Why should independence day be less?

The Cleveland street railroad company has discharged 200 men and given notice of a four-cent fare.

When Colonel Roosevelt reached Missouri he was too tired to talk. But Missouri still has to be shown.

Collector Loeb took in twice as much revenue from travelers in August, 1910, as he did in the August of 1909.

The New Thoughters may build an exclusively New Thought town, but how can it keep the old grafter out?

The small boy thinks his lot in having to go to school is a hard one, but what is it compared to the fate of the oyster?

Our Peck of Dirt. What is the world coming to, anyhow, when farmers discuss protein and percentages of carbohydrates, and milkmen dress themselves up in white linen like hospital doctors, wash their hands with antiseptics and dispense milk in sealed bottles with the precision of an apothecary? And not content with putting on all these airs, they expect to be paid for it.

We must return to the simplicity of a purer age, when every man expected patriotically to take his peck of dirt and was not particular where it came from. There is a loud demand for the old-fashioned milkman to assert himself and start out upon his rounds as of old, with cheap milk for the masses. Doctor Ligon and Doctor Neff are allowed to have their way much longer, with all these modern trills, something will have to be done about it.—Philadelphia Ledger.

Ubiquitous Golf. George Sargent, the golf champion, said one afternoon at Hyde Manor, Vt.: "Golf has become so popular that it is mixed up with everything. You wouldn't think that golf could have any relation to taxicabs and music, would you? But the other day, apropos of taxicabs a New York man told me that all the golf sticks of New York were becoming wry-necked. New York golfers, he explained, ride to the ferries in taxicabs, and their sticks get wry-necked from twisting round to watch the dime mount up on the taximeter.

Then, on the way to the next hole, our talk turned to grand opera, and the New York man declared that the other day his baby daughter, taking up the score of Electra, pointed to a group of quarter notes, and said: "Paris, how does one play those little golf sticks?"—Washington Star.

The bank return, with its evidence of a big overflow of cash for holiday purposes, is satisfactory evidence of the spending power of the masses.—Economic.

Woman in Life and in the Kitchen.

HOUSEWIFE SUGGESTIONS.

When a fruit jar cover sticks stand it on its head for a few minutes in a pan half full of hot water. It will come off easily.

When there is no strainer in the kitchen sink mix the shells in a tin bucket and set it over the drain.

To revive a black straw hat and make it equal to new, rub it all over with a thin coat of linseed oil, and then polish with a fresh piece of velvet.

Either cold or lukewarm water should be used for cleaning bread or pastry boards. Hot water softens the wood and causes grease to spread.

When cleaning the bathtub use a flannel rag dipped in kerosene and taking off the first grease and dirt and then give it a good wash with hot water and laundry soap.

A mayonnaise jelly may be served with any frozen salad. Mixed with cubes of celery, cucumbers or any cold cooked vegetable it may be molded in forms or cups and served on lettuce, or it may be used to garnish any ordinary soft salad.

Yarns of flowers are often knocked over because they are topheavy. These accidents can easily be prevented by putting a few pebbles and some sand in the vase and if of resin, they will help also to hold the stems of the flowers in the desired position.

HEALTH AND BEAUTY.

Don't wash the face when traveling unless it is with a little alcohol and water or a little.

Frequent shampooing with tar soap will prevent dandruff and an application of coal oil once a month to the scalp will not only prevent the hair from falling, but will cause a new growth.

Women with narrow hips can do much to improve them. Stand on one foot and let the feet and back wards and forwards like a pendulum; do this slowly and let the leg go as far as possible each way. After doing this three times with each foot, do the same with the other.

Hiccoughs are distinctly mortifying to the victim. As they are signs of poor digestion and may mean bad stomach trouble, if of frequent occurrence they should be treated medicinally. For temporary cures try gradually dissolving a small lump of sugar on the tongue. Slow sipping of hot water is also good or gargling the throat with water.

Tartar being an enemy to sound teeth and healthy gums, care should be taken to prevent tartar from forming. Use frequently a solution of tincture of myrril, enough in a glassful of water to make it milky in color. A heavy deposit of tartar causes the gums to shrivel and recede from the teeth. Beware of tartar.

To Hang Curtains. If you want to hang a sash curtain and have no rods for the purpose, put brass tacks where you would have screwed the hooks into the rod. Fasten a stout cord to a heavy rubber band and have the combined length of the cord and rubber two inches less than the distance between the tacks; run the cord and rubber through the casing of curtain and after hanging the cord over one tack stretch the rubber to reach the second tack. This holds the curtain firm and tight.

NEEDLEWORK NOTES.

An applique of small velvet flowers on a net scarf is pretty. A scarf and flowers, the latter in a border, narrow at the sides, with the ends—were both of deep terra cotta.

Dotted net yokes and cuffs with alternate pink and cream embroidery in small squares between the dots, giving a pink, cream and white checkerboard effect, give a dressy touch to a gown.

Strips of heavy wallachian embroidery in bright natural colors (a wild rose design) used as waist trimming and covered with a heavy, soft, fur, sheepskin chiton to soften the color effect are good.

Often in padding a buttonhole edge or a design for solid embroidery the white padding shows through the color. This is especially noticeable and disagreeable in a dark shade. One woman solved the problem by doing her padding in cotton as near the shade of the silk as she could get. The result was eminently satisfactory. It may seem extravagant, but it costs only three cents a spool, and the extra expense was worth while.

FADS AND FASHIONS.

The waist line is rising again. All the old laces are in great vogue. A great many separate coats are seen.

Jumper blouse styles are increasing in favor. There are manifold indications of the return of the Empire.

Dark blue and black are favorite costume colors for coat suits. Waists of black chiffon, marquisettes and voiles are prominent.

New toques and turbans generally have sharp upturned brims. Among the new shades for this fall is "pole nord," a grayish blue.

In the new coat suits the coats range in length from 38 to 40 inches. Full tailor makes very strongly reflect the "bobble" skirt idea of Paris.

Plain colored chiffon and voile are very fashionable, over changeable waterproofs.

VOGUE OF AMETHYSTS.

The most popular stone this season among the less costly jewels is the amethyst. This gemstone and most beautiful stone is also the most popular for its lovely color, which is particularly effective upon black and white, gray, mole and beige.

The favorite jewel in which the amethyst appears is the loig drop earring, which is so much worn just now. This earring is at its best with a fair sized stone, from which falls a delicate silver chain, with a smaller amethyst as a drop at the end.

Silver, by the way, is a better metal to use with amethyst than gold. Its cool grayish tone gives value to the lovely purple of the stone and has a much less garish effect than gold.

Boy's Russian Blouses. In place of the customary three small box plaits to give fullness to the small boy's Russian blouse, one finds these simple, feminine made-up, to a single wide box plait down the center of the back. This plait is stitched in position along each edge from the neck to the waist line.

Stuffed Peppers. It is a decided economy to stuff sweet green peppers with a forcemeat made of left-over meat or fish. The

To Preserve Eggs.

Take a few quail, cover the bottom with half an inch of salt, set your eggs close together on the small end. Sprinkle them over with salt so as to cover them entirely. Then put down another layer of eggs and cover with salt; continue till the keg is full. Cover tightly, put the eggs where they will not freeze and they will be fresh a year hence. The eggs must be new and fresh when laid down. If you take absolutely fresh laid eggs and smear the shells with lard or butter they will be as good as new laid eggs for some time.

Painting Floors.

If one is planning to paint a floor it is wise first to scrub it well with soap, water and ammonia. Of course, the wood should be perfectly dry before the paint is put on and the first coat should be given plenty of time to harden before adding a second. Sometimes a third coat is necessary—and there are those who claim that this is an economy in the long run. To make the paint work especially well, give it a coat of varnish.

Flouring Fruit for Cake.

Many people flour their fruit, whether currants, raisins or citron, before adding it to the batter. A cook who says that she never experiences any trouble from having the fruit sink to the bottom of her cake attributes her success to putting a little of the batter in the pan and then spreading the fruit in the remainder of the batter before turning it into the cake pan.

Baked Soda Hints.

Add a pinch of soda to the beans before baking and the flavor will be improved. Another thing to remember in baking beans is this: Save about half a cupful of the liquor in which the beans are boiled. When the beans are baked, immediately on taking them from the oven, spread the top with the bean liquor. This makes the beans much more moist.

Grated Parmesan Cheese.

If the Parmesan cheese is purchased by the pound and then grated or run through the grinder it will be less expensive than when bought already prepared for use with macaroni or soups.

Dessert of Bananas and Grape Jelly.

Cover thick slices of sponge cake with grape jelly and add strips of sliced banana, using the very ripe fruit. Cover with very thick cream.

Peach Baskets.

Take well shaped, small biscuits. Remove the centers, leaving a very thin shell. Do not save the top. Brush the outside with white of egg or a little milk and place in the oven to glaze and to heat. Remove and fill with cut peaches. To be served with plenty of cream.

When Making Mince Meat.

Use this recipe as autumn approach and the making of mince meat for pies is a necessity. Three and one-half cups of chopped beef, two and one-half pints of chopped suet, four pints of seeded raisins, two pints of currants, two pints of chopped citron, seven teaspoonfuls of salt, four teaspoonfuls of powdered cloves, six teaspoonfuls of cinnamon, five teaspoonfuls of mace, three tumblerfuls of brandy, three tumblerfuls of sherry wine, four pints of granulated sugar. Chop half of the quantity of raisins. Also use one-quarter of a pound of an orange chopped fine. Add apples and more wine when making the pies.

Cold Baked Beans.

Cold baked beans may be used as a sandwich filling or a salad. If for sandwiches, mash them and season lightly with tomato sauce, catsup or chili sauce. For a salad, a plain French dressing is best. Garnish with tomato and serve on lettuce.

Blood Oranges.

Blood oranges are delicious to use when making orange ice or ice cream. Not only do they give a satisfying flavor, but the color is pleasing.

Potatoes Neufchatel.

Select small potatoes. Peel and boil in slightly salted water. When done, pour off the water and set on the back of the stove to allow all the water to evaporate. If it is a gas range, hold the dish over a low flame and shake till dry and mealy. This will only take a minute or so. Remove to a chop plate, using care not to break the potatoes, pour melted butter which has been thickened just a little with flour

LUMBER AND COAL

COAL

The easy way to wash clothes.

Take a cake of Lenox Soap, cut it into small pieces and dissolve these in three quarts of boiling water. Keep at boiling point until a solution is formed.

This solution will do better work than soap—and without any waste.

Rub the soap solution on the soiled parts, fold and roll each piece separately, pack in a tub, cover with warm soapy water, let stand over night, and in the morning you will find that the really hard work of washing—the rubbing on the washboard—is not half as hard as usual.
