

GOLD DUST Makes Hard Water as Soft as Rain Water

Every good housewife knows the value of nice, soft rain water for washing clothes and for all cleansing purposes. It isn't always convenient to secure rain water, however. Neither is it necessary. GOLD DUST will soften the hardest water, take out the mineral substances and make it so near like the water that falls from the clouds that you couldn't tell the difference.

Think what this means to you on wash-day. There's a deal of difference between the action of hard and soft water for all cleansing. Just a little GOLD DUST added to the water renders it soft and brings out the greatest cleansing value.

Try it the next time you wash clothes or dishes.

GOLD DUST really cleanses so easily that it relieves housework of all its drudgery.

"Let the GOLD DUST TWINS do your work"

GOLD DUST is sold in 50 size and large packages. The large package offers greater economy.

Tested in Every Way

and in all lands under the sun—in all conditions of life—by generation after generation—the safest and most reliable family remedy the world has ever known is Beecham's Pills. The good these unequalled health regulators have done, in the quick relief of human suffering and the prevention of serious sicknesses, is beyond calculation.

BEECHAM'S PILLS

can do the same sort of good for you, and for your family. Beecham's Pills do their beneficent work in accordance with Nature's laws. Try a few doses just as soon as physical trouble shows itself and see how immediately effective they are—see how quickly the whole bodily system will be benefited. Then you will know for your own good, why Beecham's Pills are

The Greatest Family Remedy Known

In boxes, with helpful directions, 10c. and 25c., at all druggists.

The Famous Rayo

The Lamp with Diffused Light

should always be used where several people sit, because it does not strain the eyes of those sitting far from it.

The Rayo Lamp is constructed to give the maximum diffused white light. Every detail that increases its light-giving value has been included.

The Rayo is a low-priced lamp. You may pay \$5, \$10 or even \$20 for other lamps and get a more expensive container—but you cannot get a better light than the Rayo gives.

This season's Rayo has a new and strengthened burner. A strong, durable shade-holder keeps the shade on firm and true. Easy to keep polished, as it is made of solid brass, finished in nickel.

Once a Rayo User, Always One.

Brought Cargo Worth \$2,500,000

British Steamship Kasenga Arrives in Boston from Colombo After a Long Voyage Attended by Many Perils—Left Colombo June 13.

Boston, Oct. 25.—The two million and a half dollars' worth of products of the far east which the British steamer Kasenga brought to this port today were carried across the sea amid many perils. The Kasenga's troubles began June 17 last when she was four days out from Colombo for New York. The steamer ran into a monsoon on that day and since then she has had to fight a fire which had broken out in one of the bunkers. Before the blaze was subdued it had done damage estimated at \$15,000. The Kasenga rode out the storm safely. A coral reef next brought trouble, the steamer scraping over it on August 8 between Singapore and Kobe, but managing to work off without serious damage. Hardly had the Kasenga left Calcutta on September 7 for Boston and New York than she ran down and

sank a native fishing schooner. There were no casualties. Backing away from the schooner the steamer landed in a mudbank. The rising tide released her. While the steamer was loading tea and rubber at Colombo the British steamer Janus, in preparing to sail, parted her stern lines and ran against the Kasenga, nearly pushing her into the sea wall, but doing little damage. An Arab fireman, crazed by the heat of the forenoon, rushed on deck while the steamer was passing through the Red sea, and jumped overboard. He was not seen again. Half way across the Atlantic there was another suicide, a pet money belonging to one of the officers leaping into the sea. The remainder of the voyage was unexciting, but Captain Debbis appeared unusually glad to make port today.

POSTAL DEFICIT REDUCTION FOR FISCAL YEAR \$11,500,000.

Tremendous Saving Made Without Curtailment of Facilities in Any Direction.

Washington, Oct. 24.—Figures, the compilation of which was completed at the postoffice department today, show that the exact reduction of the postal deficit during the fiscal year ended June 30 last was \$11,500,000. The deficit of the previous fiscal year was \$17,000,000, so that in one year the deficit was brought down to \$5,500,000. In commenting tonight upon the saving of \$11,500,000 last year, Postmaster General Hitchcock said:

"This tremendous saving was made without the curtailment of the postal facilities in any direction. On the contrary, during the year there were many important extensions of such facilities. In eliminating wasteful expenditures the department has been exceedingly careful not to sacrifice in any way the constant development of the postal service required to meet the increasing business needs of the country."

"In a word, the department's policy is to extend the service as rapidly as warranted by increasing population and to accomplish its saving not by the curtailment of postal facilities, but by handling in a more systematic and business-like manner the constantly expanding volume of the mails."

The tables prepared indicate that more than 1,500 new postoffices, with the necessary offices, buildings and equipment, were established during the last fiscal year, while great extensions were made in the rural delivery routes, 245 new routes being added, of 12,235 miles being put into operation. More than 1,500 postoffice clerks were added to the working forces of city postoffices and more than 1,000 additional letter carriers were named. The railway mail service was strengthened by the appointment of about 750 new employees. The aggregate salaries of new employees appointed during the year from the civil service lists exceeded \$2,000,000.

The tables compiled also show that the department made liberal increases in the compensation of old employees. Salaries of postoffice clerks were advanced in the aggregate \$1,250,000, while the letter carriers' salaries were increased \$1,225,000. Railway mail clerks received increases amounting to almost \$250,000.

Mr. Hitchcock explained that all increases were based upon a system of efficiency ratings, by which the department a little more than a year ago.

"I believe," he added, "that the higher standard of efficiency is a proper application of this policy is certain to justify the resulting increase in expenses. In my judgment the action of the department in this regard last year was largely responsible for the effective co-operation of the department received from its officers and men throughout the country in cutting out wasteful expenditures."

"This hearty co-operation I expect to be continued through this and future years, with the result that we shall have a self-sustaining postal service and one cent letter postage."

CLIPPED FROM EXCHANGES. The increase in the number of issues in the state of New York during the last twenty years has reached 90 per cent, while the population has increased in the same time only 53 per cent.

England sent last year to French West Africa 21,613 pounds of beads, so as to give the natives something to put on their string to play with. But for those beads England got about \$2,500,000 worth of rubber.

Since the outbreak of cholera in Naples the Disease of Asia has been busy packing her baggage for another journey to Central Africa, from which she returned only a few weeks ago after an absence from Italy during the whole of the winter and spring social seasons.

The quality, formed by the junction of the provinces of Moscow, Vladimir and Riazan, is the center of the hop industry, and the Gussitay annual fair sees the transactions of much of the Russian hop trade. The annual output of Russian hops is about 2 to 3 per cent of the world's output.

"Yemoabura" is a vegetable oil derived from the seeds of the Perilla olivoides, an annual plant, which resembles the Perilla pectinatis, and which is the seed collected from the lacquer trees. The oil is made in the Tochi, Saitama, Chiba, Miyagi and Ibaraki prefectures of Japan, which are famous for the production of seeds and oil.

The projected railway from Calman to Pasco de los Andios, in the Chabut, will probably not be begun until 1911. Meanwhile the wool industry of this territory is rapidly developing and it is stated that representative United States mining companies are to investigate the mineral possibilities of this little known part of South America.

No figures are obtainable in Russia as to the number of Russians leaving for the United States, but statistics furnished by the United States bureau of immigration show that 120,640 people whose last permanent residence was Russia, divided as follows, landed in America during the fiscal year ending June 30, 1909: Finns 11,262; Lithuanians 35,150; Latvians 14,595; Poles 37,770; Russians 9,988; Germans 7,781; others 592.

FOUND GUILTY OF VIOLATING THE WHITE SLAVE LAW

Frank C. Williams and Anna Hull Sentenced to Federal Penitentiary.

Pittsburg, Oct. 25.—Frank C. Williams and Anna Hull of this city were found guilty of violating the white slave law enacted by congress on June 25 last, by a federal jury in the United States district court today. Williams was sentenced to two years and six months in the federal prison at Leavenworth, Kan., while Miss Hull will serve a like term in the Western penitentiary here.

These are among the first prosecutions under the new law, and the trial of the offenders has excited wide interest. Miss Hull, it was brought out in the testimony, was proprietress of a resort to which Williams brought his victims from other states.

The Eskimo Baby.

The clothing of the Eskimo baby is often very scanty. In fact, one occasionally sees a baby being carried in its mother's hood with only a cotton shirt on, despite the fact that the thermometer registers 20 degrees below zero. The mother's hood is the baby's cradle. Being made of seal or deer skin, it is warm and wind proof. The infant also has the benefit of the heat of its mother's body and is out of harm's way. If it were laid in a basket cradle in the tent it would be very much in the way and would always be in danger of falling a prey to the wolfish Eskimo dogs that prowl round the door by day and night, ever ready to pick up a dainty morsel.—Wide World Magazine.

A King's Pun.

The late King Edward of England was visiting Rufford abbey, and one morning, in company with his host, Lord Arthur Savile, he took a walk over the preserves. Suddenly Lord Arthur, a burly man, rushed forward and seized a shabby fellow with a dead pheasant protruding from the breast of his coat.

"Sir," said Lord Arthur to the king, "this fellow is a bad egg. This is the second time I've caught him poaching."

But the king's handsome face beamed, and he laughed his gay and tolerant laugh. "Oh, let him go," he said. "If he really were a bad egg, you know, he wouldn't poach."

Natural.

Clarence—I wish I had lots of money. Uncle Henry—if one could get what he wished for, I think I should wish for common sense, not for money.

Clarence—Naturally every one wishes for what he hasn't got.

NAVAL CADET CLAY'S SENTENCE COMMUTED

Young Clay Had Been Tried on Several Charges of Misconduct.

Washington, Oct. 25.—Cadet Frank B. Clay, first class, United States military academy, son of Senator Clay of Georgia, has been court-martialed and sentenced to dismissal from the academy without pay and allowances until Aug. 28, 1911, and then to join the first class. The sentence was commuted by President Taft so as to require Clay to be confined to the barracks until May 31, 1911, and during that period to undergo disciplinary tours every Wednesday and Saturday.

Young Clay was tried on several charges of misconduct. He was found guilty of two of the charges—absence from his tent between tattoo and reveille and going beyond cadet limits. He was acquitted on the other counts.

SIRENS AND SONS.

J. Pierpont Morgan has not only one Caxton, but a bookcase full of them.

Nanman Corey of the Pittsburg (Me.) police force hasn't been a night off duty for the last sixteen years.

Thomas Jefferson mastered Latin and Greek and never forgot them. In his old age he enjoyed the charms of ancient literature.

When President Taft was on the bench he and Judge Lurton, the new United States supreme court justice, were colleagues in the Sixth circuit and were also intimate personal friends.

After thirty-five years' service in one position at the University of Kansas Professor Ephraim Miller, head of the department of mathematics and astronomy, will retire and accept a Carnegie pension.

Vice Admiral Ijima, who is to succeed Admiral Togo in chief command of the Japanese fleet, distinguished himself in the Russo-Japanese war and is well known in naval circles in America and England.

Robert Wynne, the former United States consul general in London, intends to resume newspaper work in the British capital. Before Mr. Wynne became postmaster general of the United States he had a long and brilliant journalistic career, being also president of the Gridiron club in Washington.

John Wesley Hyatt of Newark, N. J., the inventor of cellophane, is still hale and hearty at seventy-two and continues his career in utilitarian research with lively interest. His first patent was secured when he was twenty-four, and since that time he has been a constant and successful applicant at the government offices.

The Royal Box.

Prince Albert of Belgium, who succeeds King Leopold, visited the United States in 1888 and was much interested in railway and commercial developments. He speaks English fluently.

The mechanism attached to the doors of the czar's private apartments is constantly altered, so that only two or three persons at any given time know how the doors can be opened from the outside when the emperor is within.

Queen Maud of Norway, who is the daughter of King Edward of England, studied palmistry in her youth and foretold to the czar and czarina the troubles through which they had to pass. She also saw herself crowned in a crystal and considered it so foolish that she gave up crystal gazing for two years, and finally it came to pass.

Desperate Remedy Needed.

Plate Loyer to passenger who has jumped from the London-Plymouth nonstop express—Jumped apt, did yer? Wof for? Passenger—Crowd of golfers in the carriage, couldn't stand another two hours of their shop.—London Punch.

PRESIDENT TAFT RECEIVED ON ARGENTINE BATTLESHIP.

Guest at an Elaborate Luncheon on the Presidente Sarmiento.

Washington, Oct. 25.—With the reception to President Taft today the republic of Argentina acquired the unique distinction of being the first foreign power to entertain a president of the United States on one of its men of war. The president with other officials of the American government were guests at an elaborate luncheon aboard the Argentine training ship Presidente Sarmiento, now anchored off the Washington navy yard.

The president was received in the captain's dining room, which was profusely decorated for the occasion.

The Writers.

Thomas Wentworth Higginson, the venerable Cambridge author, is eighty-six. He was graduated from Harvard sixty-eight years ago and began writing in 1833 his "Outdoor Papers."

Sven Hedin is generally regarded as the most noted of living explorers and geographers. He is a Swede, forty-four years old, unmarried, and his home is in Stockholm, but since 1885 his time has been spent largely in the wildest regions of Asia.

Dr. Goldwin Smith is eighty-six years old. For a long time he has been one of the most widely known men of Canada, and his home in Toronto has been an intellectual center. In England he is ranked among the great men of the nation. He was the tutor of the present king of England.

His Little Yarn.

"I thought you were going to take me to the grand opera?" "Well, you see, I ordered two seats in the front row."

"Good enough." "But then they had to take the first row out to make room for the orchestra."—Louisville Courier-Journal.

Forestry.

Rock-a-by, baby, on the treetop. If you cut down the forests the baby will flop. And when the trees tumble the babies will fall. So put up your ax and don't chop them all!—Judge.

His Natural Bent.

"What are you hollerin' at me for?" demanded the offended one, turning about. "If you wish to go ahead why don't you turn out and go ahead? The sidewalk is wide."

"Excuse me," said the other. "It was force of habit. I am a motor-man."—Buffalo Express.

Remind Him of Business.

Gunner—There goes the tobacco plug. He is a multimillionaire. Guyer—Then it's queer he doesn't drive a better team. Those horses look like a pair of plugs.

Gunner—Well, I guess he thinks a pair of plugs is appropriate in his business.—Chicago News.

The Unreasonable One.

He growled because they "wouldn't give him rope." "An' set the little settlement a-hummin'." "But if they'd tried to pinch him." "An' take him out an' lynch him." "I bet you he'd have had a kick-a-comin'!"—Atlanta Constitution.

A Love Feast.

Fat Man—You're growing stout. Lean Man—And you're getting thin. Whereupon they shook hands, smiled, and each mentally declared the other fellow "a bully good friend."—Lippincott's.

Caviare.

As a matter of fact, not all caviare comes from the sturgeon, since, like other foods, it is woefully adulterated with the roe of inferior fishes prepared in similar fashion. True caviare, however, is the eggs of the female sturgeon.

A Godsend to Sickly Children

Mr. N. L. Duffee, of Helena, Ala., the thankful father of a little baby girl who was made healthy and fat after she was not expected to live, writes: "Duffy's Pure Malt Whiskey is the finest of medicines. I have a girl baby, now 5 months old, who until she was 2 months old was hardly saw any chance of raising her. At that time I procured a bottle of Duffy's Pure Malt Whiskey and gave her a few drops at a time. Now she is acknowledged to be the finest looking baby in town. Baby is still growing as fat as a pig."

Duffy's Pure Malt Whiskey

can be safely given to children, no matter what age, in small doses. It is just the right thing for them when they have coughs, colds or any throat or stomach troubles that are so prevalent with the children. It is an absolutely pure, gentle and invigorating stimulant and tonic. It is invaluable for overworked men and delicate women.

All druggists, grocers and dealers, or direct, \$1.00 a large bottle. Refuse substitutes and imitations; they are impure and dangerous. The Duffy Malt Whiskey Co., Rochester, N. Y.

Lightning Superstitions.

There is a popular tradition that lightning will not kill any one who is asleep. The folklore of lightning is extensive and peculiar. According to one school, the splinters of a tree struck by lightning are an infallible specific for the toothache. But the most pleasing superstition is that which used to be cherished by the boys of a Yorkshire village who believed that if they mentioned the lightning immediately after a flash the seat of their trousers would be torn out. No boy could be induced to make the experiment.—London Chronicle.

Rip's Desire.

Rip Van Winkle, through the carelessness of the hotel clerk, was not called at the time given when he registered, and accordingly he continued to sleep until he awoke with a start; and found that twenty years had elapsed. His first thought was of an old friend who had been about to sit down to breakfast just at the time Rip was winking up his day.

"If Horace Fletcher is through breakfast," he said to the hotel clerk, "tell him that I'd like to speak to him."—New York Press.

She Knew Her Business.

For many years in a certain family in Uniontown, Pa., there was an old colored cook who was thrifty and economical, but the old shanty to which she went home every night never had any repairs and was weather beaten and dilapidated.

"Nancy," said the mother in the family, "you seem to be getting along well, but why do you not fix up the shanty, add a spare room, and so forth?"

"Iuh," said the old dorky, "an' I'd have a spar' nigger every night."—Ladies' Home Journal.

The Heat of the Sun.

It has been demonstrated that every square yard of the radiant surface of the sun gives out every hour into space as much heat as would be generated by burning 13,500 pounds of coal. The entire surface of the sun emits in a year as much heat as would be produced by burning a layer of coal seventeen miles deep spread all over the solar surface. Of this inconceivable amount of heat the amount actually received by the earth amounts to only the two hundred and thirty millionth part.

General Dissatisfaction.

Tiny Elisabeth was taken by mother to an afternoon tea, fashionable, but where the various ladies present were well acquainted and indulged too freely in gossip. The little girl sat very straight and still, listening to all that was said. Critical remarks were made about absent friends, and even guests who took their departure were discussed with some freedom.

Elisabeth edged closer to her mother and remarked in a solemn whisper: "Nobody seems jes' exactly satisfied with anybody, does they, mamma?"—Woman's Home Companion.

England's Roman Amphitheater.

Dorchester possesses the best preserved Roman amphitheater in England, in which over 10,000 people gathered in 1105 to witness the burning of a woman who had murdered her husband. Dorchester was a place of importance as early as the Roman occupation, and at a later date it had an unenviable association with Judge Jeffreys and his bloody assize.

The Trouble.

A manager was sitting with the writer of the libretto at a rehearsal one day when things were going wrong. "Great Scott!" exclaimed the librettist, "that sailors' chorus was simply awful. What's the matter?" "The tars," blithely replied the manager, "haven't got the right pitch."—New York Herald.

A Different Family.

Some ladies were visiting the Boston Art museum when one of them showed a lively interest in some large plants which had been placed there for decorative purposes. She turned to one of the elderly painters and asked eagerly, "These plants belong to the banana family, do they not? With scora and injured people the veteran attendant answered coldly, "No, they belong to General Loring."

Figuring It Down.

Elmer Glyn first wrote about "Three Weeks." Now she has got down to "The Hour." Soon she may have figured it down to the very minute.—Omaha Bee.

Meriden. There are 181 autos and 29 motorcycles in Meriden.

Switched Over

Some folks thought they didn't care for breakfast cereals—until they tried

Post Toasties

Selected white corn is thoroughly cooked—rolled out thin and fluffy—toasted to a delightfully appetizing brown.

They are ready to serve direct from the package with only the addition of cream or milk, and a sprinkling of sugar if desired.
