Constant repetition has emphasized pretty clearly the lines upon which the campaign is being fought, and it is unlikely that any new issues will be presented tomorrow.

The republican ranks, caused by hostility to Theodore Roosevelt; dissatisfaction with the democratic party, which they attribute in large part to a republican tariff; and the evidence of official corruption in the administration.

The republican leaders have admitted that the campaign is a close one, but they insist that any voter which his policies may have cost the party among business men will be more than offset by his increasing popularity among laboring men and in the rural districts.
