Academy Were Winners, 22 to 0 Windham Eleven Had Little Chance Against the Locals

—Brown Defeats Yale for First Time—Cornell Spoils Harvard's Clean Slate.

Without any great exertion the Academy won on Saturday on the campus from the Windham High football team, 22 to 0, scoring four touchdowns from which two goals were kicked.

Windham's game was held in check at all stages, making few gains until in the last period, when the Academy apparently let up in their play somewhat.

After Windham's kickoff, which Captain McCormick carried back 25 yards to the Academy 45 yard line, it looked as if a few plays at the line would put up a strong defense.

After Windham's kickoff from the center of the field they soon regained possession of the ball on a fumble by McCormick.

The second period started with the ball in the Academy's hands on Windham's 40 yard line. Vandenberg broke up a forward pass but Windham could not get anything out of it.

Windham fought hard on the defensive but the work of the Academy was gradually forced back till McCormick tried a place kick from the 25 yard line.

Third Period. Windham fought hard on the defensive but the work of the Academy was gradually forced back till McCormick tried a place kick from the 25 yard line.

CHARLES F. NOYES

Advocates Co-operative Real Estate Brokerage.

Charles F. Noyes, of Charles F. Noyes & Co., addressed the real estate class of the West Side Young Men's Christian association of New York last Tuesday evening on Leasing, says the New York Herald, and said in part:

"Many buildings in our charge are painted white once or twice a year. A foolish color scheme," the owner says when first the proposition is suggested to him.

"The lowering of the ground floor to the level of the business firms in that district and airy basements to the second floor purposes, the installation of modern slow fronts and windows; the proper lighting fixtures; a little metal ceiling here and there; the handsome wood trim; the touch of mosaic tile at the store entrance; these are common sense requisites. In well located store property a large store can frequently be had for less than the real estate agents for much more than one tenant could afford to pay."

"It is necessary to have had long experience in the district in which one is operating as owner or agent, also to know the business firms in that district, the rents the various lines of business can afford to pay, and to be able to arrange the building or store to meet the demand of the neighborhood, always having in mind the necessity of obtaining therefrom the greatest possible yet consistent income."

"I have seen store rentals increased from \$5,000 to \$12,500 per annum, buildings built for \$3,000 to \$5,000, let for \$1,200 to \$2,400 in districts where values were not jumping, but simply by using common sense and good judgment in making certain inexpensive changes which should have been made long ago, and in many cases the new tenants were more contented and better satisfied under the improved conditions than were the old tenants, who were paying a much lower rent."

Real estate offices, Mr. Noyes thinks, should be run on co-operative lines. Mr. Noyes said that the real estate office is not far distant when all real estate offices will handle their organization along co-operative lines and permit all employees to share in the profits of the office, and one reason for this is that the renting men are those who more than any other class are directly responsible for the success of any firm. Our office is now organized along co-operative lines. Our office boys, porters, sign men, stenographers, bookkeepers and accountants receive a part of our profits."
