PUTTING UP THE ELECTRIC WIRES

Motor for the First Pump Has Arrived and Transformers Are at Pumhouse—About 2,500 Feet of the Pipe Laid—Will Be to New London Turnpike By Saturday Night From Lower End.

On the Trading Cove pumping project, which is being carried out by the city, it is a delay in securing the ten-foot outriggers, which will be required along West Main street, where there are so many trees. There has been no trimming as yet, and there will be none until the cross-arms are up and it is seen just where the trimming will be required. Some of the cross-arms are up and the job of stringing the wires has been started from the brook end and the four wires are being brought along towards the city as fast as it is possible to do the work. The outriggers have been ordered, but it is possible because of the point of shipment that they will not get here in time, and in that case it will be necessary to have some made here. As soon as the arms are up stringing of the wires will be a short job.

Superintendent Bogus states that the two 20-kilowatt transformers, which were ordered by the city, have been taken to the pumping station on Thursday, and they are ready to be placed in position. The transformer which will drive the pump, already on hand, has arrived, but neither will be taken to the pump house until it is closed in and some other pump, which will be directly connected with the motor, is expected here early next week.

The laying of the pipe is being pushed along and Thursday night it was estimated that fully 2,500 feet had been laid. Contractor Torrance had at that time laid 1,500 feet, and the balance of the job, having reached a point in the Pierson land, and by Saturday night he expects that he will have the pipe line laid to the New London turnpike. He did not think that the work would be carried on Sunday and Monday.

The mail carriers, who are in place in the large workroom of the postoffice, were piles of packages and bundles awaiting to be taken out for delivery. Utterly Wretched

Nervous Prostration Long Endured Before Remedy Was Found. Miss Minerva Reminger, Upper Bern, Pa., writes: "For several years I had nervous prostration, and was utterly wretched. I lived on bread and beef tea because my stomach would not retain anything else. I took many remedies, but obtained no relief until I took Hood's Sarsaparilla, when I began to gain at once. An unwelcome cure. Pure rich blood makes good, strong nerves, and this is why Hood's Sarsaparilla, which purifies and enriches the blood, cures so many nervous diseases. Get it today in its usual liquid form of associated tablets called Sarsatabs."
