Now \$50 Pennant For State League

Directors Increase Reward For Connecticut Baseball Champions—No Change in Clubs For Coming Year.

Hartford, Conn., Jan. 17.—The winner of the pennant in the Connecticut Baseball league will in the future be given \$100 instead of \$75, as the result of a meeting of the directors and officers of the league here tonight. President Tracy and all the directors were present and much business of a minor nature incident to the opening of the league games in the spring was transacted. The directors unanimously upheld the contention of Harold Drant, one of the owners of the Waterbury club, that six players which manager Tracy claimed belonged to him were the property of the club, and that Penn was in no manner entitled to their services. There will be change in the clubs for the coming season, and the circuit will be the same as for the past year. Hereafter the name of the league will be printed on all balls used and there will be uniform tickets for all clubs. Official scorers were appointed for the home city of each club, and the directors made known their preference of dates for games which were noted by the maker of the schedule, and as soon as the schedule has been drawn up another meeting of the directors will be held here and the schedule accepted.

Jack Goodman Goes to Dreamland Before Packey's Punches. New York, Jan. 17.—Packey McFarland of Chicago knocked out Jack Goodman of New York in the fifth round of a ten-round bout in the Fenimore Athletic club tonight. The stockyards lightweight first floored Goodman for the count of nine with a right swing to the jaw then when Goodman arose groggily, sent him down for the count with a rain of blows in the face.

SHAW'S BIG COUP.

Won \$30,000 at 15 to 1 at Jacksonville Track. Tom Shaw, the young turf plunger, won \$20,000 on one race at Jacksonville, Fla., last week. It was the biggest coup of the year. It hit several of our bookmakers so hard that they wrapped up all that remained of their bankrolls and sadly started for New York. Shaw had \$2,000 on a successful 15 to 1 shot, which won on the post by a nose. A stride on the near side of the winning post his money was made. Just as the favorite finish line was reached the bearer of Shaw's hopes, to say nothing of his money, won.

Eugene Tremblay, Lightweight Wrestling Champion.

A short trip which Eugene Tremblay of Montreal, champion lightweight wrestler of the world, is to make here this week, will provide another Connecticut with top line attractions in the grappling game. Tremblay has signed up for two matches, Monday Young Goch in Willimantic this evening, and wrestling Bill Collins to a finish in Moseup on Friday evening. The Goch match was originally booked for a different date but has been changed. For both bouts the promoters are looking for record-breaking crowds for the championship attractions they have provided.

FEW FOOTBALL RULES CHANGES.

Cambridge, Mass., Jan. 17.—Secretary E. K. Hall of Boston has sent word to the other thirteen members of the American Football Union with a letter notifying them that the annual meeting will be held in New York on Feb. 2 and 4. It is not believed that any changes in the present code are contemplated and so the committee expects to get through its work at the meeting in good time. Changes with a view to simplifying the forward pass and the advisability of continuing the four period plan, to which there is a strong opinion in the ground that it slows up the game, are likely to be the only matters of moment to discuss.

IN THE AUTOMOBILE WORLD.

Good Trade Promised for 1911—American Cars Not Behind Those Made in Europe—New Haven's Fire Runabout Lit by Electricity. When an automobile show opens at the beginning of a year the industry is really in midseason. That is to say, what is new for 1911 has been known for some time, and in fact the makers are planning their 1912 product. The automobile as we know it is just becoming known to be that the trade is good. There is, in some quarters, a change of reproduction, not even those who were a trifle overenthusiastic have calmed down, and the chances are that automobiles enough will be produced and not many more. Instead of attempting to force a larger supply of cars into the already exploited market, manufacturers are turning their attention to other sections and each one has determined that there are opportunities for placing many cars.

For instance, Windsor T. White, of the White company, after a swing through the west and south, has returned with a battery and the other details for the construction of the equipment of the new fire runabout for the New Haven fire department, and it is expected that the machine will be completed and delivered there by the first of next month. The car is a fire passenger touring car with a complete set of fire fighting apparatus and equipment. It will carry extra lanterns, a feature of the lighting system will be the lighting of all the lamps by electricity. The lamps will be controlled by a battery and the wheels can light them all by touching an electric button. This was a feature insisted upon by the chief as it is essential to quick response to fire alarms.

"The most interesting thing I learned in my recent trip to Paris to the office of the president of the Automobile Association of Europe was that the American-built motor car does not have to take a back seat for the best car in the world in Europe, says a well known automobile authority. "The most popular car in Europe is the five passenger touring car with a comparatively small motor, usually ranging between 25 and 30 horse power, and the cars which sell the best have the most power plant. The bodies are made roomier than heretofore and the details of comfort are looked after better. The doors are large and the seats are deep and low and just gathering features are quite generally eliminated. I must say, however, that the re-
