Today Only 22c

HOSIERY SECTION

CHILDREN'S SUMMER WEIGHT, ONE AND ONE RIB HOSE IN BOTH BLACK AND TAN, OUR REGULAR 15c HOSE—

Today Only 10c

THE REID & HUGHES COMPANY

New Trotters In Fairground Stables

Trainers Have String of Ten There Now—Bonnie Wilkes the Only Veteran—Others Show Much Promise.

At the Fair Grounds at the present time there are ten horses in training for the fall races, and the track and stables are the scene of considerable activity when they are given their daily exercise.

Six of the ten are in charge of the veteran trainer, A. M. Etheridge of Mansfield, while Elmer R. Pierson owns the remaining four and is getting them into the fast-stepping class.

Bonnie Wilkes, the clever little pacer owned by Frank E. Smith of this city, is the only horse on the grounds that has had real experience on the tracks, and the performances so far in training would indicate that she will be a winner the coming season. Last fall she was entered in a number of races around at the various fairs and meets, and took every event in which she was entered except one, and that was called off on account of bad weather.

With the exception of Bonnie Wilkes and Lecco Roy all the others are new to the racing game.

C. D. Babcock of Jewett City has a handsome 4-year-old filly, Goldwater, that he sent down to see if there was

any speed in her. So far the young pacer has been coming along at a promising rate, doing the mile in 2:41 on Friday. When she arrived, about three weeks ago, she was hardly in the three minute class.

Aqua Ross, which appeared several times last year, is a 4-year-old trotter owned by James Dawson of this city, and from present conditions considerable amount may be looked for in this mare.

J. H. Bradbury of Lyme has a couple of young horses that show promise. Lecco Roy, a colt of the famous Lecco (2:09 3/4) stock, and a 3-year-old stud, Highland Fling. Both are trotting stock. Lecco Roy is a speedily built horse, and though he has not done anything exceptional as yet, he probably takes after his sire, who went a couple of years before he got into form and struck the gait that carried everything before him.

The last horse that Mr. Etheridge is driving is an Axworthy colt owned by W. H. Bromley of Westery Three years old in June, the colt has done the mile in less than 2:40, having made remarkable progress since ar-

iving at the track, the middle of May. Starting out as a pacer, she is now trotting as square as can be, and great things are expected of her.

Mr. Pierson's four horses include three pacers and a trotter, and all are new, having come in from the west four weeks ago. They are fine looking specimens of horseflesh, however, and with careful training it will not be surprising if they hang up some good records.

All of the horses show the results of the thorough-going attention they are getting at the hands of their caretakers. During the hot spell some of them fell off a little in the feed but they are now in the best of condition, and it repays any lover of horse racing to pay a visit to the Fair Grounds. A number of new arrivals at the training stables are expected in the next few weeks.

Hints for School Supervisors.
(Special to The Bulletin.)
Danbury, Conn., July 21.—At the meeting of the state school supervisors conducted by Secretary C. D. Hine at the Danbury Normal school, this week, Mr. Hine impressed the supervisors with the fact that they, as supervisors, were responsible for the results of the schools in their respective districts. He said that supervisors should act in the capacity of supervising principals. The energy of the supervisor should be distributed through the teachers to the pupils.

One of the ways by which the supervisor should make himself felt in a school system is to suggest and pro-

vide each school with cards and leaflets to aid the work in language and reading.

Mr. Hine advised the supervisors to keep the members of the town school committee well informed about the condition of schools. He said that frequent conferences with committeemen should be held. It is important that a supervisor understand the point of view of the town school committee.

The speaker urged the supervisors to become acquainted with each child in their school system. He suggested the use of card catalogues in which a record of each child's ability, aptitudes, advantages and disadvantages might be recorded.

At the second conference of the day there was a discussion about the wages of teachers and how they should be regulated. Supervisors A. N. Potter, T. W. King and L. S. Mills acted as a committee in leading the discussion.

Postmasters' Commissions Sent.
(Special to The Bulletin.)
Washington, July 21.—The postoffice department has sent to Timothy O. Wall and Clara E. Nicholson their commissions as postmasters at Cobalt and Poquoque, respectively.

Bridgeport.—The first 1,000 mile flight by homing pigeons under the auspices of the Bridgeport Homing club in ten years will take place this (Saturday) afternoon. Birds owned by five members of the club, 13 in number, will attempt the long flight from Evansport, Ala., to this city.

BIG INCREASE OF COTTON EXPORTS.
Largest Gain Ever Known in General Exports in Last Fiscal Year.
(Special to The Bulletin.)
Washington, July 21.—The farmer and the manufacturer shared about equally in the remarkable growth in exports which characterized the fiscal year just ended. The total increase in exports was 394 million dollars when compared with the immediately preceding year, being a larger gain than ever before shown in a single year of our export trade. Of this gain of 394 millions, manufactures as a whole supplied 140 million dollars; cotton about 135 millions; meat and dairy products about 19 millions; corn approximately 19 million; food animals 11.2 million; flour about 2.1-2 million, while wheat shows a decline.

Cotton is king in the exports of agriculture, the value exported during the year being \$85 million dollars, by far the largest total ever shown in the cotton export trade, against 450 million in 1910 and 491 million in 1907, the former high record year. Meat and dairy products show a total of approximately 150 million dollars, against 121 million last year, but materially less than in certain earlier years, in which the total ranged as high as 202 million dollars in 1907 and 211 in 1906. Food animals show a total of 13 million dollars, against a little less than 12 million last year, but much below the figures of earlier years, when the total figures of food animals exceeded

43 million dollars in the high record year, 1906. Flour amounted to approximately 60 million dollars in value, against 47.1-2 million last year, and much less than the high record year of 1893, when it reached 75.1-2 million dollars.

The increase in manufactures is apparent in a large number of articles. Agricultural implements as a whole show an increase of about 8 million dollars; mowers and reapers about 5 million; plows and cultivators about 2.1-2 million; pig copper about 15 million; lumber about 3 million; iron and steel manufactures as a whole show an increase of about 47 million dollars, while the details for iron and steel show for sheets and plates about 4 million dollars increase; structural iron and steel about 3 million; metal working machinery about 5 million; wire about 2 million; electrical machinery nearly 2 million; locomotives over a million; traction engines more than a million, while in other articles not classed under the general title of iron and steel manufactures, automobiles show a gain of about 3 million dollars; railway cars about 4 million; electrical appliances about 2 million, and naphtha about 3 million.

Ancients to Visit London.
Boston, July 21.—A handsomely engrossed letter of acceptance was sent today by the Ancient and Honorable Artillery company of this city to the Honourable Artillery company of London to the latter's invitation to visit London next summer. It is expected that the local corps will sail from this city about July 1, 1912, and will be in England two or three weeks.

For the First Time in United States
naval manufactures the wireless telephons was used successfully in communicating from land to ships at sea in the mimic battle at San Francisco between the state militia and the attacking regulars.

HAVE YOU TRIED PAXTINE
The Great Toilet Germicide?
You don't have to pay 50c or \$1.00 a unit for listerian antiseptics or peroxide. You can make 16 pints of a more cleansing, germicidal, healing and deodorizing antiseptic solution with one 25c box of Paxtine—a soluble antiseptic powder, obtainable at any drug store.

Paxtine destroys germs that cause disease, decay and odors—that is why it is the best mouth wash and gargle, and why it purifies the breath, cleanses and preserves the teeth better than ordinary dentifrices, and in storage bathing it completely eradicates perspiration and other disagreeable body odors. Every dainty woman appreciates this and its many other toilet and hygienic uses.

Paxtine is splendid for sore throat, inflamed eyes and to purify mouth and breath after smoking. You can get Paxtine Toilet Antiseptic at any drug store, price 25c and 50c, or of mail postpaid from The Paxtine Toilet Co., Boston, Mass., who will send you a free sample if you would like to try it before buying.
