When a boy slides down hill

Isn't so very particular whether he sits on the sled or simply sits on the hill. The "wear and tear" is bound to be tremendous. Even the snow and ice have to be renewed frequently.

And the boys' clothes! They have to be of pretty good stuff to last a month. But we've the kind of boy's clothes that will stand a full winter's hard wear. Stylish too; they're stout and strong.

Overcoats, \$5.00 to \$12.00. Suits, \$5.00 to \$8.00. And six months' subscription to the American Boy Magazine free.

MAKING INVESTIGATION OF SPOTTSWOOD DEATH

Engineer Elwell Has a Number of Witnesses Before Him at City Hall.

On Friday, Engineer C. C. Elwell of the public utilities commission began the investigation into the cause of the death of Conductor Spottswood at New London Wednesday afternoon. It is a complicated matter and will require quite a little study before a decision can be reached.

The hearing was a private one, conducted in the common pleas courtroom which was closed to the public. The matter was in contact with the telephone wires, and about 7 o'clock and were repaired before eight.

The trouble at New London, where a dead cable had fouled the telephone wire and burned off a piece of the block, was gone into. It is believed that about 7:15 o'clock it is believed that the crossed wires were caused by the heavy squal about that time in the morning but there is no certainty yet as to where the electric current came from.

Standing the hearing is Coroner Franklin H. Brown who is making an investigation of the matter. Superintendent Bogus was called to the department and Corporation Counsel J. Fanning. The last named is not allowed to be present, however.

Stenographer R. C. Snyder from the commission's office took the testimony. Mr. Anderson called the attention of the commission, who will make it public.

Superintendent Anderson of the Connecticut company, with Engineer Elwell, made an examination of the defective power cable. The cable was which was down when Starter Spottswood was electrocuted Wednesday morning. Mr. Anderson called the company's electricians from Norwich and New London to view the pole at Division street.

Inspector Ashe, who was near by when the electrocution took place, described the position of the cable as he will be willing to say that the electrocution circuit formed at Division street. Superintendent Bogus was of the opinion that the electrocution might have been caused by the crossing of the cable. The street railway electricians consider this improbable as they say the cable was blown down and swung against the pole, was cut, while an electric light wire carried at least twice that voltage. They doubt if voltage as low as 550 would have caused death.

PREMABLE. Whereas, One esteemed friend and brother, Hon. Amos A. Browning, became president of our association in June, 1905, at a time when conditions were such that it was necessary to give prompt expression to the gratitude which we deeply feel. There is a saying: "It is never too late to mend"—and if we as an association have been guilty of tardiness in the matter of honoring our friend, we regret that it is not too late to atone, in some measure, for our lateness in the performing of this duty.

Resolved, That we heartily tender to our friend our sincere thanks for his untiring service in behalf of our association, and we bespeak for him from the throne of our gratitude the best blessing and compensation which ever the sweet reward for well-doing—the blessing assurance of kindly will of the Father of our fatherhood, with the being Christ.

On behalf of a number of Mr. Browning's friends in the association, President Case then presented him a handsome tank which Mr. Browning, in a rocking chair, which Mr. Browning acknowledged with suitable words of appreciation.
