FEW APPEARANCES BEFORE

BOARD OF RELIEF.

One Remonstrant Wants Automobile Assessment Reduced from \$300 to 200.

The board of relief held its third meeting Thursday in the rooms of the board of education. During the day there were less than a half a dozen appearances, and a couple of those who did appear did not make any remonstrance over their assessments.

Richard L. Wiggins appeared and objected to the raising of his automobile from \$200 to \$300 by the assessors, saying that he sold the machine for \$250 and that was as much as he could get for it. He thought he ought not to be assessed for more than he sold it for. He said he was last summer getting rid of it at that figure.

In all three meetings the board less than thirty have appeared with any remonstrance or for any other purpose and this is a considerable smaller number than has appeared before former boards of relief.

Chairman A. B. Holmes said that the board and the board of assessors would hold a joint session Wednesday, Feb. 21, and that date would also be the date of final appeal for any one desiring to remonstrate or seek information upon the lists for 1911.

The recently organized Democratic club of Connecticut to purchase certain weekly papers in various parts of the state, with the idea of converting them into the organs of the party on republican tendencies. Here in Windham county there has been little comfort for the democratic party as far as the encouragement of the local press is concerned. It is proposed, it is said, to buy one or two weekly papers and use them during the coming campaign to boom democratic candidates and to discourage republicans. Just where the price of purchase is to come from is not made clear, but the talk is that it will be found by the sale of a fair price.

Rumor of Fort Duty for Thirtieth Company.

There is no subject at present that is of anywhere near so much interest to the members of the Thirtieth company, C. A. C., as that in which they consider a prospect of being ordered to occupy a fort in the New London artillery district while the garrison of regulars go south to Texas to keep the frontier quiet on their own side of the international boundary line. As a company, the local men are not at all averse to going out on a tour of duty, but many of them see in such a prospect a financial loss that is not pleasant to contemplate. The general opinion seems to be, however, that they will not be called upon for such service, though during the present week there has been some reason to believe that they would be.
