Frankfurt Reports That It Bore Evidence of Titanic Collision.

Bremenhaven, Germany, April 24.—The North German line steamer Frankfurt, which, according to her commander, Captain Hattorf, was the first vessel to receive the Titanic's appeal for help, arrived here today.

Captain Hattorf reports that he sighted the iceberg which sank the White Star steamship, bearing evidence of the collision, just before arriving at the scene of the catastrophe. The Frankfurt, on receiving the appeal for help, immediately headed at the utmost speed in the direction of the Titanic. The German vessel made 131-2 knots, though normally her speed was only 15 knots, but she did not reach the scene of the disaster until 10 o'clock Monday morning.

Captain Hattorf states that his first message from the Titanic was received at 12.10 o'clock Monday morning. It asked him to communicate the Frankfurt's position, which was immediately done. The Titanic then communicated her own position as 41.54 latitude, 50.24 longitude, and stated that she was fast in the ice and urgently needed assistance. The Frankfurt was then 140 nautical miles distant. Captain Hattorf informed the Titanic that the Frankfurt would reach her at 11 o'clock.

Captain Hattorf reports that at 12.15 a. m. the distress signal "C. Q. D." was received from the Titanic, and that at five minutes past one the Titanic reported that her passengers were being loaded into the lifeboats. Wireless communication with the Titanic was interrupted at 1.15 a. m. and Captain Hattorf believes that the White Star ship then sank.
