Storage Reservoirs.
Regarding some method for mitigating the Mississippi river floods, the scientific American says: "The present outbreak of the river will serve to direct attention to a proposed method of control which we are inclined to think will prove to be the ultimate solution of the problem. We refer to the plan of providing storage reservoirs in the upper reaches of the river, in which the food waters, due to spring rains and the melting of the snows, can be impounded, to be released in a steady stream for the purpose of maintaining the river at a navigable depth."

THE ANNUAL BANQUET
Dean Rogers and Professor Pierce of The University The Speakers at Second Annual County Gathering Here— Alfred S. Aiken and Rev. H. J. Wyckoff Also Speak— Officers Relected.

Yale colors, Yale songs, Yale enthusiasm and Yale men in possession of the Waukegan house dining room on Saturday evening for the second annual banquet of the Yale Alumni association of New London county, which was carried out with success that compares well with the initial banquet of the organization a year ago.

For the banquet the dining room had been prettily decorated with the blue pennants of Yale, which hung in great number from the ceiling and around the walls, with several American flags also used. In the front window were two big flags, one of Yale 1908 and the other of Yale 1909, while on the main street front of the hotel a big Yale banner was hung to the breeze.

Quartette Singing.
For the singing of the banquet the tables were arranged in a circle, a long table at the head of the room for the officers, the guests of honor, and the quartette. The Yale University Glee club quartette, whose selections throughout the evening were finely rendered and a greatly appreciated feature, were seated at the head table, set for four each. On the head table were artistic floral decorations, which carried out the Yale blue, and the quartette sang in a clear, strong voice, while at each table was a boutonniere of blue flowers.

To many of us the corruption which surrounds us and which we cannot but know become most appalling, at times we become almost pessimistic. It seems as if we come to know our enemies, and we discover more and more fearful things existing about us. The knowledge of wickedness may come to us with a suddenness which depresses us almost to despair. It is everywhere and in almost every form.

FUNERALS.
Mrs. Emma G. Thompson.
On Saturday afternoon at 2 o'clock the interment of the ashes of Mrs. Emma G. Thompson took place in the family lot at Yantic cemetery. The services being conducted by Rev. Frank Palmer. Miss A. M. Gleason and William Gleason of Brooklyn, N. Y., a sister and brother of the deceased, were present for the interment, and there were also present at the cemetery a number of the members of the Moberg church. Mrs. Thompson's father, Rev. Anson Gleason, was the first pastor of the church.

The death of Mrs. Thompson occurred early in the year, but her burial, after cremation, was deferred to await the convenience of relatives. Mrs. Thompson's father, Rev. Anson Gleason, came to Moberg and was minister at the Hills Congregational church there from 1821 to 1835, occupying a parsonage a house built by the church in 1821. After a time he went west and engaged in mercantile work among different tribes, returning east about 1845, and for a time acting as city missionary in Brooklyn, N. Y.

Norwich residents whose encouragement and support the Moberg church has always had recall the fact that in his later years Rev. Mr. Gleason was regarded as a zealous, scholarly man, whose mastery of the Indian dialects was exceptionally thorough.
The Moberg chapel was built in 1831 by subscriptions of Norwich residents. The general government made an appropriation of \$500 toward the building, and for a time allowed \$500 annually for his salary. As the number of the Moberg church decreased the government authorities regarded the \$500 as too large an appropriation and cut the salary allowance to \$100, a sum so small that Rev. Mr. Gleason felt compelled to give up the work.

He is gratefully remembered by his friends and relatives for his life and the death of his daughter is sincerely mourned by them.

WHERE JET COMES FROM
It Has Long Been Used For Ornaments.
Should jet ornaments again come into fashion such a revival would furnish an illuminating example of the manner in which tastes and fashions repeat themselves, even after the lapse of centuries.

There was unearthed in Lincoln and preserved in the cathedral a choice specimen of Roman sculpture, which according to experts, says the London Globe, represented a lady who lived in the cathedral city at the time of the Roman occupation. They are considered of great historical value as representing the costume of a British female of that period. Included in the costume was a jewelry which was obviously an indispensable item to every well-dressed female.

It is nowdays more commonly employed as an ornament. It is really a species of coal, but we in this country are not likely to see it. It is a strike of jet miners, for this type of workers is almost extinct. It is formed after the manner of coal, from wood and vegetable matter, for it differs considerably from the ordinary coal, being much more devoid of earthy impurities. Jet consists of two kinds, soft and hard, but only the latter is of any use for the purpose of producing ornamental objects.
