TWO KILLED AT HARRISON'S

Central Vermont Train Struck Grocery Team—Driver Albert T. Beckwith and Arline McNeil, Aged 10, Instantly Killed—William and Agnes McNeil Also Hurt.

Train No. 4 of the Central Vermont railroad Monday afternoon struck a covered grocery team at Harrison's Station, four miles north of New London, instantly killing the driver, Albert T. Beckwith, and a 10-year-old girl, Arline McNeil, aged 10, daughter of Mr. and Mrs. John McNeil of Harrison's Station. William and Agnes McNeil, aged 3 and 2 years respectively, were thrown from the wagon but were not seriously injured.

Beckwith, who was employed as a driver for H. E. Miner's Sons, grocers, was delivering groceries in Harrison's Station, and stopped on the way to give the McNeil children a ride to their home. All were on the front seat of the wagon, unmindful of the danger.

The train was partly hidden by a high embankment, making it impossible to see the train approaching. The horse had just crossed the tracks when the train bore down upon them, striking the wagon squarely and smashing it to pieces.

At the point where the accident occurred the highway crosses the railroad at right angles and the track is about 20 feet from the highway. The team goes down an incline, so that they could not see the train, as the driver would not have the whistle which was blown at a post 30 rods north of the track. The top of the wagon was taken off by the engine.

Medical Examiner G. M. Minor of Waterford and Coroner F. H. Brown of Norwich were notified and made a preliminary investigation. They arranged for the McNeil children to be held this (Tuesday) morning at 10 o'clock. Depositions were taken from the train crew and passengers. The train was running at a high rate of speed. It is said, not more than 20 miles an hour. Engineer McDraw was much affected by the accident.

When the body of Beckwith was found his gold watch was found to be intact. His head was badly crushed, and death was probably instantaneous. Arline McNeil was caught under the wheels of the engine and her body terribly mangled. Her brothers, William and Angus, were thrown a considerable distance. William is suffering from scalp wounds and Angus from injuries to his leg, as well as from the shock. They are at home with their parents, and it is said their injuries are not serious.

Mrs. McNeil, mother of the children, saw the accident and was prosstrated. Engineer McDraw, when seen after the accident, said he did not see the wagon until the engine was almost upon it. Beckwith was 45 years old and single.

TILLEY AGAIN GETS FIRST PLACE FOR THE WEEK.

A WARNING TO MANY. Close of the 27th Week at the International Egg Laying Contest.

The 27th week of the North American International egg laying competition, at Storrs, shows a drop of 23 eggs from the score of the 26th week, a continuation of the "broody" or sitting season making the loss in production inevitable.

This broody condition is no evidence against the layers' ability. Another 90 days will put an entirely new complexion on the competition. Noticeable in this connection are the late starting pens and the consistent speed with which increases in several low scores are being made.

Another noticeable feature is the consistency of the Mediterranean fowls, Leghorns, etc., in high averages; these fowls are maintaining.

It will be remembered that several pens made such late starts that much of the record was lost. Another record would be possible; the facts in the case are so contrary to all expectations as to be evidence by the rapidity with which some of the pens are overcoming the apparently dangerous handicap under which they are attempting to make a respectable showing.

W. J. Tilley's pen of White Rocks, from Packer, Conn., again captures first place for the week. The penly nominal, followed by Brooks' Sanitary Henery's Barred Rocks, with 30. The English version of the 30th week leads the competition with 141 eggs in 139 days, an average of practically 3 eggs per day for 5 layers, or 60 per cent yield for the 27 weeks.

Since the competition began a few weeks ago, the English version of the 30th week leads the competition with 141 eggs in 139 days, an average of practically 3 eggs per day for 5 layers, or 60 per cent yield for the 27 weeks.

Every one of these pens is greatly disappointed in the result, and a regular great Sunday of his mother, Mrs. S. A. Heath, at her home on Elm avenue. After a week's stay at his home here Raymond Keables returned this week to his work in Providence.

SMALLEST BOAT EQUIPPED WITH WIRELESS. Former Norwich Boys Assisted in Fitting Out the Boat.

What is said to be the smallest boat in the world equipped with a complete wireless outfit is the 45 foot sloop Calamite, owned by the Cloyne House school of Newport, R. I. The plans in work of installing the outfit were made and carried out by R. A. Morton, a well known wireless expert, assisted by G. C. Morse, Jr., and A. Morse, both wireless operators and assistants in the Cloyne House school. The aerial extends from a spreader at the mast to one placed on an extension of the boom, the boom is a heavily insulated wire connects the aerial with the instruments in the cabin and the ground wire runs down through the center-board box. The receiving apparatus is one of Morton's own combinations, consisting of a number of uniquely connected coils, and has won the frank approval of many of the naval experts stationed at Newport. Considering the short length of the aerial, the stations which have been heard is remarkable—Cape Cod, Watch Hill, Nantucket lightship and at times Providence, R. I., and Boston.

STATE MASONIC BODIES. Grand Royal Arch Chapter and Grand Council Will Meet This Week. The 14th annual convention of the Grand Chapter of Connecticut Royal Arch Masons, will be held at Masonic temple, Hartford, today at 10 a. m.

SOME INTERESTING FACTS REGARDING HEALTH STATISTICS

Few people realize to what extent their health depends upon the condition of the kidneys.

The physician in nearly all cases of nervous illness, makes a chemical analysis of the patient's urine. He knows that unless the kidneys are doing their work properly, the other organs cannot be brought back to health and strength.

When the kidneys are neglected or abused in any way, serious results are sure to follow. According to health statistics, Bright's disease which is really an advanced form of kidney trouble, caused nearly ten thousand deaths in 1910, in the state of New York alone. Therefore it behooves us to pay more attention to the health of these most important organs.

An ideal herbal compound that has had remarkable success as a kidney remedy is Dr. Kilmer's Swamp-Kidney, the great Kidney, Liver and Bladder Remedy.

The mild and healing influence of this preparation is soon realized. It stands the highest for its remarkable record of cures.

If you feel that your kidneys require attention, and wish a simple bottle, write to Dr. Kilmer & Co., Binghamton, N. Y. Mention this paper and they will gladly forward it to you absolutely free, by mail.

This medicine is sold by every druggist in bottles of two sizes—60c, and \$1.00.

There are people in this town who unthinkingly neglect "a mere cold" though they would not otherwise expose their children or themselves to danger. Yet a cold neglected may develop into contagious diphtheria, pneumonia, or influenza. The Foley's Kidney and Bladder Compound, which it stops coughs quickly and cures colds. It contains no opiates and is safe for children. The Lee & Osgood Co.

JOHN A. MORGAN & SON, Coal and Lumber. Telephone 684. Central Wharf.

and Select Master Masons, will be held at Masonic temple, Hartford, Wednesday at 10 a. m. Most Pious Grand Master Oliver D. L. Burrows of New London will preside and deliver his annual address. The afternoon session will include the election and installation of the new officers.
