SCHOOL SYSTEM IN DIFFICULT PLACE Sage Foundation Report Gives This Mark on General Efficiency to Connecticut—On Attendance This Commonwealth Ranks Twelfth in the 48 States—High Percentage in Value of School Property.

The results of the latest study conducted by the Russell Sage foundation have just been made public for the first time under the title "A Comparative Study of State School Systems in the Forty-eight States." According to this report, the state school system of Connecticut takes fifth place in general efficiency among the systems of the 48 states. The United States of the disclosures made in the report are of striking significance.

United States Has Shortest School Year. Rhode Island has the longest school year of any state—122 days—but if these 193 days of schooling were divided equally among the children of school age in the state the result would be 116 days of schooling each. The report terms this the "effective" school year, and compares the 48 states on that basis. The results of this comparison show that this state provides 128 days of schooling for every child of school age. In nearly a quarter of the states the average school year is less than three months. As a nation, the United States has a shorter school year, a shorter school week, and a shorter school year than any other highly civilized country in the world.

Half a Billion a Year for Schools. Our expenditures for public education have been steadily increasing in the past ten years. Today the people of the United States spend nearly half a billion dollars a year on their public schools. The expenditure per child of school age ranges all the way from \$3 in South Carolina to nearly eleven times as much, or \$32 in Washington. The amount that the state has invested in school buildings is an index of its past interest in education. In Mississippi the average investment per child in school buildings and property is \$4, while in Massachusetts it is \$48. Connecticut ranks at \$11.3.

Fortunately the cottages facing the beach, which are situated on the east end of the beach, were not in its path when on the journey inland and so they were not injured and although the sea reached them at high water no damage resulted.

Household Economy How to Have the Best Cough Syrup and Save \$2, by Making It at Home.

Cough medicines, as a rule, contain a large quantity of opium. If you take one pint of granulated sugar, add 1/2 pint of warm water and stir about 2 minutes, you have as good syrup as money could buy. If you will then put 2 1/2 ounces of Pinex (50 cents worth) in a pint bottle, and fill it up with the Sugar Syrup, you will have as much cough syrup as you could buy ready made for \$2.50, 15 keeps perfectly.

Pinex is the most valuable concentrated compound of Norway white pine extract, rich in gualic acid and all the healing pine elements. No other preparation will work in this formula. It is just laxative enough, has a good tonic effect, and taste is pleasant. Take a teaspoonful every one, two or three hours.

Pinex is an splendid remedy, too, for whooping cough, croup, hoarseness, asthma, chest pains, etc.
