George M. Rouette Did Not Oppose Wife's Divorce, but Denies Story of Previous Marriage.

George M. Rouette, who has just returned here from Cleveland, O. where he was a patient in the Lakeside hospital for three or four weeks, up to May 16, tells an interesting story relative to a divorce case recently tried and granted in Willimantic.

Mr. Rouette was in the Cleveland hospital when the divorce was granted. He says that he knew of the pendency of the divorce, but he did not oppose his wife in securing the decree, but he is anxious to clear his name of the charge that he had been married to another woman, and that he also has affidavits to support that claim.

It has been claimed that Mr. Rouette married an Elizabeth Estelle McManis in refutation of this claim Mr. Rouette produced Monday afternoon the following communication relative to the matter, the original bearing the seal of Joseph Riegler, a notary public of New York city: April 5, 1914.

To Whom It May Concern: I, Daniel C. Cobb, was witness to a marriage of George Moses Wheel (Whise) being the English form for Rouette) and Elizabeth Estelle McManis, performed by Rev. George H. McGrew on May 26, 1897, at 209 East 42nd street, New York—St. Bartholomew's parish house.

To the best of my knowledge Mr. George Moses Rouette of Pomfret, Conn., was not the groom, as I have never seen him since August 1, 1914, when he called at my residence.

DANIEL C. COBB, 1251 Street, New York City.

Mr. Rouette also has an affidavit from Rev. George H. McGrew in which the clergyman states that to the best of his knowledge and belief he never had seen the local Mr. Rouette prior to May 26, 1914.

Mr. Rouette explains that during some of the years of his minority he did use the name of Wheel, but afterwards resumed his rightful name of Rouette. He denies, however, that he is the Mr. Wheel who married Elizabeth McManis in New York in 1897, and says that he can prove by the age given by the Mr. Wheel then married in New York that he is a much younger man than the one married in New York.

Mr. Rouette, who is recovering from a severe injury to his shoulder, is at the home of his wife, Mrs. Rouette, in Putnam.

STEERING GEAR. Failed to Work Easily, Causing Automobile Accident Sunday.

Mr. and Mrs. C. E. Wilkinson and one of their children out of all the family that figured in the automobile accident at the turn near the eastern side of the Grove street cemetery Sunday afternoon, remained at the home of Cromwell Chase east of here Monday.

The other members of the family having returned to their home in Wrentham, Mass., Mr. Wilkinson and the daughter, Florence, have fractured arms and though the broken bones were clean they are not misplaced and will heal rapidly.

Mr. Wilkinson remained in the hospital, his damaged car could be repaired in sufficient degree to permit him to drive home, but he was unable to do so because of the failure of his steering gear to work easily and this theory seems to be borne out by the fact that the tracks of the machine in the highway at the point where the accident occurred lead straight across the turn and directly toward the wall that was hit, showing that the car did not begin to take the turn.

CLASS DAY EXERCISES. Interesting Programme Carried Out by Tourletete Seniors.

Class day exercises of the seniors of the Tourletete Memorial High school were held in Memorial hall in Hartford, Conn., Monday afternoon.

An Argument for Better, Cheaper, and More Artistic Walls and Ceilings

Wall boards have rapidly and effectually taken the place of expensive lath and plaster. Some perform their service better than others, but none so well as Fiberic.

You may test Fiberic (made from an extremely tough, fibrous root) in any way you please—try to bend, break, or burn it. Do anything you please and you'll find it far superior to the others by actual comparison. Then, too, Fiberic has no other exclusive feature, and that is, its chemical stability. Beautifully clean and sanitary walls—that's what it means.

Fiberic costs no more than other wall boards and is far cheaper than lath and plaster. It can be secured in panels of any size or shape to meet your requirements.
