

MATTERS INTERESTING WESTERL

Young Kenyon Held for Burglary, Implicates William Staples—Latter Jailed in Default of \$1,000 Bonds—Deciding Ball Game held for trial to Stonington H. S.—Richard I. Havens Arrested on Serious Charge.

Rev. P. J. O'Reilly, of Montville, has no intimation of the truth in a item in the Westery news of the Bulletin Friday regarding his transfer from Unadilla to Westery. Furthermore he states that the only authority in the diocese of Hartford to make clerical transfers is Right Rev. Bishop J. J. Nilan.

While training to become members of the professional class of thieves, these boys are in the intermediate department frequently in the state and thereby unwittingly serving the state and society by bringing criminals to the bar of justice. During the present week Harry Kenyon held for trial in the superior court for entering the store of Arthur Babcock, in Pawcatuck, gave information which led to the arrest of William Staples for breaking and entering cottages at Pleasant View, last winter, and committing larceny therefrom.

When being questioned by Patrolman Nicholas, he told of jobs that he had worked at since the time he was released. He said that he had an appointment with Staples last Monday night, but as Staples did not show up, he decided to slide into the Babcock store, where he was captured. He told Patrolman Nicholas that Staples was one of the fellows who had been in the cottage at Pleasant View, and that Staples had shown him some of the booty at his home in High street. Patrolman Nicholas stated that Kenyon's story to Chief of Police Brown, of Westery, and the chief had a talk with Kenyon in the Pawcatuck lockup, since then Kenyon had been in the lockup at his home in High street, Friday night, and placed him under arrest. Then Chief Brown, with Mitchell, instituted a search of the premises, and found property that was stolen from Pleasant View.

The regular session of the Third district court, Judge Oliver H. Williams, started less than two weeks Friday morning. The only criminal case on the docket was that of Thomas Brown, charged with carrying a concealed weapon, and who had been arrested on the 11th of May. The children had been cared for by their grandmother, but she recently sustained a shock and, being of limited means, was unable to give the children proper attention.

There is no doubt but there are at least two road men among the granite workers at Bradford, a pair who do not commit any highway robbery and arson. The opinion prevails that the highwaymen who held up and robbed David Mott, Newell, of nearly \$2,000, the pay roll of his granite plant, some three years ago, are still residents of Bradford and are eager to commit more crimes. There is a story to the effect that it was planned to rob Manager Sullivan of the money to meet the pay roll of the Crumb quarry several weeks ago, but was foiled by someone who passed the tip to Mr. Sullivan.

the protection of a member of the Westery police force, who accompanied him on pay day, and rather the representative of the bank who delivered the cash, and the odds were in favor of the latter. It is believed that, while in a revengeful mood they set fire to the boiler house of the Crumb quarry, which entailed a loss of about \$15,000.

Patrolman Shelby Nicholas of Pawcatuck arrested Richard I. Havens on a serious charge, early Friday morning. Havens, who is married, is accused of having carnal knowledge of Bertha Jessup Dawson, the wife of William Dawson.

Judge Edward M. Burke held a special session of the Westery probate court Friday to act upon the complaint of Overseer of the Poor Elly Barber that the Bates children be committed to the state school and board for parents, and the court so ordered. The children are George and Mary Bates and also children of Arthur, aged 9, David, aged 8, and Lloyd, aged 6. The father was recently released from the Providence county jail, where he had spent six months for carrying a concealed weapon.

The regular session of the Third district court, Judge Oliver H. Williams, started less than two weeks Friday morning. The only criminal case on the docket was that of Thomas Brown, charged with carrying a concealed weapon, and who had been arrested on the 11th of May.

The recent punishment of two residents of Westery for keeping swine within the compact part of the town in violation of an ordinance recalled to the mind of an old-time resident the period when the small island in the Pawcatuck river, not far from the present site of the bridge, was utilized as a pigery, the property of Joseph Alcorn. This was in the days when ordinances were few and respect little considered.

The Panama Canal and American Trade. The situation, then, on the eve of the opening of the Panama Canal, is somewhat as follows: The markets of the Pacific Ocean basin are, as a result of developments going on within the countries concerned, rapidly increasing their demand for industrial and structural materials, especially the numerous products of iron and steel; and are decreasing, relatively, their demands for clothing materials and foodstuffs. The United States, under existing conditions, rapidly increasing their demand for the chief class of goods which is in increasing demand. We are also purchasing increasing quantities of the vegetable and animal raw materials which are assuring a more important place among the products that the Pacific countries have to sell, and we have just passed a tariff act which will facilitate their purchase. The trade routes, by which this commerce has been carried on, have been such that for dealing with many of the most

important Pacific countries, the European trader has had considerably greater facilities in delivering his goods than the American. The new canal will alter routes that in the markets where the American trader has already had a certain advantage in facilities, his position will be greatly strengthened, while in several important ones where he has had less favorable facilities, he will now have a distinct advantage over his competitors. If he will seize this moment of opportunity and heed the repeated warnings of our consuls as to the necessity for a systematic study of the markets and the requirements of packing, invoicing, credits, and numerous other technical details, there is every reason to expect, in the next decade or two, an enormous expansion of our commerce with the entire west coast of North and South America, with the Pacific islands, with Japan and all of northern China, and possibly also with New Zealand and parts of Australia. (Lincoln Hutchinson in the July Yale Review).

HATPIN HOLDER. Before discarding the empty talcum powder box with the perforated top see what an excellent hatpin holder it will make. The perforations in the top will accommodate five or six pins. If the box is covered with a ray bit of ribbon in the Roman stripe it gives an attractive note of color to the bureau, but any scrap of silk or satin can be used for the purpose and in its new office the powder box would not be recognized.

BEAD NECLACES. The necklace which affords an exact match to some other item of your wardrobe is a very attractive note just now. The making of a chain of this kind—choosing the beads as one would a brightly colored tie or set of buttons—is a favorite hobby. The work is perfect for visiting, where large pieces of embroidery are not possible, from the point of view of packing.

From the Consular Reports. Great attention is paid by the city of Madgeburg, Prussia, to its bicycle roads. One can ride many miles in the country on smooth stretches of road. Some of the steamers sailing out of Vancouver, B. C., have established motion pictures on shipboard for the amusement of the passengers. The price of bread in Ecuador has been greatly reduced by the installing of German bread making machinery. German youths are now adopting the American game of football.

MONEY LOANED on Diamonds, Watches, Jewelry and securities of any kind at the lowest rates of interest. An old established firm to deal with. THE COLLATERAL LOAN CO., 142 Main Street, Upland, Cal. (Established 1872).
