The man who is always cheerfully willing to "make good" seldom has to.

The merchant who has built up the reputation of his establishment through advertising is specially eager to refund the money if the purchase is not satisfactory. There is security in the purchase in dealing with the man who advertises.

But merchants of this kind are seldom called upon to do any refunding, because they watch closely goods and service.

ISSUED FROM NEW PRINTING PRESS

This Morning's Bulletin is First From New Duplex Tubular—Will Run Off From 25,000 to 30,000 Papers Per Hour—Same as Used by Best Metropolitan Dailies—Double the Speed of Old Press—Complete New Modern Equipment.

With this morning the newspaper readers of Norwich and this end of Connecticut receive their Norwich Bulletin for the first time from the new Duplex Tubular printing press which has been installed in The Bulletin plant and will henceforth continue to run off The Bulletin's regular issue at the marvelous speed of between 400 and 500 papers per minute, according to the rate to which the press is speeded.

The new Duplex Tubular plate printing press used by The Bulletin of which an illustration is shown above, is the "last word" in printing presses and has been so accepted by the big metropolitan dailies of the latest invention in printing press machinery and a mechanical marvel before which the lay mind stands back in dazed wonder at seeing it in operation. As turned out by its makers, The Duplex Printing Press company, of Battle Creek, Mich., it is an example of sterling machine work that would win the unqualified approval of any mechanic.

Guaranteed to 25,000 Per Hour.

The accompanying cut shows the press rigged to run a 12-page issue like that of The Bulletin this morning. From the four big rolls of paper shown on the press at the left of the picture the paper fed into the machine automatically, passing forward through the press until it ascends to pass over the roller in the frame at the right. The paper then descends and is folded down into the folder. From the folder it is delivered at the wonderful rate of 25,000 papers per hour, which is the guaranteed speed of the press. But it can be speeded to 30,000, which is at the almost incredible rate of 500 per minute, all completely folded, counted and delivered in bundles of 50. With the press formerly in use 12,000 per hour was the best that could be done at the highest speed of the press.

The Duplex tubular press is a metal shell about the size of a half segment of a ball keg. The page plate of this new press is a metal shell much smaller as it is about the shape of a length of 8 inch diameter stove pipe. Its smaller cylinder has just twice the speed of the big one on the old style press.

On the Unit System.

Another desirable feature of the press is that it is built on the unit system. If through accident, three-quarters of the press should be smashed, we could still get out a four page paper on the remaining unit. It is also possible by adding other units to counteract an increasing number of pages in multiples of two.

Print in Several Colors.

Owing to the same arrangement we will be able to print in black and two or three other colors simultaneously. The press is a complete unit, by the New York World is a Duplex tubular and produces about 40 per cent. of the output of that paper while the other half of the time and is passing through the air without printing the other half of the time. With a single cylindrical, or tubular plate, this waste of one-half the time is avoided, as each plate encompasses the cylinder and is printing at every revolution.

Other New Equipment.

Along with the new up-to-date press other equipment of the same modern standard has been added. This comprises a new 45 horsepower electric motor to run the press, new stereotyping outfit, new electric roller and new plate planer, while in the new press, the composing and galley rules and new all-steel tables have been put in.

GRANGERS TAKE HOLD OF BEACH DAY

Many to Journey to Atlantic Beach on Norwich Orange Outing.

Norwich Grange, No. 478, patrons of husbandry, had most encouraging response to the meeting Wednesday evening in Byfield, Mass. The Grange is holding "Orange" day at Atlantic Beach today. ROQUISTS REPORTING.

Some Already at Practice on Courts for National Tourney.

In preparation for the National Ropes tournament that starts in this city next Tuesday, some of the world's best ropemen have already put in a few days of practice and the children assembled sang patriotic and old-time songs. Luncheon was served at a 10 o'clock.

These present were Mrs. Rose Goodwin, Mrs. Charles Goodwin and children, Leon and Helen Goodwin; Mr. and Mrs. Stephen G. Turner of Niantic; Mrs. Arthur Williams and son Arthur of Danvers; Mr. and Mrs. Francis Turner of Norwich; Mrs. Esther A. Turner and daughter, Mrs. Olive Phelps and Mrs. Nellie H. Ormiston of Danvers; Mr. and Mrs. Ernest Goodwin and children, Misses Louise, Arlene and Lucile Goodwin of Manchester; Mrs. Walter Beale and children, Mrs. Walter Turner and children, Nancy Beale of Niantic; Mr. and Mrs. Clarence J. Turner and children, Beola, Myrtle, and Helen Turner of Danvers; Black Point, Francis Turner, Arthur Turner and Miss Florence Luce and Miss Mamma Montebello of Niantic.

The letter will appear but once in English for every six times in French.

There will probably be but the two main divisions. But apparently there will be just as large number of places as ever. Charles Goodwin, the veteran of the Grange, is coming down from his home in Westfield, Mass., as a representative of the Springfield club and to act as chairman of the ropes committee. President L. C. Williamson of Washington, D. C., expects to get here the latter part of this week for a little preliminary practice, and as a bonus, countenance this big Grange which friends are always glad to see.

The floral tributes bore evidence of the warm regard in which Mr. Haskell was held by friends.

The Rev. Samuel H. Howe, D. D., of Park Congregational church, read appropriate selections from the scriptures which he followed by a personal tribute to the deceased, with whom he had himself been in close touch in his dietic work, and became familiar with its far-reaching influences and wonderful results. He spoke highly of Mr. Haskell's devotion to his religious convictions and his zeal in spreading "The True Gospel of Health," which he had first proved of value in his own case before he recommended it to others. He published the Dr. Dewey books, which no other publisher would venture to issue, and reinforced them with a book of testimonials. He had compiled, since which time this system of dietetics had made a strong impression on all the continents and in high places. He spoke of his ability and brilliancy as a scholar and of his wonderful self control and strong will as a man who, all who knew him could bear witness, had no living for himself alone. Dr. Howe followed in tribute with an appropriate prayer.

and at the same time get the best instruction and the use of the most modern office training appliances and the prestige of having attended a school that has had the stamp of approval placed upon it by the leading business men.

We have just placed one of our graduates in a position that pays \$15 a week; we offered another just before she finished her course, a choice of four positions, one paying as high as \$14 a week; we placed another in one of the banks after six months' training in our evening school. Another, having finished the course in six months and having worked about six months in his first position has been placed in a permanent position at \$14.75 a week by the school. We just placed in a splendid position a young man from another school who has been looking for office work for over a year, though did not get a position through the school which he attended.

If you can meet the requirements we can place you this morning as a stenographer at \$10-\$14. We also have a substitute position to fill. If you think this sounds too good to be true, call at the office and get the facts. We will also give you the names of many who have recently begun to reap the benefits of having secured a Norwich Commercial School Business Training, at half the usual cost, in the most modern and up-to-date business training school in the vicinity.

Just think of 111-forty-one positions offered us in four weeks' time. There is just one reason for this—it is because the leading business men recognize the Norwich Commercial graduate as the highest type of and the most efficient office worker.
