HERBERT K. JOB.

State Ornithologist Resigns to Accept National Work.

Herbert K. Job, for four years state ornithologist of Connecticut, and lecturer on ornithology of the Connecticut Agricultural college, announces his resignation of these positions, having accepted an opening to do similar work along national lines. His researches in economic ornithology, particularly in the propagation of game birds and wildfowl, and his scientific work, have attracted widespread attention, enlisting the backing of some of the best known men in America. The National Association of Audubon societies, the pioneer organization of America for the conservation of wild birds and game, now the strongest and best financed of its kind, has recently organized, under a special fund, The Department of Applied Ornithology, and has elected Mr. Job "economic ornithologist in charge."

Mr. Job began this new work on August 1 and now resigns because he is unable to give to Connecticut more time than to other states.

The earliest known patent upon a submarine vessel was one granted by a French king in 1640 to the Scotch inventor of an under-water craft for purposes of salvage.

MR. EZRA B. HAND

Mr. Ezra B. Hand suffered many years from insomnia and found no relief until he used Duffy's Pure Malt Whiskey. His letter is only one of many received from grateful users of this wonderful medicine. Read his own words:

"I have been using Duffy's Pure Malt Whiskey for several years and am still using it, and want to tell you what it has done for me. I had insomnia so bad that I could not work. I had some of the best doctors in Philadelphia, but none seemed to help me, so at last I made up my mind to try Duffy's Pure Malt Whiskey; and I want to say that it has made a complete cure in my case."—Mr. Ezra B. Hand, 1628 Ritner St., Philadelphia, Pa.
