CONFESSION TAX EXEMPT CASE

Town of Preston's Board of Relief Disputes Claim of James H. Fitch on Grounds of Blindness—Case Tried in Superior Court Here—Agreement Reached in Crescent Beach Case Over Right to Use Pump House.

One case before the superior court Thursday was settled without trial and after long conference between the principals and attorneys through to a trial. The case was completed and the papers taken by Judge Howard J. Curtis, who will announce his decision Wednesday.

The case tried was that of James H. Fitch of Preston against the town of Preston, an appeal from the board of relief. Fitch made a claim for exemption from taxation on the ground that he was blind. This the assessors and board of relief refused to grant and Mr. Fitch, who is 83, brought suit to establish his right to exemption. The statute provides that a person prevented through blindness from earning his livelihood is entitled to the exemption claimed by this appellant.

The trial of the case was begun Thursday afternoon in the court room of the Superior Court. Mr. Fitch is taxed upon \$3,000 worth of real estate. Dr. Anthony Peck was the first witness put upon the stand by Attorney Charles E. Thayer for the appellant. The doctor testified that he examined Mr. Fitch in the morning before Judge Curtis. He had also examined Mr. Fitch on the day of the trial and found that the sight of his right eye was entirely obscured by a cataract and that a cataract was also in the left eye. He testified that Mr. Fitch can only tell light from darkness.

Frank Fitch, son of the appellant, testified that he had been blind for three years past in the case of his father. Sierwood Swan was the third and last witness for the appellant. He testified that Mr. Fitch had at one time called upon him to help cultivate some corn and wheat and that he had been blind that he could not lead the horse straight between the rows of corn.

For the defendant the case was conducted by Allyn L. Brown. The testimony of George S. Pendleton, the first witness, was in fact in favor of the plaintiff and the present case was to try the issues in equity. When the case was called a recess was taken by the judge for an hour and a conference of over two hours, an agreement was reached. Mr. Fitch, the defendant, was to maintain a pump house and pump on land at Crescent beach. The superior court several months ago gave a decision on the issue at law in favor of the plaintiff and the present case was to try the issues in equity.

SCIENCE HITS THE COFFEE DRINKERS

Familiar Table Beverage Unmasked and Its Evil Effect on the Human Body Shown.
An astonishing list of ill due to coffee drinking is pointed out by Dr. Otto Jettner, of the Cincinnati Poly-clinic, in a communication to the New York Medical Times. The symptoms produced by excessive indulgence in coffee can be observed in the arrested physical and mental development of children; their pallor, emaciation and nervousness; in the morbidly excited condition of women who are addicted to the coffee-pot just as the toper is to the whiskey bottle, and no less a helpless and pitiable victim than he; in professional men and students who whip up the motor faculties by coffee; in the aged, whose tremor and senility are not infrequently due to excessive use of their motor faculties by coffee.

COFFEE POISONING IN ITS CHRONIC FORM may be the cause of tremor, of ringing in the ears, of acute epistaxis, of severe contagious fevers, of crepitation, pricking sensations in the joints, sensations of heat and cold, hysterical attacks, troubles of vision, dizziness, insomnia, all kinds of digestive disturbances. Coffee depresses the kidney function, and skin eruptions are probably due to irritation from retained waste.

Patients who cannot get along without coffee feel uncomfortable, nervous and even sick when deprived of these stimulants, are to all intents and purposes drug addicts, and should be classified with habits of tobacco, alcohol, opium, and other toxic agents."

NOTE-It is interesting to observe that as medical science moves and more reveals the harmfulness of coffee to the health of both young and old there follows a tremendous increase in the use of the pure food beverage, POSTUM.
