Heat Your House
With Gas
By Using a
Gasteam Radiator

Each radiator is a steam heater in
itself. It is safe, sanitary and eco-
nomical. There is no coal to carry in
and no ashes to carry out, and it does
away with an endless amount of dust
in the air.
It maintains an even temperature
and the gas flow is shut off automati-
cally when the desired steam pressure
is reached, thereby preventing waste
of gas.

Many Are Enlisted Under Direction
of United Workers.

Much interest has been shown here
in the matter of working for the sol-
diers in the hospitals abroad and con-
siderable work has been done already
by groups and individuals. This is
going on so well that it has been de-
cided to keep the room at the United

ings from 10 to 12, to give out or re-
ceive work.
Mrs. Robert W. Perkins, secretary of
the local Red Cross branch, is always
in readiness to give information to
would-be workers. Her address may
be taken or sent to her at her
home, No. 42 Rockwell street and will
be promptly forwarded.
Cooperation on the part of all wo-
men of the city and suburbs is de-

a worthy share in this urgent charity.
It is hoped that clubs of young people
will be formed in neighborhoods and
elsewhere, to knit, crochet or sew.
Other cities are so ardent over this
work that women's knit at concerts,
while calling, on the trains, etc.
Mrs. Perkins is hoping for sugges-
tions and aid from all who are in
the sympathy of the project, and is
anxious to give all information pos-
sible regarding materials, articles de-

**WHAT DYSEPTICS
SHOULD EAT**
A PHYSICIAN'S ADVICE
Indigestion and practically all forms
of stomach trouble are, nine times out
of ten, due to acidity; therefore stom-
ach sufferers should, whenever possi-

its nature, or which by chemical action
in the stomach develops acidity. Un-
fortunately, such a rule eliminates most
foods which are pleasant to the taste
as well as those which are rich in
blood, flesh and nerve building prop-
